87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

537 State Health Services, Department of

Protecting every Texan is at the heart of the Department of State Health Services' (DSHS) mission. We are charged with improving the health, safety and well-being of Texans, and never has that been clearer than in these unprecedented times. Since its emergence in late 2019, the COVID-19 global pandemic has challenged all aspects of life in our state. As the state's public health agency, DSHS has been on the frontline of Texas' response working to slow the spread of COVID-19 in our communities, preserve the state's healthcare system, and provide clear and actionable guidance to the public about this new disease. Our dedicated public health professionals, in coordination with local health departments across the state and our partner agencies, work tirelessly every day to safeguard Texans.

DSHS is administratively organized into divisions covering Laboratory and Infectious Disease Services, Regional and Local Health Operations, Consumer Protection, and Community Health Improvement that fulfil our mission by:

- preventing, detecting and responding to infectious diseases,
- providing public health and medical response during disasters and emergencies,
- developing evidence-based public health interventions through data analysis and science,
- reducing health risks and threats through consumer protection, and
- promoting healthy lifestyles through disease and injury prevention.

Throughout the pandemic, DSHS has been fully committed as an agency to responding to COVID-19, while remaining vigilant against other infectious diseases, biological or chemical threats, and emerging public health issues. I am proud of the many ways DSHS staff have risen to the challenge of combating COVID-19. The hard work and sacrifice shown by staff embody the very best of public service.

We began taking actions to fight COVID-19 shortly after the US Centers for Disease Control and Prevention confirmed the first case of the novel coronavirus in the United States. Ten days later, on January 31, we officially activated the State Medical Operations Center to prepare for the coming crisis, and by February 17, we activated our Regional Medical Operations Centers. On March 4, we announced the first positive test result for COVID-19 in Texas, and a shortly after we confirmed on March 17 the first fatality of a Texas resident who had tested positive for COVID-19. Since early spring of 2020, the range of our response efforts during the pandemic have covered:

- Coordination of local and state public health efforts;
- Statewide management and provision of lab testing and capacity;
- Data collection, analysis and reporting;
- Health care system support and deployment of medical staffing to hospitals and nursing facilities;
- Statewide public awareness;
- Public Health guidance for individuals and businesses and consultation with local elected leaders; and
- Sourcing and consulting on medical supplies and personal protective equipment.
- Developing the infrastructure to safely and appropriately disseminate vaccine

The scale and scope of COVID-19 necessitated an unprecedented statewide public health response encompassing all parts of DSHS. Staff have been redeployed throughout the agency as we prioritized our COVID-19 response efforts, while still performing other ongoing important public health work Texans expect of us, including vaccinations, newborn screening, chronic disease prevention, vital statistics, food safety, and consumer protection activities.

DSHS developed its 2022–2023 Legislative Appropriations Request in light of its ongoing pandemic response and additional public health obligations. The DSHS appropriations request complies with the guidance provided by the Legislative Budget Board and the Governor's Office of Budget and Policy. DSHS conducts criminal history background checks on a wide variety of positions, such as statewide users of the electronic vital statistics registration system, regional dental teams who work in

Administrator's Statement

10/9/2020 10:41:25AM

537 State Health Services, Department of

schools to provide oral health screenings, staff at the Texas Center for Infectious Disease, and certain laboratory personnel as a requirement of the CDC Select Agency Program Registration. Additionally, DSHS conducts background checks through the consumer protection program on license applicants, such as EMS personnel, EMS provider, Prescription or Non-Prescription Drug Wholesaler Distributor, and Consumable Hemp product applicants.

As the pandemic unfolded, DSHS received over \$1.5 billion in federal funding to support the state's COVID-19 public health needs. While these additional federal funding sources allow DSHS to address COVID-19, DSHS LAR reflects unmet current and future critical public health funding needs across DSHS' responsibilities aimed at protecting Texans beyond this one infectious disease. Our request focuses on those activities at the core of public health.

Based on the guidelines for developing the LAR, DSHS' baseline request includes a 5% reduction of General Revenue Funds and General Revenue-Dedicated Funds budget. Post-Health and Human Services transformation, DSHS has been fully focused on public health. While these reductions are difficult, the agency understands the changing economic environment in Texas and has prioritized core public health programs. Programs partially reduced include HIV, the Adult Safety Net Immunization program, the Texas Primary Care Office, chronic disease programs, and agency administrative support provided by HHSC.

The LAR includes four prioritized exceptional items that span program and infrastructure needs and ensure a stable foundation for state public health services. These exceptional items represent DSHS' refocused mission on public health and seek to provide the Department with the capacity to continue meeting the needs of Texans.

(1) Infectious Disease Respond and Laboratory Capabilities. This request includes funds to ensure the state's ongoing capability to address infectious diseases like COVID-19 and tuberculosis, and to maintain laboratory capacity to test for spinal muscular atrophy.

(2) Frontier Public Health Services. This request seeks to ensure the ongoing availability of essential public health services, such as providing vaccinations, tuberculosis surveillance, and sexually transmittable disease screening. in rural and frontier communities where DSHS is the primary public health service provider. The exceptional item includes additional rural and frontier clinics, mobile clinics, and an electronic health records system for regional offices.

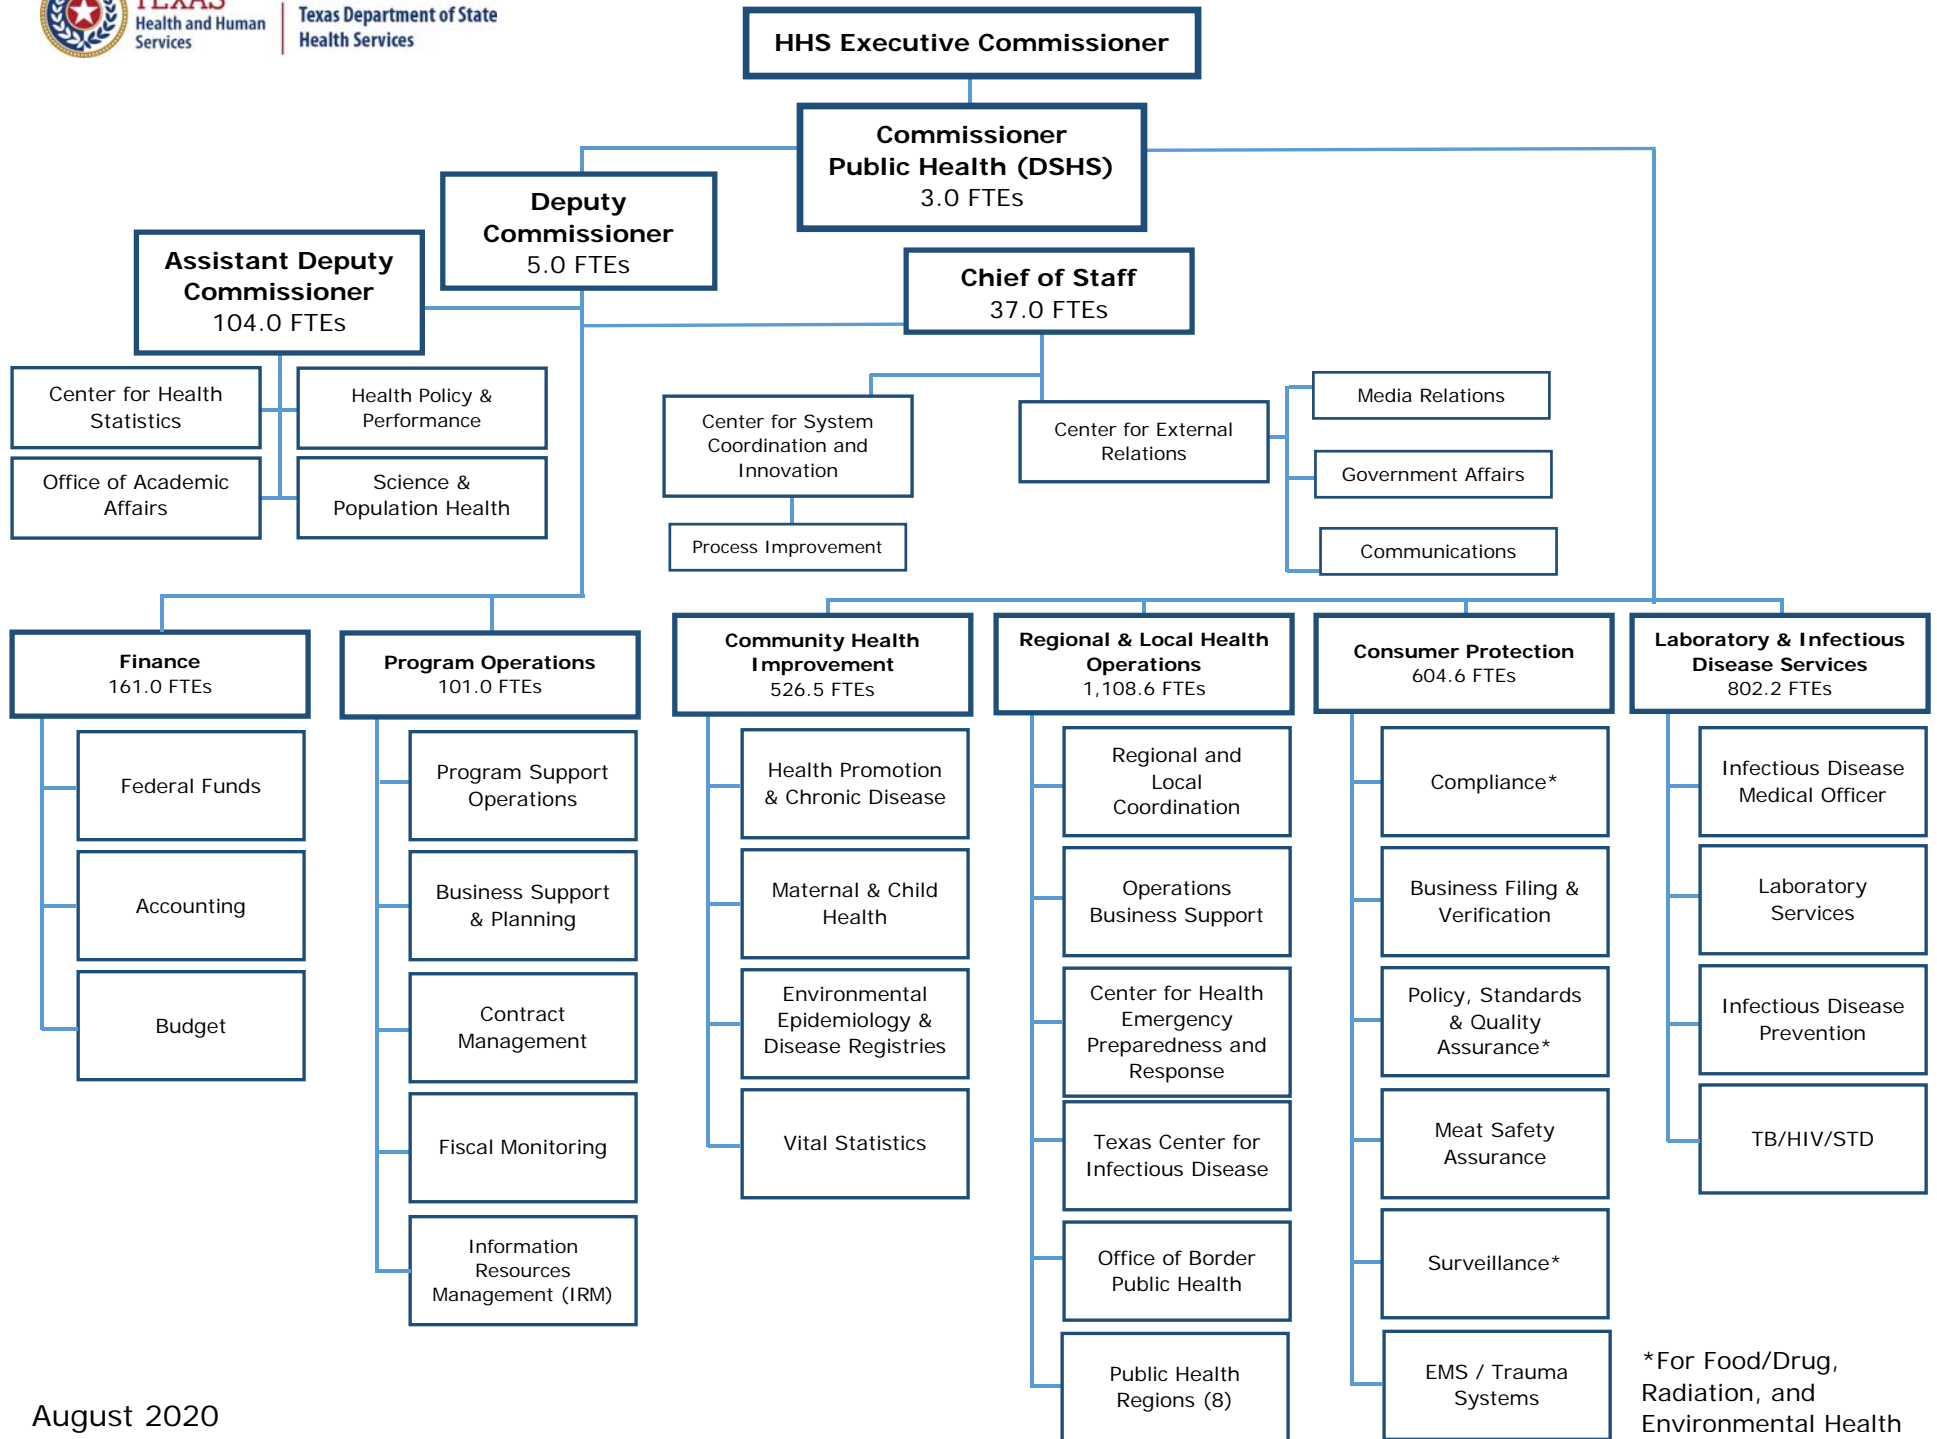

(3) Consumer Protection and Safety. This request addresses audit findings related to consumer protection, seeks to secure adequate consumer protection and licensee support for the new consumable hemp program, maintains a technically skilled workforce related to food safety responsibilities, and improves customer service capabilities for current and future licensees.

(4) Effective Business Operations and Information Technology. This request supports fiscal management, data center services costs, and the long-term viability of certain public health registries required to continue agency operations.

The COVID-19 pandemic is presenting complex budgetary challenges for Texas. DSHS looks forward to continuing to work with the Legislature on protecting the health and well-being of Texans.

I am proud to submit this Legislative Appropriations Request on behalf of over 3,200 dedicated health professionals for DSHS working across the state to protect Texans from disease and improve their health. The contributions we make every day, improve the lives of all Texans.

Yours in Service,
John Hellerstedt, MD
Commissioner

ORGANIZATIONAL STRUCTURE
87th Regular Session, Agency Submission

Agency Code: **537**

Agency Name: **State Health Services, Department of**

DSHS is led by a commissioner with four programmatic divisions: Community Health Improvement, Consumer Protection, Laboratory and Infectious Disease Services, and Regional and Local Health Operations. These divisions fulfill the agency's mission by: preventing, detecting and responding to infectious diseases; promoting healthy lifestyles through disease and injury prevention; reducing health risks and threats through consumer protection; developing evidence-based public health interventions through data analysis and science; and providing public health and medical response during disasters and emergencies.

Additionally, overall management of the department's public health mission includes financial and operational aspects of the agency's programs. These functions are carried out in conjunction with administrative services that are centralized at the Health and Human Services Commission (HHSC).

Commissioner's Office

The Commissioner's Office consists of the DSHS Commissioner, Deputy Commissioner, Assistant Deputy Commissioner, and Senior Advisor. The Commissioner's Office leads the department, providing strategic direction and central organizational support to all DSHS programs.

The Commissioner serves as the chief administrative head for DSHS (also the state's chief health officer) and is responsible for maintaining fiscal responsibility while protecting, promoting, and improving the health, safety, and well-being of Texans through good stewardship of public resources by efficiently and effectively carrying out core public health functions. The Commissioner has executive-level responsibility for the delivery of DSHS programs and services.

The Deputy Commissioner has broad involvement in the day-to-day operations of the agency, providing leadership and oversight to the Divisions of the Assistant Deputy Commissioner, Finance, Program Operations, and the Chief of Staff, along with agency communications, government affairs, strategic and operational priorities and coordination with HHSC on agency administration. Other responsibilities include providing follow-through on key issues and significant projects; proactively initiating action to address agency performance issues; serving as a catalyst to organize and initiate action on projects cutting across agency divisions; and ensuring proper agency communications and interaction with stakeholders.

The Center for External Relations (CER) is responsible for DSHS external communications and legislative relations. CER responds to media inquiries, plans and assists programs with communication strategies, develops communications products for executive staff, conducts public awareness and education campaigns, and develops and maintains agency webpages related to communications and emergency public information. CER serves as the liaison with state and federal elected officials. The Center for System Coordination and Innovation (CSCI) is responsible for stakeholder relations, strategic planning, and executive planning and support. CSCI processes consumer complaints and inquiries, provides guidelines in support of advisory committees, and coordinates the agency's priority initiatives and internal process improvement initiatives. CSCI is primarily responsible for cross-coordination with HHSC on a variety of initiatives and assignments.

The Assistant Deputy Commissioner directs the Center for Health Policy and Performance, the Office of Academic Affairs, the Center for Health Statistics, and the Office of Science and Population Health. The Assistant Deputy Commissioner and staff also develop and monitor plans to implement agency-wide health policy initiatives and coordinate efforts to integrate program services.

ORGANIZATIONAL STRUCTURE
87th Regular Session, Agency Submission

Agency Code: **537**

Agency Name: **State Health Services, Department of**

The Center for Health Policy and Performance (CHPP) provides agency-wide planning, coordination, and policy analysis. Additionally, CHPP leads policy analyses on DSHS-wide and public health systems issues and strategic goals and action plans to improve population and community health. CHPP facilitates inter- and intra-agency coordination to analyze, monitor, and communicate policy, operational, and financial impacts of state and federal policies.

The Office of Academic Affairs (OAA) creates and strengthens academic-practice partnerships to translate current research into practice, implement best practices, and meet the needs of the public health workforce. It does this through strategic and goal-focused engagement with academic institutions. OAA is responsible for the agency's health professional development functions including: the Accreditation Council for Graduate Medical Education (ACGME) accredited Preventive Medicine Residency Program; continuing education services for physicians, nurses and other healthcare professionals; educational opportunities and internship experiences within DSHS for students; and research partnerships with academic institutions.

The Center for Health Statistics (CHS) analyzes and disseminates diverse Texas health information—such as health risk behaviors (e.g., smoking), vital events (e.g., causes of death), hospitalizations, and healthcare workforce characterization—for the public, policy makers, public health practitioners, healthcare providers, and researchers. CHS assesses information needs and analytical approaches; adopts standards for data collection and dissemination; recommends and implements ways to improve data access and utility; integrates data sets to create new and useful information; and provides consultation and technical assistance (e.g., data analysis and interpretation) to diverse users of data, including other state agencies.

The Office of Science and Population Health (OSPH) enables DSHS to better perform its public health mission. OSPH coordinates and integrates science, medicine, and other health professional expertise to inform DSHS population health initiatives. Within OSPH, the State Epidemiologist provides guidance to DSHS programs on epidemiologic and scientific matters and serves as the primary point of contact with the Centers for Disease Control and Prevention and other federal agencies on epidemiologic matters.

Chief Financial Officer

The Chief Financial Office consists of the Chief Financial Officer and the Accounting and Budgeting Sections. The CFO is responsible for the agency's budgeting process and financial operation. Tasks include developing fiscal policies and procedures, ensuring the integrity of accounting records, and safeguarding financial assets through the establishment and maintenance of internal controls. Within the Chief Financial Office, a federal funds unit manages the numerous federal grant applications and awards.

The Accounting Section manages agency revenue, assets, and disbursements. It also provides general accounting support, coordinates financial audits, and processes reimbursements. The Accounting Section consists of three units: Claims Processing, Revenue Management, and General Ledger. Claims Processing manages disbursements and processes payments, including travel reimbursements, purchase vouchers, and refunds. This area also processes employee payroll and required payroll reporting. Revenue Management manages revenue, including collection and deposit of cash instruments; deposits into the State treasury and local accounts; accounts receivable; and deposits of cash receipts from regional offices. This area also bills for cost reimbursement contracts. The General Ledger area provides general accounting support, manages assets, prepares the annual financial report and other required reports, performs HHSAS/USAS reconciliations, and prepares indirect cost proposals.

ORGANIZATIONAL STRUCTURE
87th Regular Session, Agency Submission

Agency Code: **537**

Agency Name: **State Health Services, Department of**

The Budget Section is comprised of the following units: Reporting, Fiscal Notes/Rules and Special Projects, Administration, Public Health Operations, Infectious Disease, and Community Health. The Reporting Unit develops the Legislative Appropriation Request and the External Operating Budget; provides performance measures reporting; conducts statistical analysis, forecasting, and trend analysis; provides contract management support; and prepares budgets and funding projections for grants and interagency agreements. The other units assist programs in developing and managing their budgets, perform fiscal analysis of expenditures, prepare fiscal notes for bills and rules, and process requisitions.

Division for Program Operations

The Associate Commissioner of Program Operations provides coordination of essential operational activities that support the department's public health services and programs. These include key liaison functions with legal and administrative services at HHSC, including human resources, building and property management, information technology, and procurement and contracting services to ensure effective and efficient service delivery. Program Operations also oversees fiscal monitoring of agency recipients and sub-recipients of federal and state grant funds. In addition, the division provides coordination of business continuity activities, agency administrative and operational support policies, and new employee orientation.

The Program Support Operations provides essential operational support to DSHS programs and liaisons with HHSC on DSHS property management/building services related matters and printing services/reproduction of materials. The section coordinates mail services for DSHS.

Business Support and Planning coordinates development and revision of DSHS administrative and operational support policies, serves as Human Resource agency liaison to HHSC, conducts New Employee Orientation classes, serves as agency liaison to the HHSC Veterans Advocate liaison, distributes monthly human resources reports and related activities within DSHS, and coordinates special projects as assigned.

Information Technology serves as the IT agency liaison to HHSC on business automation services for DSHS internal business units and DSHS stakeholders. Services received from HHSC include project management, application development and support, network management and operational support, help desk, information security, quality assurance and planning services, and information resources procurement review.

The Fiscal Monitoring Unit provides financial monitoring of DSHS recipients and sub-recipients of federal and state grant funds and reports potential issues of waste, fraud and abuse to the Office of Inspector General. The unit reconciles property inventory reports and cost allocation plans submitted by recipients/sub-recipients.

Contract Management provides agency contract management functions with the goal of gaining efficiencies in contract processes and minimizing contract processing times by co-locating functions and contract expertise in one area.

Division for Regional and Local Health Operations

The Division for Regional and Local Health Operations coordinates, standardizes, and provides statewide public health services. The division includes oversight and management of the state's regional public health offices, regional and local health coordination with public health partners, and operation of the Texas Center for Infectious Disease. Additionally, the division includes the Health Emergency Preparedness and Response Section and the Office of Border Health and supervises the State Capitol Nurse who provides urgent care services in the state capitol building.

ORGANIZATIONAL STRUCTURE
87th Regular Session, Agency Submission

Agency Code: **537**

Agency Name: **State Health Services, Department of**

Texas is divided into eight Public Health Regions (PHRs). Region Headquarters are located in: Lubbock (PHR 1), Arlington (PHR 2/3), Tyler (PHR 4/5N), Houston (PHR 6/5S), Temple (PHR 7), San Antonio (PHR 8), El Paso (PHR 9/10) and Harlingen (PHR 11). Each PHR has numerous satellite offices. In addition to regional health coordination, the PHRs provide health services for jurisdictions absent a local health department and provide select or augmented public health services for jurisdictions with health departments. Additionally, DSHS Regional Medical Directors are the statutorily defined Health Authority (HA) in jurisdictions without a HA.

The Health Emergency Preparedness and Response Section is responsible for leading the state's public health and healthcare delivery system in preparing for and responding to events requiring coordinated and specialized health and medical services. These activities may involve only health entities or may support the Texas Emergency Management response to bioterrorism, infectious disease outbreaks, intentional acts of terrorism and natural disasters.

The Texas Center for Infectious Disease (TCID) is a hospital facility operated by DSHS for the treatment of individuals with severe and complex tuberculosis (TB) disease. TCID also treats patients who have been court ordered to complete their TB treatment regimen in a controlled environment and provides outpatient treatment for Hansen's disease (leprosy). TCID is accredited by the Joint Commission and is certified as an acute-care hospital by the Center for Medicare & Medicaid Services.

The Office of Border Public Health promotes and protects the health of border residents through coordination, initiation and management of public health programs tailored to the Texas-Mexico border population.

Division for Consumer Protection

The Division for Consumer Protection provides public health oversight of people and entities that provide consumer health goods and services to the public. The division ensures protection of public health and safety through programs that identify and reduce health problems from exposure to radiation, food, drugs, and other environmental hazards, as well as through the administration of the state's Emergency Medical Services (EMS) and Trauma Care System which provides the vital link between sudden injury or illness and emergency medical care for all Texans.

Food and Drug Safety protects Texans from unnecessary morbidity and mortality through a system that oversees people and entities that provide ingestible, medical, and topical products to the public and/or use processes (e.g. pasteurization, sterile drug manufacturing, tattooing) that, if done casually or carelessly, endanger the public. The system monitors safety by onsite inspections, sampling, and enforcement.

Radiation Control protects the public from unnecessary exposure to radiation through systems that oversee people and entities that produce and/or use radiation sources or generate products that may be hazards.

Environmental Health protects the public from unnecessary and potentially long-term morbidity and mortality through an organized and monitored system that oversees people and entities that work in or with potential environmental hazards (e.g. asbestos, lead) that, if done casually or carelessly, endanger the public.

ORGANIZATIONAL STRUCTURE
87th Regular Session, Agency Submission

Agency Code: **537**

Agency Name: **State Health Services, Department of**

The EMS/Trauma System Program develops, implements, and evaluates regional systems of care with an emphasis on trauma, pediatrics, disaster preparedness, and stroke; designates hospitals for trauma, stroke, neonatal, and maternal levels of care; oversees individuals/entities who provide emergency medical services; and disseminates statewide funding.

Division for Laboratory and Infectious Disease

The Division for Laboratory and Infectious Disease Services provides laboratory services and disease surveillance, epidemiology, prevention, and control. The division detects and prevents the spread of infectious diseases (including zoonotic diseases spread from animals to humans); administers a system to immunize children and adults; provides HIV medications to eligible persons and TB and sexually-transmitted disease (STD) medications to public health clinics; provides laboratory analysis of specimens and samples, including newborn screening for certain genetic, endocrine, and metabolic disorders, and testing of biological and chemical agents; collects and distributes data on infectious diseases and healthcare-associated infections; and responds to disease outbreaks.

Public Health Laboratory Services provides comprehensive laboratory services for human, animal, and environmental specimens, and provides professional expertise and consultation. The Austin Laboratory is comprised of two main units. The Lab Operations Unit provides medical laboratory services for the state-mandated newborn screening program, Texas Health Steps Program, Maternal and Child Health Program, Title V, and Childhood Lead Screening. The unit also provides comprehensive diagnostic testing of specimens for the presence of infectious disease organisms, including antimicrobial resistant organisms, and water testing under the federal Safe Drinking Water Act. The Quality Control Unit ensures compliance with federal regulations concerning testing of human specimens and provides support services to all areas of the laboratory inclusive of checking in all specimens and reporting out all test results. The South Texas Laboratory, which is located in Harlingen, provides clinical testing support for the Rio Grande State Center outpatient clinic and tuberculosis testing for the Border Health Bi-national Program.

Infectious Disease Prevention collects and analyzes mandated disease reports and data to understand the extent of infectious diseases and disease trends. This section operates the Texas Vaccines for Children program, the Adult Safety Net vaccine program, and the statewide immunization registry. Additionally, the section oversees efforts to prevent and control a wide variety of infectious diseases, zoonotic diseases, and vaccine-preventable diseases; oversees disease investigations and responds to disease outbreak; and collects and provides data on health-care acquired infections and preventable adverse events.

TB/HIV/STD manages programming to prevent and control HIV, STD, TB, and Hansen's disease. Additionally, the section supports testing for HIV, STDs, hepatitis C, and TB; provides life-saving medications to low-income Texans with HIV; and provides TB, STD, and Hansen's disease medications to public health clinics that treat Texans with these diseases. The section collects and analyzes mandated disease reports and data on HIV, STDs, and TB to understand the extent of these diseases and their trends; oversees investigations of HIV, STDs, and TB; and responds to disease outbreaks.

Division for Community Health Improvement

The Division for Community Health Improvement promotes improved community health outcomes through maternal and child health initiatives and health screening; reducing chronic disease, tobacco use, and injury; ensuring healthy environments through disease surveillance and investigation; and overseeing the vital events registration system for the state.

ORGANIZATIONAL STRUCTURE
87th Regular Session, Agency Submission

Agency Code: **537**

Agency Name: **State Health Services, Department of**

Vital Statistics manages the registration of all vital events (including birth, death, fetal death, marriages, and divorce) in Texas. The section collects, registers, amends, protects, and issues vital records for legal and administrative purposes, and uses vital records data for public health purposes to improve the health and well-being of Texans. A paternity registry and adoption registry are maintained, and information provided by the courts is processed, recorded, and disseminated on all lawsuits affecting the parent-child relationship. Certified copies of vital records are provided, new birth records based on adoption or paternity determinations are created, and applications to correct or complete birth and death records are processed. The section responds to customer requests for certified copies or verifications of vital event records, and other supplemental documents; monitors validity and reliability of vital statistics data to ensure the overall quality of data filed and to enable federal, state and local governmental entities to make pertinent public health decisions; and responds to requests for information/data.

Environmental Epidemiology & Disease Registries uses epidemiologic methods to investigate unusual occurrences of disease, conducts disease surveillance, assesses environmental exposures, conducts population research, and operates disease registries. These registries serve as a primary data source for assessing impact, understanding causes of disease, and identifying and evaluating prevention and intervention strategies.

Maternal and Child Health implements data driven evidence-based/evidence-informed programs to improve the health and well-being of pregnant women, mothers, children, and families. This section encompasses areas addressing genetic screening for newborns, vision, hearing and spinal screening in schools and daycares, children's oral health services, services for children with special health care needs, injury prevention and Title V maternal and child health programming. Title V programming aligns with the goals and purpose of the Title V Maternal and Child Health Block Grant; addresses the federally outlined maternal and child health population domains; and meets the federal requirements of supporting preventive and primary care services for children, adolescents, and children with special health care needs. The section is responsible for addressing issues such as abnormal newborn screening care coordination, maternal morbidity and mortality, child fatality, population health, adolescent health, injury prevention efforts for children and youth, childhood obesity, and treatment of child abuse and neglect in hospital or academic settings.

The Health Promotion & Chronic Disease Prevention implements data-driven and evidence-based community interventions to promote health and reduce premature death and disability from chronic diseases from federal and state funding. The section promotes healthy communities through initiatives designed to enable healthy lifestyle choices and educate the public about chronic disease prevention and management. The section addresses the most common chronic diseases and risk factors, including diabetes, cancer, cardiovascular disease and stroke, obesity, hypertension, and tobacco through targeted interventions and key local and statewide partnerships. Title V funds the Community Health Worker (CHW) Training and Certification Program. This program provides certification and recertification to Texas residents who wish to become a Promotor(a)/CHW or CHW Instructors. In addition, the section manages programs focused on Alzheimer's Disease, worksite wellness, and school health.

CERTIFICATE

Agency Name Texas Department of State Health Services

This is to certify that the information contained in the agency Legislative Appropriation Request filed with the Legislative Budget Board (LBB) and the Governor's Office Budget Division (Governor's Office) is accurate to the best of my knowledge and that the electronic submission to the LBB via the Automated Budget and Evaluation System of Texas (ABEST) and the PDF file submitted via the LBB Document Submission application are identical.

Additionally, should it become likely at any time that unexpended balances will accrue for any account, the LBB and the Governor's Office will be notified in writing in accordance with Article IX, Section 7.01 (2020-21 GAA).

STRATEGY DESCRIPTION AND JUSTIFICATION:

This strategy includes a large portion of the agency's response to COVID-19 pandemic, including activation of the state medical operations center, purchasing personal protective equipment, and funding medical surge staff. Ensures effective partnerships among local health entities (LHE), DSHS Public Health Regions (PHR), hospitals and supporting health care systems to provide essential public health services and to better respond to emergencies in all communities across the state. DSHS PHRs provide public health services to communities where LHEs either do not exist or do not have the capacity to provide them. DSHS works to ensure coordination with health care systems and federal, state and local governments to prepare for and respond to natural and manmade disasters. State and federal funds are used to support local and regional public health activities to: prevent epidemics and spread of disease; protect against environmental hazards, prevent injuries; promote healthy behaviors; conduct public health syndromic surveillance; ensure an adequately trained and responsive public health workforce; respond to disasters; and maintain secure networks for the dissemination of critical health and response information to responders. DSHS provides a critical role in the rapid response and protection of communities before, during and after a disaster, regardless of jurisdictional boundaries.

------	-------------	----------	----------	----------	---------	---------

A strong, flexible public health system is necessary to prepare for and respond to any large scale public health disaster. Coordination among numerous stakeholders is critical to carrying out this role and responsibility. A strong public health system is essential to the state’s overall public health, its response to existing and emerging health threats, and its ability to effectively respond in an emergency or disaster. The overall ability of DSHS, the PHRs, and LHDs to carry out core public health functions across Texas is dependent on funding. The federal funding amount in this strategy increased significantly in FY21 due to the receipt of federal funds for the COVID19 pandemic response.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The DSHS State Registrar is the custodian of vital records in Texas. The vital records system ensures all original birth and death records, applications for marriage licenses, and reports of divorces and annulments are processed. (Title 3, Chapters 191-195, HSC) A paternity registry and voluntary adoption registry are maintained, and information provided by the courts is processed, recorded, and disseminated on all lawsuits affecting the parent-child relationship. (Title 5, Family Code) Additionally, the State Registrar provides certified copies of vital records, creates new birth records based on adoption or paternity determinations and processes applications to correct or complete birth and death records. All potential allegations of fraud involving vital records must be reported to the Health and Human Services Commission, Office of Inspector General. These activities contribute directly to the statewide goal of promoting the health of the people of Texas by increasing the availability of information critical for public health analysis and health service delivery.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

537 State Health Services, Department of

GOAL: 1 Preparedness and Prevention Services

CODE	DESCRIPTION	Exp 2019	Est 2020	Bud 2021	BL 2022	BL 2023
------	-------------	----------	----------	----------	---------	---------

The number of birth, death, and fetal death records, as well as marriage and divorce indices will increase as the population increases. The number of new birth records created due to adoptions and paternity determinations, as well as suits affecting the parent-child relationship are also expected to increase due to an enhanced focus by the state to establish paternity. Federal legislation intended to decrease identity theft and false claims to U.S. citizenship may increase the number of requests for vital records due to employment, certain social service and human migration requirements. The increased volume of records will require continued system improvements to ensure the timely processing, filing and dissemination of vital information. The maintenance and security requirements to address the increased volume of records will require continuous evaluation of technological and specialized resources. In addition, improving the quality of information collected on birth and death records is critical to public health research and programs, such as maternal mortality. Many of the activities within this strategy are supported through the collection of fees.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Disease registries collect health information for public health research and analysis purposes that inform decisions regarding the health of Texans . This strategy includes the Birth Defects, Child Lead, Cancer, Emergency Medical Services/Trauma registries and other environmental epidemiology, toxicology and surveillance as well as reportable injuries and occupational conditions functions (Health and Safety Code, Chapters 82, 84, 87, 88, 92, 161, 427, 503, 773 and 777). The registries operate as data collection systems to monitor health status of communities, incidence over time, investigate clusters, respond to data requests, and to support public health analysis and research. This strategy uses epidemiology & toxicology to monitor and investigate health risks to people in communities and to inform and educate communities on environmental health issues. Community assessments are coordinated with federal, state & local partners and recommendations are made pertaining to environmental health issues.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

537 State Health Services, Department of

GOAL: 1 Preparedness and Prevention Services
 OBJECTIVE: 1 Improve Health Status through Preparedness and Information Service Categories:
 STRATEGY: 3 Health Registries Service: 23 Income: A.2 Age: B.3

CODE	DESCRIPTION	Exp 2019	Est 2020	Bud 2021	BL 2022	BL 2023
------	-------------	----------	----------	----------	---------	---------

External and internal stakeholders use data from disease registries to conduct public health research that inform decisions regarding the health of Texans . Data quality and completeness are dependent on fully functioning and integrated data systems for all of the Health Registries. Increases in data volume result in the need for costly upgrades and maintenance support for each registry. More attention and funding to address high rates of cancer- related deaths in Texas has increased the need for resources to fill data requests. The CDC continues to lower the blood lead level that requires provider and parent notification, resulting in increased workload for the Childhood Lead Poisoning Prevention Program. Positions are difficult to fill due to required expertise in toxicology, environmental sciences, and epidemiology, which are critical in addressing the human health impact of environmental contaminants and of non-infectious disease clusters. These factors have a direct impact on environmental epidemiology surveillance and monitoring functions.

STRATEGY DESCRIPTION AND JUSTIFICATION:

This strategy contributes to the statewide goal of promoting the health of people in Texas and, in this case, those persons residing along the 1,248 mile Texas-Mexico border and in 2,300 neighborhoods called Colonias. More than 3.1 million people lived in the 32 border counties in 2020. Challenging economic and demographic conditions and the region's relationship with Mexico have created unique health and environmental conditions requiring special consideration. The Office of Border Public Health (OBPH) was established to coordinate and promote health and environmental issues between Texas and Mexico (Chapter 12.071, HSC). This initiative is implemented through 4 OBPHs core functions, as follows: Border Data, Border Binational Coordination, Community-based Healthy Border Initiatives, and Best Practices/Evaluation. Community-based healthy border projects address measurable border health objectives.

------	-------------	----------	----------	----------	---------	---------

Colonias often have poorly constructed housing that lack electricity, running water, sewage facilities, and other basic services, that may increase the risk for developing food and water-borne diseases. This region is disproportionately affected by chronic and infectious diseases, TB and neural tube birth defects. Border community and Colonia residents may experience limited access to various services due to a growing population in the region, transportation needs, poverty, and geographic isolation. Field work is effective in addressing needs of residents but increases in travel-related costs could impact field work availability if travel funds are reduced. Evaluating technology options for field work could address some travel challenges. Coordination with other federal, state and local agencies is needed to develop and deliver culturally appropriate information and materials, and implement health and prevention agendas and services for border communities and Colonias. The US-Mexico Border Health Commission, established by PL 103-400, is steering new bi-national cooperation and coordination initiatives, which directly involve the Border State Health Departments and are formalized through an international agreement between the U.S. and Mexico.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Center for Health Statistics (CHS) collects, stores, validates, analyzes and disseminates health data and information to improve public health in Texas. CHS provides a variety of services that include data collection, advanced analytics, data management, data linkage, geographical information system services and library and information services. CHS provides technical support and consultation, reporting, data visualization, data management, and quality control and assurance. CHS is responsible for the privacy and confidentiality of the data it houses. CHS maintains various data sets including vital events data, Behavioral Risk Factor Surveillance Surveys for adults and youth, inpatient discharge data and emergency department data from hospitals, and a subset of outpatient services data from hospitals and ambulatory surgical centers. The Statewide Health Coordinating Council (SHCC) with the support from the Health Professions Resource Center within CHS, assess access to health care services and facilities and make recommendations to the governor and the legislature through the Texas State Health Plan Texas Center for Nursing Workforce Studies under the governance of the SHCC serves as a resource for nursing workforce information in Texas. Health and Safety Code, Chapter 104 and Chapter 311, requires CHS to report on hospital survey data and on hospital charity care and community benefits data. CHS provides a comprehensive website data portal for the public to access and query health data collected and reported. The portal is known as Texas Health Data.

CODE	DESCRIPTION	Exp 2019	Est 2020	Bud 2021	BL 2022	BL 2023
------	-------------	----------	----------	----------	---------	---------

The role and process of state and local public health agencies in data gathering and dissemination is changing due to changes in the use of information systems, a national focus on program collaboration and data integration, and advances in technology allowing for faster reporting and more frequent and more sophisticated data consumption. As a result of these changes, CHS will likely need to respond to increases in efficiency and performance for data timeliness and completion, and heightened expectations for more complex analytics and data visualization. To meet these expectations, CHS is re-focusing efforts from providing datasets and aggregate statistics to sophisticated visualization, advanced analytics, and wider dissemination of available data. This shift will result in CHS continuing to become the primary source of public health data and analytics across the Health and Human Services System and the state of Texas.

GOAL: 1 Preparedness and Prevention Services
 OBJECTIVE: 2 Infectious Disease Control, Prevention and Treatment Service Categories:
 STRATEGY: 1 Immunize Children and Adults in Texas Service: 23 Income: A.2 Age: B.3

CODE	DESCRIPTION	Exp 2019	Est 2020	Bud 2021	BL 2022	BL 2023
------	-------------	----------	----------	----------	---------	---------

Immunization services are authorized by HSC Chapters 12, 81, 161; TAC Chapters 21, 97, 100, 746; Education Code Chapters 38, 51; Human Resources Code Chapter 42; the Omnibus Budget Reconciliation Act of 1993; and the Federal Public Health Service Act (42 U.S.C. §247b). Services are provided to prevent, control, reduce and eliminate vaccine-preventable diseases in children and adults, with emphasis on children under 36 months of age. Required components of the federal grant include: program planning and evaluation; management of the immunization registry, ImmTrac2; quality assurance for providers enrolled in the Texas Vaccines for Children (TVFC) program; perinatal hepatitis B prevention; adolescent immunizations; adult immunizations; education, information, training and partnership; epidemiology and surveillance; population assessment activities such as monitoring school and day care compliance with the immunization requirements; and preparedness activities. Services also include accounting for vaccines distributed to clinics enrolled in the TVFC; educating providers with educational and promotional materials for parents, providers and the public; and assuring compliance with regulations for storing and handling vaccines by participating private providers' local health departments, or DSHS Public Health Region clinics. Immunization services and education are coordinated across HHS System programs such as Title V, HIV/STD, Breast and Cervical Cancer Services, WIC, Texas Health Steps, Health Emergency Preparedness and Response, and Emerging and Acute Infectious Diseases.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The program addresses state and federal mandates related to provider awareness, public education, the Texas Immunization Registry, school and day care immunization requirements, and the Texas Vaccines for Children program (TVFC). DSHS offers providers a choice of brands and presentation of vaccines available through the TVFC and Adult Safety Net Programs (ASN). Underinsured children may not have access to newer vaccines unless they qualify for services at a Federally Qualified Health Centers or Rural Health Clinics or an approved provider. The development of new vaccines and combinations of vaccines result in increased costs of vaccines. The numbers of private providers participating in vaccine administration has increased but more providers are needed. Many families still use public health facilities as their source of vaccinations; many rely on public health clinics, special immunization events, and school-based clinics for immunizations because they have no medical home. Past legislative changes require students entering institutions of higher learning to show proof of meningococcal vaccine within the past five years. Legislative changes extended the age to which a consented child's immunization must be maintained in ImmTrac2 from 18 to 26 years of age.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Chapters 81 & 85 HSC provide authority to establish and administer HIV/STD surveillance, prevention, and service programs and to educate the public about HIV/STD prevention. The DSHS HIV/STD Program administers the Texas HIV Medication Program which provides treatment medications to low income, uninsured or underinsured Texas residents. The program also provides STD treatment medications to eligible public health providers and administers locally delivered HIV treatment and prevention services. Treatment services focus on delivery of outpatient medical care to persons with HIV and related supportive services used to coordinate care. Prevention services focus on populations at high risk of acquiring or transmitting HIV/STD. These services include counseling and testing; linkage to treatment and care, and partner services/contact tracing for persons newly diagnosed with HIV/STD. The program also coordinates DSHS efforts to prevent viral hepatitis. The HIV/STD Epidemiology and Surveillance program analyzes and determines trends in the incidence and prevalence of HIV infection by age, gender, race, ethnicity, and transmission category. This program also provides annual projections of the number of HIV cases expected in Texas and epidemiologic analyses for use in planning, developing, and evaluating HIV-related programs and services.

CODE	DESCRIPTION	Exp 2019	Est 2020	Bud 2021	BL 2022	BL 2023
------	-------------	----------	----------	----------	---------	---------

The numbers of undiagnosed and untreated HIV, STD, and viral hepatitis cases make prevention and control difficult. Although treatment for these conditions have added decades of productive life for those living with these infections, medical treatment of HIV and viral hepatitis infection is complex and costly, and the rising costs of new medications and treatments coupled with the increasing number of persons who requires assistance with these services are an ongoing challenge. Treatment for viral hepatitis is difficult to access for Texans without insurance, as public funding for treatment is extremely limited. New treatments for hepatitis C can provide a functional cure but are expensive. Stigma, poverty, complex cultural differences in attitudes towards sexual and drug use behaviors, and co-occurring diagnoses of mental illness and addiction among populations most at risk for HIV/STD and viral hepatitis create barriers to delivering services and contribute to the spread of HIV/STD in many areas of the state. The Ryan White Part B grant requires the state to match \$1 in state contributions for every \$2 of federal expenditures. The state is also required to maintain a level of expenditures equal to not less than the level of such expenditures by the State for the one-year period preceding the fiscal year for which the State is applying to receive a grant under Part B.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Infectious disease surveillance and epidemiology play a vital role in defining, maintaining, and improving public health response to disasters, disease outbreaks that can reach pandemic potential such as COVID-19, healthcare-associated infections (HAIs) particularly in vulnerable populations, preventable adverse events (PAEs) and in creating plans for effective disease prevention. These are essential Public Health Services critical to the health/safety of communities, including disease prevention education, treatment information and options, public awareness campaigns, and surveillance of existing and emerging reportable infectious diseases such as COVID-19. To increase healthcare transparency, certain designated healthcare facilities report certain HAIs and PAEs that occur at their facility to DSHS, and DSHS publishes the results on a public website. Zoonotic disease control reduces incidence of animal diseases infecting humans by investigating diseases, distributing biological for human rabies exposure; inspecting rabies quarantine facilities and distributing oral rabies vaccine to wildlife to reduce human rabies exposure.

------	-------------	----------	----------	----------	---------	---------

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Emergence of new infectious diseases such as COVID-19, Zika, and Ebola, epidemics/outbreaks or natural disasters, such as hurricanes, affect this strategy. Increasing frequency of storm events and flooding require capacity for large scale mosquito control applications to assist response and recovery efforts.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Texas Health and Safety Code Chapter 81 provides authority to establish and administer a tuberculosis (TB) program to protect communities across Texas from the spread of TB by providing leadership, policy development to assure provision of coordinated care to persons with active TB disease, their close contacts and other persons at high risk for TB infection, and by assuring a system of care is in place to manage clients diagnosed with complicated TB disease. Texas Administrative Code Rule 97.3 cites Hansen’s disease as a notifiable condition. TB and Hansen’s disease surveillance, epidemiology, screening, diagnosis, treatment, case management and education are essential public health services critical to the safety of communities and reducing the impact of multi-drug and extensively drug-resistant TB as well as Hansen’s disease.

CODE	DESCRIPTION	Exp 2019	Est 2020	Bud 2021	BL 2022	BL 2023
------	-------------	----------	----------	----------	---------	---------

TB is an airborne disease and the number of undiagnosed persons with TB infection and TB disease challenge prevention and control efforts. Health care providers are not always aware of the signs and symptoms of TB disease resulting in delayed diagnosis. When this occurs, countless individuals are unknowingly exposed to TB. Early diagnosis significantly decreases the likelihood of an individual developing TB disease. Additionally, the increasing rates of persons with TB, diabetes, and other co-morbid conditions add layered complications to treatment. The rising costs of medications coupled with the number of persons requiring care are an ongoing challenge.

Hansen’s disease, also known as leprosy, is often misdiagnosed as a dermatologic condition, delaying diagnosis and contributing to the development of extensive disease. It is a disease affecting the skin and peripheral nerves. It is thought to be transmitted by nasal secretions from persons with untreated disease. Although the number of persons diagnosed with Hansen’s disease is relatively low, more than 60% of persons diagnosed require treatment for two years given the development of extensive disease.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Texas Center for Infectious Disease (TCID) provides inpatient services to treat patients with tuberculosis (TB) and outpatient services for individuals with Hansen's disease. Under Health and Safety Code, Chapter 13, DSHS has the authority to treat persons afflicted with other infectious and chronic respiratory diseases. TCID provides for more than one level of inpatient and outpatient care, education, and other services for patients with TB or Hansen's disease. The facility is Medicare certified and Joint Commission accredited. Patients are admitted by court order or clinical referral. Patients admitted to TCID require extensive lengths of stay that demand complex nutritional management, laboratory services, radiology monitoring and clinical support specialists including behavioral health management. Overall, this strategy contributes to the goal of quality, cost-effective access to health care services for persons with TB or Hansen's disease.

------	-------------	----------	----------	----------	---------	---------

TCID concentrates on the management of inpatient and outpatient care and services for primarily indigent patients, but also has a small percentage of patients that have health insurance. This is accomplished by direct care, coordination, cooperation and collaboration with other state and regional healthcare facilities including the public health regions. Agreements and contracts link TCID to other facilities in the state providing long-term TB and other infectious disease inpatient care and treatment. Physicians at TCID are contracted through UT Health North East in Tyler. Specialists are contracted through UT Medical San Antonio and emergency room services are provided through University Health System. TCID has other contracts in place for different services needed to provide comprehensive patient care required in the treatment of TB, including but not limited to, wound care specialty, ambulance services, psychiatric consultation, and recreational therapy.

STRATEGY DESCRIPTION AND JUSTIFICATION:

This strategy funds health promotion/wellness activities to reduce primary/secondary risk factors for common, chronic conditions presenting a burden on Texas resources. Initiatives include: educating healthcare systems, community leaders, early childhood centers, school systems and worksites on effective strategies to reduce risks for chronic diseases and child passenger injuries; training, and technical assistance to help communities develop plans and implement local policies; surveillance/monitoring; promoting proven clinical preventive/chronic care practices; identifying sustainable models for linking clients in clinical settings to community based services, child safety seats and seat check-ups; support of mandated statewide councils; and leadership for development and implementation of state agency model worksite wellness program.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

DSHS complies with Centers for Disease Control and Prevention guidance and standards for programs that address prevention and control of chronic conditions, such as obesity, cardiovascular disease and stroke, cancer, asthma, and diabetes. Community Diabetes Education Programs provide self-management education for persons with diabetes and lifestyle change classes related to nutrition and physical activity to reduce risk for type 2 diabetes and its complications. Safe Riders (child passenger safety) is funded through federal highway 402 funds (CFDA). Statewide councils/advisory boards provide systematic and regular stakeholder input for the development of plans, policies and strategies that assist DSHS and other agencies to address chronic conditions. Chronic disease prevention programs coordinate the planning and delivery of services around common goals and objectives, common risk factors, and common state and community partners. Numerous risk factor and demographic trends impact chronic disease prevention such as increases in obesity and hypertension.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Under the authority of Health and Safety Code Chapter 161, Subchapters N and O, Government Code 403.105-1069, and the Permanent Endowment for Tobacco Education and Enforcement, the program provides comprehensive tobacco prevention and control activities at various levels throughout the state. These activities include: community mobilization; tobacco prevention education in schools and communities; cessation activities through education and a statewide telephone and on-line counseling service; enforcement of federal tobacco laws and a mandated statewide tobacco awareness class for youth; public education; receiving and maintaining tobacco ingredient lists; surveillance of tobacco use by youth and adults; and evaluation of program outcomes. The program implements these functions through regional staff and contracts with local health departments, regional substance abuse prevention contractors, a national Quitline service provider for cessation services and state institutions of higher education for evaluation studies, statewide youth leadership initiatives, and enforcement activities.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Tobacco use is the number one preventable cause of death, yet 3 million adults and over 400,000 youth in Texas use tobacco products. Cancer, heart disease, stroke and emphysema are associated with tobacco use as well as complications that occur in persons with asthma or diabetes. Health care costs in Texas directly linked to smoking amount to \$4.6 billion annually with Medicaid covering \$1.26 billion of the cost. Long-term reduction in tobacco use is best achieved locally through coordination with community partners. Federal funding requires local activities and matching state dollars. The Texas program has CDC funds to provide telephone Quitline services.

STRATEGY DESCRIPTION AND JUSTIFICATION:

As required by the Health and Safety Code Chapters 12 (Laboratory Services), 33 (Newborn Screening), 161 (Lead), 435 (Milk), 826 (Quarantined Animals) and in support of federal programs such as the Safe Drinking Water Act, Maternal and Child Health, and Aid to Families with Dependent Children, the Laboratory Services Section provides an essential public health function through laboratory testing to diagnose and investigate community health problems and health hazards. Routine activities include: screening every newborn for 54 disorders, HIV, STD, and tuberculosis (TB) testing; lead screening in children; testing water and milk for contamination; and identifying organisms responsible for disease outbreaks throughout Texas. Services also include: clinical testing for patients of the Texas Center for Infectious Disease, and of the Rio Grande State Center Outpatient Clinic; tests for rare diseases or diseases requiring complex technology in microbiology; and environmental chemistry testing looking for contaminants in consumer products; providing testing for reference or legal purposes for state, local and federal health officials; and testing suspect food for agents or chemicals in food-borne outbreaks. The high volume of samples keep some testing costs low compared to private laboratories. Services help virtually every Texan, every health care program within DSHS and support other agencies' requirements for analytical services.

------	-------------	----------	----------	----------	---------	---------

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The DSHS Laboratory needs to stay scientifically current, maintain high quality in all aspects of the work, and respond to unpredictable infectious disease outbreaks and epidemics. Highly complex scientific and laboratory technology requires continual updating of equipment and staff training. The high volume of samples and rapidly changing technology require continual replacement of equipment to maintain accuracy at increased efficiency. Federal requirements have increased the number of chemicals for which drinking water must be tested. In addition to performing routine cultures for infection, all tuberculosis specimens are also tested for resistance to common medications. The potential for newly recognized or emerging diseases such as Zika, Ebola, COVID-19 (the novel coronavirus) or MERS-CoV and pandemic influenza, add to the variety of diseases for which surveillance and testing must be performed. The newborn screening program adds new tests from the federal Recommended Uniform Screening Panel (RUSP) to Texas' newborn screening panel, as funding allows. The potential increase in bioterrorism and food-borne outbreaks has increased the demand and frequency for chemical and microbiological analysis of foods and samples of unknown origin. The Laboratory is the primary EPA-approved laboratory in Texas for analysis of drinking water samples.

The Title V Maternal and Child Health program develops, disseminates, and implements statewide systems of care for expectant mothers, infants, children, and adolescents via data-driven, evidence-based initiatives that focus on: reducing maternal mortality and morbidity; reducing infant mortality; child fatality review and injury prevention; newborn screening care coordination; newborn hearing screens; vision and spinal screening; oral health surveillance; improving adolescent health; and school-based health centers. Through the statewide needs assessment process, this program establishes state and federal performance goals and addresses systemic improvement in public health outcomes. Additionally, this strategy supports the regional staff that provide case management and provider relations support to the Texas Health Steps Children’s Medicaid program administered by HHSC. The strategy serves as a pass-thru for federal rape prevention education funding to the state Attorney General’s Office.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Title V of the Social Security Act directs and provides funds to support public health initiatives to women and children through the Maternal and Child Health Block Grant (MCHBG) and matching state maintenance of effort (MOE). The state is required to spend no less than 30% of the block grant on the child/adolescent population. General Revenue appropriated to this strategy counts as part of the required \$40.2M annual MOE expenditure. The program is also affected by changes in community delivery systems, such as managed care, as well as the impact of any changes in Medicaid eligibility and enrollment.

------	-------------	----------	----------	----------	---------	---------

STRATEGY DESCRIPTION AND JUSTIFICATION:

Health and Safety Code, Chapter 35, authorizes DSHS to fund supports and public health population- based efforts for children with special health care needs (CSHCN). On behalf of the CSHCN Services Program (CSHCN-SP) that transferred to HHSC in FY17, DSHS regional staff provide program eligibility determination and case management, a mandated service, which includes information and referral, individual needs assessment and service plans, and coordination of services for children in the services program and on the waiting list. This strategy supports population-based intra and inter- agency efforts to improve systems of care for these children at state, regional, and local levels. In CSHCN Systems Development, the population-based public health component implements statewide systems of care for children with special health care needs via data-driven, evidence-informed initiatives that focus on increasing access to medical homes, increasing the number of youth with special health care needs who transition to adulthood, and promoting efforts that ensure children with special health care needs and their families are included and participate meaningfully in their communities.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Title V of the Social Security Act directs and provides funds to support an array of safety net services and public health initiatives to children with special healthcare needs through the Maternal and Child Health Block Grant and matching state maintenance of effort (MOE). The state is required to spend no less than 30% of the block grant on the CSHCN population. General Revenue appropriated to this strategy counts as part of the required \$40.2M annual MOE expenditure. The block grant requires a state-wide comprehensive health needs assessment every five years with interim assessments annually. The program addresses identified health needs by promoting and implementing best practice approaches to improving the health and well-being of children and youth with special healthcare needs.

------	-------------	----------	----------	----------	---------	---------

Chapter 773 of the Health and Safety Code directs DSHS to develop a statewide emergency medical services (EMS) and trauma care system which is fully coordinated with all EMS providers and hospitals, including pediatric emergency services. The purpose of this program is to decrease morbidity and mortality due to emergency health care situations, particularly injuries. The program includes oversight and system integration of EMS personnel and providers; designation of four levels of trauma facilities, three levels of stroke facility designation; regional EMS/trauma system planning, development, and designation; the Medical Advisory Board; and the assurance of coordination and cooperation between contiguous states. Additionally, it provides funding for EMS providers, first responder organizations, trauma systems Regional Advisory Councils, and hospitals. Chapter 773 of the Health and Safety Code also requires DSHS to construct an emergency treatment system to quickly identify and transport stroke victims to appropriate stroke treatment facilities. The stroke program also includes regional EMS/stroke system planning and development. The program administers three additional designation programs: Neonatal, Maternal and Centers of Excellence for Fetal Diagnosis and Therapy. This strategy contributes to the statewide goal of promoting the health and safety of Texans by improving the quality of emergency health care services.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

DSHS has worked to develop regionalized systems of emergency health care that coordinate public and private resources to promote optimal outcomes for trauma and stroke patients. Pre-hospital EMS is not considered an essential service; therefore, no governmental entity is required to assure its availability. Texas has a “patchwork” system of EMS providers (i.e. volunteer, county, private, etc.). Due to aging EMS personnel, difficulty in recruitment and retention, and decreasing EMS volunteerism, many rural communities have little or no pre-hospital services. In addition, hospitals continue to face budget constraints and must compete for funded patients, resulting in the closure of many hospitals. Hospitals must also confront the challenge of obtaining and maintaining required physician services in specialties such as neurosurgery, to seek or maintain designation as a trauma and/or stroke facility. Both programs have demonstrated the ability to dramatically improve the outcomes of critical injured or acutely ill patients.

STRATEGY DESCRIPTION AND JUSTIFICATION:

This strategy provides funding for the Texas Primary Care Office. The Primary Care Office activities include: assessing the need for health care; designating parts of the state as health professional shortage areas; recruiting and retaining providers to work in underserved areas through the J-1 Visa Waiver program; identifying areas of the state that are medically underserved; and providing technical assistance to communities to improve access to primary medical/dental/mental health care, under the authority of the Federal Public Health Services Act, 42 U.S. Code Part D - Primary Health Care §254 b-m.

CODE	DESCRIPTION	Exp 2019	Est 2020	Bud 2021	BL 2022	BL 2023
------	-------------	----------	----------	----------	---------	---------

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

DSHS activities, including measuring and improving access to health care, will be impacted by changes at the federal level. The method for designation of Health Professional Shortage Areas and Medically Underserved Areas will be finalized at the federal level based on recommendations by a negotiated rulemaking committee. Funding for the National Health Service Corps, a scholarship and loan repayment incentive for health providers working in shortage areas, and the Conrad 30 J-1 Visa Waiver program, which allows foreign-born medical doctors to remain in the United States after training, may change at the federal level.

STRATEGY DESCRIPTION AND JUSTIFICATION:

This strategy is responsible for the protection of public health and safety through licensure, inspection, and regulation of food and drug manufacturers; processors; wholesale distributors; consumable hemp manufactures and retailers; food management handler training programs; seafood and aquatic life; meat and poultry slaughterers; meat and poultry processors; milk and dairy products producers; certificates of free sale; tattoo and body piercing studios; medical device manufacturers; and retailers of foods, drugs, and medical devices to ensure that these products are safe, properly labeled, and accurately presented for public consumption and use. Specific authorization can be found in Chapters 145 and 146, 431 through 440, and 443 of the Health and Safety Code.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Food-borne disease outbreaks associated with the contamination of foods by pathogenic microorganisms have contributed to thousands of injuries and deaths nationwide, including Texas. Chemical contamination of state waterways, as well as other areas located adjacent to EPA superfund sites and chemical and industrial processing plants, underscores the critical need for active surveillance systems. There continues to be a need for recalls of imports, including foreign-produced foods, drugs and biologics with various types of contamination that have entered domestic commerce and caused many illnesses and deaths. Due to the continuing population growth in Texas, the number of individuals/entities that must be licensed and monitored for compliance is increasing.

STRATEGY DESCRIPTION AND JUSTIFICATION:

DSHS protects public health and safety through licensure, inspection, and regulation of asbestos, lead-based paints, hazardous products, abuseable volatile chemicals, community sanitation, youth camps and other agents (Chapters 1954 and 1955 Occupations Code; Chapters 143, 385, 505, 506 and 507, Health and Safety Code). This is achieved through various means including licensing, inspection, investigation, collection and dissemination of data, enforcement, and consultation. In addition, environmental health and safety is monitored and improved in schools, youth camps, public swimming pools and public lodging facilities (Chapters 141 and 341, Health and Safety Code). This strategy reduces the risk of illness, injury or death resulting from the use of consumer and industrial products and critical environments.

537 State Health Services, Department of

GOAL: 3 Consumer Protection Services
 OBJECTIVE: 1 Provide Licensing and Regulatory Compliance Service Categories:
 STRATEGY: 2 Environmental Health Service: 17 Income: A.2 Age: B.3

CODE	DESCRIPTION	Exp 2019	Est 2020	Bud 2021	BL 2022	BL 2023
------	-------------	----------	----------	----------	---------	---------

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Limited federal enforcement is done for asbestos-related activities, and DSHS has the delegated responsibility for National Emission Standards for Hazardous Air Pollutants (NESHAPS). DSHS provides the public with additional oversight through inspection and enforcement activities which reduces the public's exposure to asbestos fibers in commercial and governmental buildings. Lead paint abatement businesses are regulated by DSHS to ensure the safety of homeowners, children, and workers. Decreases in local funding for community environmental sanitation services will proportionally increase DSHS' responsibility to deliver those services to the public. The delivery of these services is becoming more difficult due to limited state funding and population growth in Texas.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Under Chapter 401 of the Health and Safety Code, the radiation control program is directed to ensure the regulation of all sources of radiation. DSHS accomplishes this by regulating both the sources and users of radiation to assure protection of workers and the public from unnecessary exposure. The program also ensures compatibility with federal programs regulating radioactive materials and mammography. The program is responsible for assuring that industrial radiographers, radioactive materials, x-ray machines, mammography units, and lasers used in medical, industrial and research facilities, along with technicians and facilities where these devices are used, comply with all State and federal health and safety requirements. Staff monitor facilities to verify compliance with radiation exposure standards, and collect environmental samples to determine the concentration of radioactive materials. The program also heads the department's activities as the lead agency for radiological emergency response and conducts joint emergency preparedness planning with nuclear power plants and radioactive waste storage facilities. Staff respond to incidents or complaints that involve sources of radiation or the unauthorized release of radioactive materials to the environment and participate in nuclear power plant emergency drills and exercises.

------	-------------	----------	----------	----------	---------	---------

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

No comparable federal program exists for regulating the users of x-ray machines, non-ionizing sources of radiation, or naturally occurring radioactive material. DSHS must remain compatible with the requirements of the U.S. Nuclear Regulatory Commission (NRC) for the radioactive materials program, which was delegated to DSHS via an agreement signed by the Governor in 1964. Under Texas' Agreement with NRC, inspection intervals for radioactive material licensees must be at least as frequent as those of the NRC. The NRC determines if the program is adequate to protect public health and is compatible with federal standards. The U.S. Food and Drug Administration establishes inspection intervals for mammography inspections. The Texas Health and Safety Code requires x-ray and laser registration and inspections. The inspection frequencies are established by rule, and are determined by the relative risk ranking of the modality as required by Chapter 401 of the Texas Health and Safety Code. Due to the continuing population growth, the number of individuals/entities that must be licensed and monitored for compliance is increasing.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Texas.Gov establishes a common electronic infrastructure for Texans, state agencies and local governments to register and renew some of the Consumer Protection program's licenses. In accordance with statutory authorization §2054.252 of the Texas Government Code, the department is permitted an increase to the occupational license, permit, and registration fees imposed on licensees by an amount sufficient to cover the cost of the subscription fee charged by the Texas.Gov Authority for implementing and maintaining electronic services.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The external factors impacting the strategy are the number of licenses using Texas.Gov.

FULL TIME EQUIVALENT POSITIONS:

STRATEGY DESCRIPTION AND JUSTIFICATION:

The data center services (DCS) and seat management strategy funds activities related to a managed desktop computing environment and data center providing services for the agency. Data center services, in alignment with the Department of Information Resources, provides for disaster recovery, servers, data storage, management, and data center print/mail. Data center services includes transforming agency data to state data centers; upgrades to current technology, including server hardware and software, in a controlled and documented environment; integrated DCS private community cloud with public government cloud options in the consolidated data centers; server storage and consolidation; network management of state data centers; and computing device and server software. DSHS provides a seat managed solution for computing devices and desktop software. The seat managed solution provides desktops, laptops, and tablets along with the break/fix and time/materials for the devices.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Every agency business area and strategy depends on electronic information, and must have both a storage and processing mechanism for that information. Because of the relationship between this and DSHS' other strategies, any change in funding for this strategy will affect the performance of the agency's other strategies. The business areas would provide slower service to their customers, complete fewer units of work, collect and consider less detail, and eliminate some activities altogether. Since Information Technology is a consolidated function at HHSC, DSHS's seat management is obtained under the HHSC contract.

STRATEGY DESCRIPTION AND JUSTIFICATION:

Central Administration provides support on an agency-wide basis to all Department of State Health Services (DSHS) programs. This includes directing and managing agency-wide operations, establishing and administering overall DSHS policy, and directing and managing business and fiscal operations of DSHS. This strategy includes Offices of the DSHS Commissioner, Deputy Commissioner, Assistant Deputy Commissioner, Chief Financial Officer, and Associate Commissioner for Program Operations. Functions reporting to the Deputy Commissioner include media relations, government affairs, executive operations, and stakeholder relations. Functions reporting to the Assistant Deputy Commissioner covered in this strategy include healthcare policy, Health Information Technology policy and healthcare quality and economics. Functions reporting to the Associate Commissioner for Program Operations include business support and planning, contract management, and fiscal monitoring.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The amount of funding appropriated to the Central Administration strategy directly affects the outcomes and outputs listed in the agency's other strategies. This strategy includes those administrative costs which are both common for a large state agency and those unique to DSHS. Because of the relationship between this and DSHS' other strategies, any change in funding for this strategy will affect the performance of the agency's other strategies.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Information Resources (IR) strategy funds activities related to Information Technology Systems, which support the automation and management of information resources throughout DSHS. Chapter 201 of Title 1 of the Texas Administrative Code, Planning and Management of Information Resources Technologies governs Information Resources planning and management. Information Technology is responsible for enhancing and managing the technology infrastructure and developing and supporting application systems. Information Technology provides many services including project management, application development and support, network management and operational support, help desk, information security, quality assurance, and planning services, and IR procurement review. Information Technology staff are allocated to support the technology infrastructure consisting of local area networks (LANs) systems connected via a wide area network (WAN) accessed from a number of campuses in Austin, regional offices and sub-offices throughout Texas. The LAN systems are connected to desktops throughout DSHS. Another major support function provided by Information Technology is the installation and support of the office productivity software as well as certain specialized software required to meet program needs.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

Every strategy depends on information, and expends time and effort managing information. Any reduction in funding for this strategy will restrict the results most other strategies are able to achieve. The program strategies would provide slower service to their customers, complete fewer units of work, collect and consider less detail, and eliminate some activities altogether. This strategy funds IT, which is a consolidated function at HHSC.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Other Support Services Strategy includes operational support activities such as facilities management, mail distribution and services, management and maintenance of physical assets and material resources.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

The amount of funds appropriated to the Other Support Services Strategy directly affects the outcomes and outputs listed in the agency's other strategies . This strategy includes those administrative costs which are both common for a large state agency and those unique to DSHS . Because of the relationship between this and the department's other strategies, any change in funding for this strategy will affect the performance of the agency's other strategies .

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Regional Administration Strategy provides infrastructure support for the eight Public Health Regional offices in Arlington (Abilene), El Paso (Midland), Harlingen, Houston, Lubbock, San Antonio, Temple and Tyler. This strategy funds telephones, IT and other administration costs for the regional offices. Each regional office has a team that provides coordinated support to program staff conducting activities to protect and improve public health and serving as the local health department in those areas where there is none.

Program Prioritization: Indicate the methodology or approach taken by the agency, court, or institution to determine the ranking of each program by priority.

A weighted criteria was used to prioritize programs based on several metrics. The metrics are not discrete and most programs included multiple metrics.

- Public Health Infrastructure- The program is vital to the infrastructure of public health in Texas.
- Safety Net-The program serves a function that is not provided by other entities.
- Short-term Live Savings- The program can improve health and save lives in the short-term.
- Long-term Live Savings- The program can improve health and save lives in the long-term.
- Business Economy- The program supports businesses and the economy.
- Cost Recovery/Revenue- The program's functions generate revenue.
- Federal Dollars- The program receives sizeable federal funds compared to the general revenue.

3.B. Rider Revisions and Additions Request (continued)

		<p>b. Appropriations made herein are contingent upon DSHS assessing fees sufficient to generate revenue to cover the General Revenue appropriations for these programs as well as the related "other direct and indirect costs." In the event that actual and/or projected revenue collections are insufficient to offset the costs identified by this provision, the Legislative Budget Board may direct the Comptroller of Public Accounts to reduce the appropriation authority provided above to be within the amount of revenue expected to be available.</p> <p><i>Updated years.</i></p>
4	II-26	<p>Immunization of Employees. Monies appropriated above to the Department of State Health Services may be expended for any immunization which is required of employees at risk in the performance of their duties.</p>
5	II-26	<p>Texas.Gov Authority Appropriation.</p> <p>a. The Department of State Health Services (DSHS) is authorized in accordance with §2054.252 of the Government Code to increase the occupational license, permit, and registration fees imposed on licensees by an amount sufficient to cover the cost of the subscription fee charged by the Texas.Gov Authority.</p> <p>b. Amounts appropriated above to DSHS include \$701,301 in fiscal year 20202 and \$701,299 in fiscal year 20243 in revenue collected for license and certification fees in Strategy C.1.4, Texas.Gov, for the purpose of paying Texas.Gov subscription fees.</p> <p>c. In the event that actual and/or projected revenue collections from fee increases to cover the cost of Texas.Gov subscription fees are insufficient to offset the costs identified above, the Comptroller is hereby directed to reduce the appropriation authority provided by this Act to DSHS to be within the amount of fee revenue expected to be available.</p> <p>d. For new licensing applications, DSHS is hereby appropriated the additional revenue generated from occupational license, permit, or registration fees in excess of the Comptroller's biennial revenue estimate for the 2020-21 2022-23 biennium for the sole purpose of payment to the Texas.Gov Authority contractor of subscription fees for implementing and maintaining electronic services for the department. DSHS, upon completion of necessary actions to access or increase fees, shall furnish an annual schedule of the number of license issuances or renewals and associated annual fee total, and any other supporting documentation to the Comptroller and the Legislative Budget Board. If the Comptroller finds the information sufficient to support the projection of increased revenues, a notification letter will be issued, and the contingent appropriation made available for the intended purposes.</p> <p>e. DSHS shall notify the Legislative Budget Board and the Comptroller of Public Accounts in writing upon receiving an exemption from participating in Texas.Gov. Within 45 days of receiving an exemption, DSHS shall provide the Legislative Budget Board and the Comptroller with a report of the effective date, the reason for exemption, and all estimated expenditures for Texas.Gov costs in the fiscal year in which the exemption is made.</p> <p><i>Updated years.</i></p>
6	II-27	<p>Limitation: Use of General Revenue Associated with Maintenance of Effort. The Department of State Health Services (DSHS) may change the allocation of General Revenue associated with</p>

3.B. Rider Revisions and Additions Request (continued)

		<p>Maintenance of Efforts (MOEs) for the Maternal and Child Health Services block grant from amounts specified above, contingent upon submission and approval of a written request to the Legislative Budget Board and the Governor. The request shall include the following information:</p> <p>a. a detailed explanation of the need for reclassification of the funds; and</p> <p>b. the impact the reclassification will have on current and future MOE requirements.</p> <p>DSHS is also directed to provide annual federal reports associated with the MOEs for the aforementioned block grants to the Legislative Budget Board and the Governor.</p> <p>Further, DSHS shall not take action or inaction to increase the state's MOE requirement for any federal grant without prior approval of the Legislative Budget Board and the Governor.</p> <p><i>Requested deletion. The MOE for the Maternal and Child Health Services Block Grant is a set annual amount \$40.2m based on expenditures in 1989. The MOE cannot be decreased per the Social Security Act that funds the MCHBG. DSHS does not report any available MOE above the \$40.2m that is required and is split between DSHS and HHSC. The full amount must be expended annually regardless of the amount of federal funds awarded or expended. Additionally, Rider 14, Other Reporting Requirements, requires submission of state plan amendments and waivers related to Title V as well.</i></p>
7	II-27	<p>Purchase of Pandemic Flu Vaccines.</p> <p>Out of funds appropriated above in Strategy A.2.1, Immunize Children and Adults in Texas, the Department of State Health Services (DSHS) shall examine the latest generation of cell culture-derived <u>pandemic flu vaccines that allow Texas to be prepared to respond to pandemics, epidemics, and large-scale outbreaks affecting or that are expected to affect large number of Texans.</u> DSHS is strongly encouraged to consider purchasing the latest generation of cell culture-derived <u>pandemic flu vaccines, and other vaccines to respond to pandemics,</u> that is are available out of state, federal, or other funds.</p> <p><i>DSHS does not regularly purchase pandemic flu vaccines. The last flu pandemic was the 2009-2010 H1N1 Pandemic. However, as the stockpile expires, DSHS will seek support to maintain the state antiviral stockpile. The rider is still necessary to allow DSHS to purchase other vaccines, such as a vaccine for COVID19 or other pandemics.</i></p>
8	II-27	<p>Regulation of Outsourcing Facilities.</p> <p>Out of funds appropriated above in Strategy C.1.1, Food (Meat) and Drug Safety, the Department of State Health Services shall allocate 1.0 FTE and \$136,135 in General Revenue each fiscal year to be used only to follow applicable law and regulate Section 503B of the Federal Food Drug and Cosmetic Act regarding Outsourcing Facilities.</p> <p><i>Requested deletion. The FTE and program are in place and the number of 503Bs are minimal.</i></p>
9	II-27	<p>Collection of Emergency Room Data.</p> <p>Out of funds appropriated in Strategy A.1.5, Health Data and Statistics, the Department of State Health Services (DSHS) shall collect emergency room data as set forth in Chapter 108 of the Health and Safety Code. DSHS shall use the data to measure and report potentially preventable avoidable emergency room visits, including potentially</p>

3.B. Rider Revisions and Additions Request (continued)

		<p>preventable mental health and substance abuse emergency room visits. DSHS shall submit the results of their findings to the Legislative Budget Board, Governor, Chairs of the Committees in each House with jurisdiction over public health issues, and the Statewide Behavioral Health Coordinating Council on an biennial <u>annual</u> basis on or before December 31, 2023.</p> <p><i>Potentially preventable emergency room visits are calculated using a specific 3M proprietary algorithm which DSHS cannot use as not all the needed data are collected. Instead, DSHS has used definitions to identify "avoidable" ED visits using specific diagnostic codes. Reports of ED visits do not change substantially on an annual basis and a less frequent report is better suited to show changes across time.</i></p>
10	II-27	<p>Appropriation: Contingent Revenue.</p> <p>The Department of State Health Services (DSHS) is appropriated for the purposes identified below any additional revenue generated by DSHS above the amounts identified in fiscal year 2020 <u>2022</u> or fiscal year 2024 <u>2023</u> in the Comptroller of Public Account's Biennial Revenue Estimate (BRE) for each of the accounts or revenue object identified below. An appropriation from an account or revenue object shall be made available to DSHS once certified by a Comptroller's finding of fact that the amount in the BRE for the account or revenue object for the given fiscal year has been exceeded. An appropriation is limited to revenue generated in fiscal year 2020 <u>2022</u> or fiscal year 2024 <u>2023</u> and does not include any balances that have accrued in the account or revenue object code.</p> <p>By March 1st of each year, DSHS may notify the Comptroller of Public Accounts, the Legislative Budget Board, and the Governor of the amount that DSHS projects will be received in excess of the amounts contained in the BRE for each of the accounts listed below, along with sufficient information to reflect how the estimate was determined. If the Comptroller finds the information sufficient to support the projection of additional revenue, a finding of fact to that effect shall be issued to reflect the additional revenue available for each account.</p> <ul style="list-style-type: none"> a. Account No. 341, Food and Drug Retail Fees, for restaurant inspections. b. Revenue Object 3175, Account No. 5017, Asbestos Removal Licensure, for asbestos inspections and regulatory activities. c. Account No. 5021, Certification of Mammography Systems, for the purpose of certification of mammography facilities. d. Account No. 5024, Food and Drug Registration Fees, for food and drug inspections. e. Account No. 5022, Oyster Sales, for oyster plant inspections. f. Revenue Object 3589 in the General Revenue Fund for Radiation Control regulatory activities. g. Revenue Objects 3123, 3555, and 3573 in the General Revenue Fund for environmental regulation. h. Account No. <u>00</u>19, Vital Statistics, for processing birth and death certificates and other vital records. i. Account No. 512, Bureau of Emergency Management, for licensing Emergency Medical Services personnel and providers.

3.B. Rider Revisions and Additions Request (continued)

		<p>j. Account No. 524, Department of Health Public Health Services Fee for Laboratory activities.</p> <p>k. <u>Revenue Object 3554 in the General Revenue Fund for Consumable Hemp Products.</u></p> <p><u>Contingent on the Comptroller of Public Accounts submitting a finding of fact related to subsection k, the Department of State Health Services Full Time Equivalents (FTE) cap is increased by 1.5 FTEs per additional \$100,000 annually. The increase will be for each fiscal year in which the increased revenue occurs.</u></p> <p><i>Updated years and added the revenue object code for consumable hemp products. The revenue from the products would fund the program. Added a section to increase FTEs with the additional hemp program revenue to support program activities. FTEs would be increased at a rate of 1.5 FTEs per \$100,000 annually.</i></p>
11	II-28	<p>Cardiovascular Disease.</p> <p>Out of funds appropriated above in Strategy A.3.1, Chronic Disease Prevention, the Department of State Health Services may expend \$514,013 in General Revenue Funds over the 2020-21 <u>2022-23</u> biennium for the Stroke/SEMI (St-Segment Elevation Myocardial Infarction) Data Collection for data collection activities.</p> <p><i>Updated years.</i></p>
12	II-28	<p>Estimated Appropriations: Perpetual Care Account.</p> <p>In the event of an incident involving the release of or abandonment of radioactive material and/or contaminated facilities in Texas under the jurisdiction of the Department of State Health Services (DSHS) or the abandonment of mammography films by a facility registered by DSHS and after receiving the written approval of the Legislative Budget Board (LBB) and the Governor and DSHS notifying the Comptroller of Public Accounts, DSHS is appropriated any revenues from DSHS licensees, including the proceeds of securities and interest earned, deposited to the credit of the General Revenue- Dedicated Perpetual Care Account No. 5096, pursuant to Health and Safety Code §401.305 (b) and §401.301 (d) during the biennium beginning September 1, 2019 <u>2021</u> (estimated to be \$6,579,788). Amounts that exceed \$100,000 are subject to the prior written approval of the LBB and the Governor. Transfers below these thresholds require written notification to the LBB and Governor within 30 days and a report on transfers of all amounts should be submitted to the LBB annually. Upon approval or notification, DSHS shall coordinate with the Comptroller of Public Accounts.</p> <p>Any unexpended balances from amounts approved by the LBB and the Governor remaining as of August 31, 2019 is appropriated to the agency for the fiscal year beginning September 1, 2019 <u>2021</u> for the same purpose, subject to the department notifying the Comptroller of Public Accounts, the Legislative Budget Board and the Governor in writing at least 30 days prior to budgeting and expending these balances.</p> <p>The funds shall be used in Strategy C.1.3, Radiation Control, to mitigate radioactive contamination or abandoned radioactive sources resulting from activities of a DSHS licensee or unlicensed entity or a mammography registrant as provided in the Health and Safety Code, §401.305 (c) - (d), and pursuant to a memorandum of understanding with the Texas Commission on Environmental Quality relating to the regulations for the control of radiation as applicable.</p> <p><i>Updated years.</i></p>

3.B. Rider Revisions and Additions Request (continued)

13	II-29	<p>Limitation: Transfer Authority.</p> <p>a. Notification Regarding Transfers. Authority provided in Article IX, Sec. 14.01, Appropriation Transfers, is contingent upon a written notification from Department of State Health Services (DSHS) to the Legislative Budget Board and the Governor at least 30 days prior to the transfer, which includes the following information:</p> <p>(1) a detailed explanation of the purpose(s) of the transfer and whether the expenditure will be one-time or ongoing;</p> <p>(2) the name of the originating and receiving strategies and the method of financing and FTEs for each strategy by fiscal year;</p> <p>(3) an estimate of performance levels and, where relevant, a comparison to targets included in this Act for both the originating and the receiving strategies; and</p> <p>(4) the capital budget impact.</p> <p>b. Transfers that Require Prior Approval. Transfers to Strategies in Goal E, Indirect Administration, from Strategies in other DSHS goals are not permitted without prior written approval. To request approval the agency shall provide the information listed under section (a) to the Legislative Budget Board and the Governor. At the same time, the agency shall provide a copy of the request to the Comptroller of Public Accounts.</p> <p>c. Cost Pools. Notwithstanding the above limitations, transfers may be made from the appropriation items in section (a) to separate accounts authorized by agency rider and established by the State Comptroller for payment of certain support costs not directly attributable to a single program.</p> <p>d. Cash Management. Notwithstanding the above limitations, DSHS may temporarily utilize funds for cash flow purposes. All funding used in this manner shall be promptly returned to the originating strategy on or before August 31, 2024³. This authorization is subject to limitations established by the Comptroller of Public Accounts.</p> <p>The Comptroller of Public Accounts shall not allow the transfer of funds authorized by any of the above subsections if the Legislative Budget Board provides notification to the Comptroller of Public Accounts that the requirements of this provision have not been satisfied.</p> <p>In the case of disaster or other emergency, this provision is superseded by the emergency-related transfer authority in Article IX of this Act.</p> <p><i>Updated year.</i></p>
14	II-29	<p>Other Reporting Requirements.</p> <p>a. Federal Reports. The Department of State Health Services (DSHS) shall submit the following information to the Legislative Budget Board and the Governor no later than the date the respective report is submitted to the federal government:</p>

3.B. Rider Revisions and Additions Request (continued)

		<p>(1) Notification of proposed State Plan amendments and waivers for the Maternal and Child Health Block Grant (Title V of the Social Security Act) and any other federal grant requiring a state plan, including, federal petition disapprovals, expenditure reports, and cost allocation revisions and any loss of federal funding due to noncompliance with federal regulations. State Plan amendments and waiver submissions shall also be provided to the Senate Health and Human Services, House Human Services, and House Public Health committees.</p> <p>(2) A copy of each report or petition submitted to the federal government relating to the grants and programs noted above under section a(l).</p> <p>b. Federal Issues. DSHS shall notify the Legislative Budget Board and the Governor on a timely basis about emerging issues that could result in the loss of more than \$1,000,000 in federal revenue assumed in the appropriations act.</p> <p>c. Monthly Financial Reports. DSHS shall submit the following information to the Legislative Budget Board and the Governor, and make available to the public, on a monthly basis:</p> <p>(1) Information on appropriated, budgeted, expended, and projected funds, by strategy and method of finance.</p> <p>(2) Narrative explanations of significant budget adjustments, ongoing budget issues, and others as appropriate.</p> <p>(3) Collections, expenditures, and balances for revenues generated by the department as of the last day of the prior month.</p> <p>(4) Capital budget items, including increases to existing projects and creation of new projects.</p> <p>(5) Any other information requested by the Legislative Budget Board or the Governor.</p> <p>d. The monthly financial reports shall be prepared in a format specified by the Legislative Budget Board.</p> <p>e. Fees. DSHS shall review all of the fee schedules within its authority on an annual basis and update to cover direct and indirect costs of program operations. DSHS shall provide a copy of the report to the Legislative Budget Board and the Governor no later than January 1 of each year of the biennium. The report should include any fee adjustments, rationale and methodology for the change, revenue estimates by each fiscal year, details and justification for direct and indirect costs.</p>
15	II-30	<p>Reimbursement of Advisory Committee Members. Pursuant to Government Code §2110.004, or the statute authorizing the specific committee for those committees not subject to Government Code §2110.004, reimbursement of expenses for advisory committee members, out of funds appropriated above not to exceed \$210,000 per fiscal year, is limited to the following advisory committees: Medical Advisory Board, State Child Fatality Review Team Committee, Stock Epinephrine Advisory Committee, Texas Radiation Advisory Board, Preparedness Coordinating Council, Governor's Emergency Medical Services and Trauma Advisory Council, Statewide Health Coordinating Council, Texas Council on Alzheimer's Disease and Related Disorders, Texas Council on Cardiovascular Disease and Stroke, and Texas Diabetes Council, <u>and Sickle Cell Task Force.</u></p>

3.B. Rider Revisions and Additions Request (continued)

		<p>Pursuant to Government Code §2110.004, or the statute authorizing the specific committee for those committees not subject to Government Code §2110.004, reimbursement of expenses for advisory committee members, out of funds appropriated above, is limited to any advisory committee member who represents either the general public or consumer on the following advisory committees: Texas HIV Medication Advisory Committee, Promotora Community Health Worker Training and Certification Committee, Healthcare Safety Advisory Committee, and School Health Advisory Committee, and Newborn Screening Advisory Committee.</p> <p>To the maximum extent possible, the Department of State Health Services shall encourage the use of videoconferencing and teleconferencing and shall schedule meetings and locations to facilitate the travel of participants so that they may return the same day and reduce the need to reimburse members for overnight stays.</p> <p><i>Updated advisory committees.</i></p>
16	II-30	<p>Nuisance Surveys for the Economically Disadvantaged Communities Program. The Texas Commission on Environmental Quality (TCEQ) and the Water Development Board (WDB) shall reimburse the Department of State Health Services (DSHS) for costs incurred by the agency in conducting nuisance surveys for applicants for financial assistance through the Economically Disadvantaged Communities program administered by the WDB. TCEQ and WDB shall each reimburse such costs through Interagency Contracts with DSHS in an amount not to exceed a total of \$125,000 per agency for the biennium beginning on September 1, 2019 <u>2021</u> .</p> <p><i>Updated year.</i></p>
17	II-30	<p>School Cafeteria Inspections. Amounts appropriated above to the Department of State Health Services in Strategy C.1.1, Food (Meat) and Drug Safety include fee revenue (General Revenue) estimated to be \$350,000 in fiscal year 2020 <u>2022</u> and \$350,000 in fiscal year 2021 <u>2023</u> from school districts for the purpose of conducting inspections of school cafeterias to achieve compliance with federal regulations issued pursuant to Section 402 of Public Law 296, 124 Stat. 3259 (Healthy, Hunger- Free Kids Act of 2010).</p> <p><i>Updated years.</i></p>
18	II-31	<p>Tobacco Prevention Funding. Out of funds appropriated above in Strategy A.3.2, Reduce Use of Tobacco Products, funds provided for activities targeting prevention of youth experimentation with nicotine-containing products shall only be expended on evidence-based and promising practices.</p>
19	II-31	<p>Local Health Department Performance Measures. Out of funds appropriated above, the Department of State Health Services (DSHS) shall coordinate with the Public Health Funding and Policy Committee to submit a report on high priority performance measures and attainment by local health departments (LHDs) who receive state-funded grants from DSHS. The report shall be submitted to the Governor, Lieutenant Governor, Speaker of the House, Legislative Budget Board, Senate Finance Committee, House Appropriations Committee, and the permanent standing committees in the Senate and the House with primary jurisdiction over health and human services no later than November 1, 2020.</p>

3.B. Rider Revisions and Additions Request (continued)

		<i>Request deletion. All DSHS contracts have performance measures associated with them. They are standard practice. The measures vary based on the contract purpose, whether funding sources are blended (federal requirements) or the disease/condition/service they are addressing. There is no single contract which every local health department receives.</i>
20	II-31	Emerging and Neglected Tropical Diseases Sentinel Surveillance. Out of funds appropriated above in Strategy A.2.3, Infectious Disease Prevention, Epidemiology, and Surveillance, the Department of State Health Services shall allocate \$300,000 in General Revenue in each fiscal year to implement a sentinel surveillance program to monitor emerging and neglected tropical diseases, as outlined in Health and Safety Code, Chapter 100.
21	II-31	State Health Care Facility Provisions. Out of funds appropriated above in Strategy A.2.5, TX Center for Infectious Disease, the Texas Center for Infectious Disease shall provide utilities and inpatient treatment and care services to the San Antonio State Hospital and the San Antonio State School without reimbursement. Third party collections (appropriated receipts) collected by the Texas Center for Infectious Disease are appropriated to Strategy A.2.5, TX Center for Infectious Disease, for the provision of services. <i>TCID has never paid utilities and inpatient treatment and care services to SASH and SSLC. Approximately 8 to 10 years ago, TCID paid the natural gas service for the SSLC, when the building was still owned or assigned to TCID. However, when the buildings were transferred from TCID to the SSLC, the SSLC installed their own natural gas meter. This rider is no longer needed.</i>
22	II-31	Texas Center for Infectious Disease Services and Billing. The Department of State Health Services shall pursue reimbursement, in cases where funding is available, from county governments for tuberculosis services provided to new county indigent patients served at the Texas Center for Infectious Disease.
23	II-31	Continuity of Public Health Services. The Department of State Health Services (DSHS) shall ensure continuity of public health services provided in all strategies in Goal A, Preparedness and Prevention Services, Goal B, Community Health Services, and Goal C, Consumer Protection Services. Should the agency determine costs associated with ensuring continuity of public health services would exceed appropriations, DSHS shall utilize Rider 14, Limitation: Transfer Authority, to transfer funds within the agency or coordinate with the Executive Commissioner of the Health and Human Services Commission to utilize Special Provisions Section 6, Limitations on Transfer Authority, to transfer funds from health and human services agencies listed in Article II of this Act.
24	II-31	HIV Vendor Drug Rebates. Included in amounts appropriated above in Strategy A.2.2, HIV/STD Prevention, is all rebate revenue earned via the HIV Medication Program and deposited under the Comptroller's Revenue Object Code No. 3552, estimated to be \$26,000,000 \$17,128,138 in HIV Vendor Drug Rebates Account No. 8149 (Other Funds) each fiscal year of the 2020-24 <u>2022-23</u> biennium to administer the HIV/STD program in accordance with the applicable federal law. <u>Any funds collected in excess of the amounts appropriated above are appropriated to DSHS for the same purpose.</u>

3.B. Rider Revisions and Additions Request (continued)

		<p>Any unexpended and unobligated balances remaining as of August 31, 201921, in HIV Vendor Drug Rebates Account No. 8149 (Other Funds), are appropriated for the fiscal year beginning September 1, 201921, for the same purpose.</p> <p>Any unexpended balances remaining from amounts appropriated in HIV Vendor Drug Rebates Account No. 8149 (Other Funds) in this rider as of August 31, 20201, are appropriated for the fiscal year beginning September 1, 20201, for the same purpose.</p> <p>For expenditures which may be funded with rebates, General Revenue Funds, or General Revenue-Dedicated Funds, rebates should be expended first to the extent possible while ensuring the Maintenance of Effort is met with General Revenue expenditures.</p> <p>No later than November 1 of each fiscal year, DSHS shall report to the Legislative Budget Board the amount of unexpended balances of rebate revenue from the previous fiscal year and the agency's planned use of these balances.</p> <p><i>Updated the years and revenue estimate. Added clause to appropriate additional HIV Vendor Drug Rebate Revenue, if funds are collected about the estimated appropriations. HIV Rebates may only be expended on the HIV program and cannot be deposited for use by other state programs.</i></p>
25	II-32	<p>Permanent Hospital Fund.</p> <p>Included in amounts appropriated above, in Strategy A.2.5, TX Center for Infectious Disease, is an estimated \$799,182 in General Revenue - Dedicated Permanent Hospital Fund for Capital Improvements and the Texas Center for Infectious Disease Account No. 5048 in each fiscal year of the 20202-243biennium, from the available earnings of the fund for the purpose of implementing Government Code §403.1066.</p> <p>In no event may the administrative costs to implement the provisions of the statute exceed 3 percent. Grants and program costs must compose at least 97 percent of the expenditures to implement the provisions of the statute.</p> <p>Available earnings in excess of the amounts estimated above are appropriated to the Department of State Health Services (DSHS). In the event that amounts available for distribution or investment returns are less than the amounts estimated above, this Act may not be construed as appropriating funds to make up the difference.</p> <p>Any unexpended balances remaining as of August 31, 20202, from the appropriations made by this Rider are appropriated to the fiscal year beginning September 1, 20202, for the same purpose, subject to DSHS notifying the Legislative Budget Board and the Governor in writing at least 30 days prior to budgeting and expending these balances.</p> <p><i>Updated years.</i></p>
26	II-32	<p>Contingency for Behavioral Health Funds.</p> <p>Notwithstanding appropriation authority granted above, the Comptroller of Public Accounts shall not allow the expenditure of General Revenue- Related Funds at the Department of State Health Services in Strategies A.2.2,</p>

3.B. Rider Revisions and Additions Request (continued)

		<p>HIV/STD Prevention, A.2.5, TX Center for Infectious Disease, B.1.1, Maternal and Child Health, and B.1.2, Children with Special Needs in fiscal year 2020 <u>2022</u> or 2024 <u>2023</u>, as identified in Art. IX §10.04, Statewide Behavioral Health Strategic Plan and Coordinated Expenditures, if the Legislative Budget Board provides notification to the Comptroller of Public Accounts that the agency's planned expenditure of those funds in fiscal year 2020 <u>2022</u> or fiscal year 2024 <u>2023</u> does not satisfy the requirements of Art. IX §10.04, Statewide Behavioral Health Strategic Plan and Coordinated Expenditures.</p> <p><i>Updated years. Requested deletion of B.1.1, Maternal and Child Health, and B.1.2, Children with Special Needs, from the rider. These strategies do not fund behavioral health services. The behavioral health schedule in the LAR reflects this as well.</i></p>
27	II-32	<p>Unexpended Balances Between and Within the Biennia: Permanent Tobacco Funds. Included in the amounts appropriated above are unexpended balances remaining as of August 31, 2019-2021, in an amount not to exceed \$100,000 from the Permanent Fund for Children and Public Health (Account No. 5045) in Strategy A.1.1, Public Health Preparedness and Coordinated Services, and in an amount not to exceed \$350,000 from the Permanent Fund for Emergency Medical Services and Trauma Care (Account No. 5046) in Strategy B.2.1, EMS and Trauma Care Systems, for the same purpose for the biennium beginning September 1, 2019-2021.</p> <p>Any unexpended balances remaining as of August 31, 2020 <u>2022</u> from the appropriations made in this rider are appropriated to the Department of State Health Services (DSHS) for the fiscal year beginning September 1, 2020 <u>2022</u> for the same purpose, subject to DSHS notifying the Legislative Budget Board and the Governor in writing at least 30 days prior to budgeting and expending these balances.</p> <p><i>Updated years.</i></p>
28	II-32	<p>Maternal Mortality and Morbidity. Amounts appropriated above to the Department of State Health Services (DSHS) in Strategy B.1.1, Maternal and Child Health include the following in each fiscal year of the 2020-24 <u>2022-23</u> biennium:</p> <ul style="list-style-type: none"> a. \$1,330,000 in General Revenue and 6.0 FTEs to implement maternal safety initiatives statewide; b. \$1,170,000 in General Revenue and 2.0 FTEs to develop and establish a high-risk maternal care coordination services pilot for women of childbearing age, which may include the following: <ul style="list-style-type: none"> (1) Conducting a statewide assessment of training courses; (2) Studying existing models of high-risk maternal care coordination services; (3) Identifying, adapting, or creating a risk assessment tool to identify pregnant women who are at a higher risk for poor pregnancy, birth, or postpartum outcomes and train providers on use of the risk assessment tools; and (4) Creating educational materials for promotoras or community health workers; and c. \$1,000,000 in General Revenue to increase public awareness and prevention activities related to maternal

3.B. Rider Revisions and Additions Request (continued)

		<p>mortality and morbidity.</p> <p>Additionally, out of funds appropriated above, DSHS in coordination with the Maternal Mortality and Morbidity Task Force Review Committee shall annually collect information relating to postpartum depression screening and treatment under state health programs administered by the Health and Human Services Commission, including Medicaid and Healthy Texas Women.</p> <p><i>Updated the years and the statutory name change from Task Force to Review Committee, Health & Safety Code 34.002.</i></p>
29	II-33	<p>Cost Analysis of Outbreak Involving Certain Vaccine Preventable Diseases.</p> <p>Out of the funds appropriated above, the Department of State Health Services shall study and assess the direct and indirect economic costs incurred by the department and local public health organizations in responding to vaccine preventable diseases outbreaks. Not later than September 1, 2020, the department shall: (1) prepare all findings from the study; (2) submit the findings to the relevant House and Senate committees; and (3) submit the findings to the Public Health Funding and Policy Committee.</p> <p><i>Requested deletion of the one-time report.</i></p>
30	II-33	<p>Adult Safety Net Program.</p> <p>Out of the funds appropriated above in Strategy A.2.1, Immunize Children and Adults in Texas, the Department of State Health Services (DSHS) may make available adult safety net vaccines to local health departments to immunize Medicare-D patients whose insurance does not cover the vaccine at the time of presentation at the local health department. DSHS may only make vaccines available if doing so will not result in need for additional funding or a reduction in vaccines provided to the uninsured adult population. To the extent possible, vaccines provided to Medicare-D patients shall be targeted to lower income persons.</p>
31	II-33	<p>Estimated Appropriation and Unexpended Balance: Permanent Tobacco Funds.</p> <p>Included in <u>The amounts appropriated above out of the Permanent Fund for Health and Tobacco Education and Enforcement (Account No. 5044), Permanent Fund for Children and Public Health (Account No. 5045), and Permanent Fund for Emergency Medical Services and Trauma Care (Account No. 5046), and Permanent Fund for Health and Tobacco Education and Enforcement-Medicaid Match (Account No. 8140) is \$850,000 in each fiscal year of the 2020-21 biennium from are out of the available earnings of from the funds, collected after September 1, 2019 as follows: Available earnings in the excess of the amounts estimated are appropriated to the Department of State Health Services (DSHS).</u></p> <p>(a) \$424,993 in each fiscal year in General Revenue - Dedicated Account No. 5044 and \$100,000 each fiscal year in General Revenue - Dedicated Account No. 8140 (Medicaid admin match) in Strategy A.3.2, Reduce Use of Tobacco Products for tobacco prevention education;</p> <p>(b) \$212,504 in each fiscal year in General Revenue - Dedicated Account No. 5045 in Strategy A.1.1, Public Health Preparedness and Coordinated Services for regional and local health services; and</p>

3.B. Rider Revisions and Additions Request (continued)

		<p>(c) \$212,503 in each fiscal year in General Revenue – Dedicated Account No. 5046 in Strategy B.2.1, Emergency Medical Services and Trauma Care for EMS system development.</p> <p>In the event that amounts available for distribution or investment returns as determined by the Comptroller of Public Account under Government Code §403.1068, of the Permanent Fund for Health and Tobacco Education and Enforcement, Permanent Fund for Children and Public Health, and Permanent Fund for Emergency Medical Services and Trauma Care are less than the amounts appropriated above, this Act may not be construed as appropriating funds to make up the difference.</p> <p>Any unexpended balances remaining as of August 31, 2020 <u>2022</u> from the appropriations made in this rider are appropriated to the Department of State Health Services (DSHS) for the fiscal year beginning September 1, 2020 <u>2022</u> for the same purpose, subject to DSHS notifying the Legislative Budget Board and the Governor in writing at least 30 days prior to budgeting and expending these balances.</p> <p><i>Updated the years. Additional updates to include appropriation of available revenue to the permanent funds. Fund 8140 was added for Medicaid Match. Approximately 8 years ago, this fund was created as a subset of GRD 5044, in order to track the portion of that fund used for Medicaid Match. While \$100,000 is historically appropriated from this fund to DSHS, the agency was unable to use the fund since it requires an appropriation from GRD 5044 as well, since it is a subset of this CPA fund.</i></p>
32	II-33	<p>Increase Salaries for Trained Laboratory Staff.</p> <p>Included in the amounts appropriated above in Strategy A.4.1, Laboratory Services, the Department of State Health Services (DSHS) shall allocate \$1,885,420 in General Revenue in each fiscal year of the 2020-21-2022-23 biennium to increase retention of trained laboratory staff. DSHS shall direct funds for salary increases to trained laboratory staff, including chemists, data entry operators, laboratory technicians, microbiologists, molecular biologists, and medical technologists, with prioritization given to laboratory position classifications with the highest turnover rate.</p> <p><i>Requested deletion. Rider aligned with an exceptional item request for salary increases for trained laboratory staff.</i></p>
33	II-34	<p>Transfer from the Cancer Prevention and Research Institute of Texas for the Cancer Registry.</p> <p>Out of funds appropriated elsewhere in this Act to the Cancer Prevention and Research Institute of Texas (CPRIT) is \$3,118,032 out of General Obligation Bond Proceeds each fiscal year of the 2020-21 <u>2022-23</u> biennium which shall be transferred from CPRIT to the Department of State Health Services in Strategy A.1.3, Health Registries, for administration of the Cancer Registry in accordance with the Texas Constitution, Article III, Section 67 and Health and Safety Code, Chapter 102.</p> <p><i>Updated years.</i></p>
34	II-34	<p>Federally Funded Capital Projects.</p> <p>Notwithstanding the limitations in Article IX, Section 14.03, Transfers - Capital Budget, the Department of State Health Services is authorized to transfer from a non-capital budget item to an existing capital budget item or a new capital budget item not present in the agency's bill pattern contingent upon:</p>

3.B. Rider Revisions and Additions Request (continued)

		<p>a. implementation of a new, unanticipated project that is 100 percent federally funded; or</p> <p>b. the unanticipated expansion of an existing project that is 100 percent federally funded; and</p> <p>c. providing prior written notification to the State Auditor's Office, the Comptroller of Public Accounts, the Legislative Budget Board, and the Governor.</p>
35	II-34	<p>Contingency for Senate Bill 747.³ Contingent on enactment of Senate Bill 747, or similar legislation relating to newborn screening and the newborn screening preservation account, by the Eighty-sixth Legislature, Regular Session, the Department of State Health Services (DSHS) is appropriated any revenues deposited to the credit of the General Revenue-Dedicated Newborn Screening Preservation Account, during the biennium beginning September 1, 2019 (estimated to be \$0).</p> <p><u>Estimated Appropriation: Newborn Screening Preservation Account.</u> <u>The Department of State Health Services (DSHS) is appropriated any revenues deposited to the credit of the General Revenue-Dedicated Newborn Screening Preservation Account, during the biennium beginning September 1, 2021, for the purpose of implementing new tests and/or the newborn screening program (estimated to be \$0).</u></p> <p><i>Amend the existing rider to remove the contingency provision.</i></p>
36	II-34	<p>Contingency for Senate Bill 982.⁴ Contingent on enactment of Senate Bill 982, or similar legislation relating to awareness of and access to health care service programs available during a disaster or emergency, by the Eighty-sixth Legislature, Regular Session, the Texas Division of Emergency Management and the Department of State Health Services shall utilize funds appropriated in the applicable strategy at each respective agency, as necessary to implement the provisions of the legislation.</p> <p><i>Requested deletion. One-time contingency rider. The activities outlined in SB 982 have been implemented.</i></p>
37	II-34	<p>Contingency for Senate Bill 384.⁵ Contingent on enactment of Senate Bill 384, or similar legislation relating to the reporting of health care-associated infections and preventable adverse events at health care facilities, or similar legislation by the Eighty-sixth Legislature, Regular Session, the Department of State Health Services (DSHS) shall implement the provisions of the bill out funds appropriated to DSHS in this Act. DSHS' capital budget authority is increased accordingly.</p> <p><i>Requested deletion. One-time contingency rider. The activities outlined in SB 384 have been implemented.</i></p>
NEW		<p><u>Contingency Appropriation: HIV Maintenance of Effort.</u> <u>Contingent on the Health Resources and Services Administration not approving the new methodology, the Department of State Health Services is appropriated \$4,971,078 in General Revenue in fiscal year 2022 and \$4,971,078 in General Revenue in fiscal year 2023 to meet the HIV Ryan White Grant's maintenance of effort.</u></p>

3.B. Rider Revisions and Additions Request (continued)

		<p><i>Requested new rider related to the amended HIV MOE methodology. The requested appropriations assume that HRSA will approve amending the methodology to include HIV rebates and additional expenditures from the Texas Department of Criminal Justice on HIV medication. If the methodology is not approved, then the appropriations are too low to meet the MOE and the Ryan White grant may be in jeopardy. The contingency rider would appropriate funds in that circumstance to maintain the MOE.</i></p>

DSHS 2022-2023 Special Provisions Relating to all Health and Human Services Agencies Request

Agency Code: 537	Agency Name: Department of State Health Services	Prepared By: Amanda Hudson	Date: 10/1/20
Current SP Number	Page Number in 2022-23 GAA	Proposed Special Provisions Language	
2	II-109	<p>Sec. 2. Night Shift and Weekend Differential.</p> <p>a. Clinical and Support Personnel. The Department of State Health Services and the Health and Human Services Commission are authorized to pay an additional night shift salary differential not to exceed 15 percent of the monthly pay rate to personnel who work the 3:00 p.m. to 11:00 p.m. or the 11:00 p.m. to 7:00 a.m. shift or its equivalent. A weekend shift salary differential not to exceed <u>5 15</u> percent of the monthly pay rate may be paid to persons who work weekend shifts. The evening or night shift salary differential may be paid in addition to the weekend shift salary differential for persons working weekend, evening, or night shifts.</p> <p>b. Data Processing Personnel. The Department of State Health Services, the Department of Family and Protective Services, the Health and Human Services Commission, and the Health and Human Services Consolidated Print Shop may pay an evening or night shift salary differential not to exceed 15 percent of the monthly pay rate to personnel in data processing or printing operations who work the 3:00 p.m. to 11:00 p.m. shift or 11:00 p.m. to 7:00 a.m. shift, or their equivalents. A weekend shift salary differential not to exceed <u>5 15</u> percent of the monthly pay rate may be paid to persons who work weekend shifts. The evening or night shift salary differential may be paid in addition to the weekend shift salary differential for persons working weekend, evening, or night shifts.</p> <p>c. Statewide Intake Personnel. The Department of Family and Protective Services is authorized to pay an evening or night shift salary differential not to exceed 15 percent of the monthly pay rate to Statewide Intake personnel who work the 3:00 p.m. to 11:00 p.m. shift or 11:00 p.m. to 7:00 a.m. shift, or their equivalents. A weekend shift salary differential not to exceed 5 percent of the monthly pay rate may be paid to persons who work weekend shifts. The evening or night shift salary differential may be paid in addition to the weekend shift salary differential for persons working weekend, evening, or night shifts.</p> <p><i>DSHS is requesting to increase the percent of shift differential for weekend work for clinical, support, and data processing personnel from 5% to 15%. The percentage of shift differential offered must effectively compensate positions or the weekend positions will experience increased turnover which could jeopardize weekend laboratory testing operations. 5% weekend shift differential would lead to position turnover. DSHS utilizes shift differential pay for employees in the state laboratory.</i></p>	
3	II-110	<p>Sec. 3. Services to Employees.</p> <p>The Department of State Health Services, Department of Family and Protective Services and Health and Human Services Commission may expend funds for the provision of first aid or other minor medical attention for employees injured in the course and scope of their employment and for the repair and/or replacement of employees' items of personal property which are damaged or destroyed in the course and scope of their employment so long as such items are medically prescribed equipment. Expenditures for such equipment may not exceed \$500 per employee per incident.</p>

6	II-111	<p>Sec. 6. Limitations on Transfer Authority. Notwithstanding the limitations of Article IX, §14.01, Appropriation Transfers of this Act, the Executive Commissioner of the Health and Human Services Commission is authorized to make transfers of funding and full-time equivalents (FTEs) between the Department of State Health Services and the Health and Human Services Commission, subject to the following requirements. Transfers that exceed \$1,000,000 in General Revenue or FTE adjustments of more than 10.0 FTEs are subject to the prior written approval of the Legislative Budget Board and the Governor. Transfers below these thresholds require written notification to the Legislative Budget Board and Governor within 30 days of the transfer and a report on transfers of all amounts should be submitted to the Legislative Budget Board quarterly. The total of all transfers from a strategy may not exceed the lesser of \$1,000,000 or 20.0 percent of the originating item of appropriation for funding for the fiscal year without the prior written approval of the Legislative Budget Board and the Governor.</p> <p>To request a transfer, the Executive Commissioner of the Health and Human Services Commission shall submit a written request to the Legislative Budget Board and the Governor. At the same time, the agency shall provide a copy of the request to the Comptroller of Public Accounts. The request shall include the following information:</p> <ul style="list-style-type: none"> a. a detailed explanation of the purpose(s) of the transfer, including the following: <ul style="list-style-type: none"> (1) a description of each initiative with funding and FTE information by fiscal year; and (2) an indication of whether the expenditure will be one-time or ongoing; b. the names of the originating and receiving agencies and/or strategies and the method of financing and FTEs for each strategy by fiscal year; c. an estimate of performance levels and, where relevant, a comparison to targets included in this Act for both the originating and the receiving agencies and/or strategies; and d. the capital budget impact. <p>Additional information requested by the Legislative Budget Board or the Governor should be provided in a timely manner. The request and information provided subsequently shall be prepared in a format specified by the Legislative Budget Board.</p> <p>In the case of disaster or other emergency, this provision is superseded by the emergency-related transfer authority in Article IX of this Act.</p>

13	II-114	<p>Sec. 13. Appropriation of Receipts: Civil Monetary Damages and Penalties. Included in the amounts appropriated above for the 2020-21 <u>2022-23</u> biennium are the following:</p> <ul style="list-style-type: none"> a. \$1,414,870 in General Revenue Match for Medicaid for the Health and Human Services Commission (HHSC); b. \$780,000 in General Revenue for the Department of State Health Services. <p>These amounts are contingent upon the collection of civil monetary damages and penalties under Human Resources Code §§32.021 and 32.039, and Health and Safety Code §431.0585. Any amounts collected above these amounts by the respective agency are appropriated to the respective agency in amounts equal to the costs of the investigation and collection proceedings conducted under those sections, and any amounts collected as reimbursement for claims paid by the agency. For HHSC, any amount collected above this amount is to be applied to the protection of health and property of residents in nursing facilities in accordance with 42 U.S. Code §1396r(h)(2)(a)(ii) and Human Resources Code §32.021(g) subject to the approval of the Centers for Medicare and Medicaid Services.</p> <p><i>Updated years.</i></p>	

**DSHS 2020-2021 Special Provisions Relating to all Health and Human Services Agencies Request
(continued)**

14	II-114	<p>Sec. 14. Rate Limitations and Reporting Requirements. Notwithstanding other provisions of this Act, the use of appropriated funds for a rate paid by the Health and Human Services Commission (HHSC) or the Department of State Health Services (DSHS) shall be governed by the specific limitations included in this provision.</p> <p>For purposes of this provision, "rate" is defined to include all provider reimbursements (regardless of methodology), including for oral medications, that account for significant expenditures. "Fiscal impact" is defined as an increase in expenditures due to either a rate change or establishment of a new rate, including the impact on all affected programs. Additionally, estimates of fiscal impacts should be based on the most current caseload forecast submitted by HHSC pursuant to other provisions in this Act and should specify General Revenue Funds, TANF Federal Funds, and All Funds. Fiscal estimates that impact multiple risk groups may be reported at an aggregate level and acute care services may be reported by rate category.</p> <p>a. Notification of Change to Managed Care Rates.</p> <p>(1) Within seven calendar days of the establishment of preliminary premium rates for managed care organizations (MCOs) contracting with HHSC, the Executive Commissioner of the HHSC shall submit the following information in writing to the Legislative Budget Board, the Governor, and the State Auditor:</p> <ul style="list-style-type: none">(i) a schedule showing the previous fiscal year's rate and the proposed rate, which should include information on the rate basis for the MCO reimbursements to providers;(ii) a schedule and description of the rate-setting process for all rates listed for subsection (1), which should include:<ul style="list-style-type: none">(a) a thorough explanation of all formulas and rounding methodologies used in the rate-setting process;(b) reasoning and basis for all trends used in the rate-setting process;(c) all analyses conducted by the Data Analysis Unit (established pursuant to Government Code §531.0082) that are pertinent to the rate-setting process; and(d) all documentation submitted to the Centers for Medicare and Medicaid Services (CMS) pursuant to 42 C.F.R. §438.7.(iii) an estimate of the fiscal impact, by agency and by fiscal year, including the amount of General Revenue Funds, TANF Federal Funds, and All Funds for each rate change listed for subsection (1). <p>(2) The Executive Commissioner of HHSC shall submit all available information identified in subsection (1) if the preliminary rates are changed and shall also submit the reason for these changes. The Executive Commissioner of HHSC shall submit the final proposed rates along with the information listed in subsection (1) no later than 45 calendar days prior to implementation.</p>
----	--------	---

**DSHS 2020-2021 Special Provisions Relating to all Health and Human Services Agencies Request
(continued)**

		<p>(3) Within seven days of the submission requirements listed above in subsections (i) through (iii), the Executive Commissioner of the HHSC shall submit a schedule identifying an estimate of the amount of General Revenue Funds, TANF Federal Funds, and All Funds by which expenditures at such rate levels would exceed appropriated funding.</p> <p>b. Orphan Drug Notification. HHSC shall provide notification of a new or increased rate for an orphan drug within 60 calendar days following expenditures for this purpose if managed care capitation rates are to be adjusted or the annual fiscal impact to fee-for-service expenditures is expected to exceed \$500,000 in General Revenue Funds. An orphan drug must meet criteria specified in the federal Orphan Drug Act and regulations at 21 C.F.R. §316, and be required to be covered by the Medicaid program under federal law. With the notification, HHSC shall provide the fiscal impact including the amount of General Revenue Funds, and All Funds, by fiscal year; the amount of drug rebates projected; and an estimate of the population to be served.</p> <p>c. Quarterly Notification. With the exception of statutorily required pricing updates on oral medications, and on a quarterly basis, HHSC shall provide notice of changed rates for:</p> <p>(1) new procedure codes required to conform to Federal Healthcare Common Procedure Coding System (HCPCS) updates;</p> <p>(2) revised rates occurring as a result of a biennial calendar fee review;</p> <p>(3) any rate change estimated to have an annual fiscal impact of less than \$500,000 in General Revenue-related Funds or TANF Federal Funds; and</p> <p>(4) any orphan drug not subject to the requirements of subsection (b).</p> <p>d. Limitation on Rates that Exceed Appropriated Funding. With the exception of those rates specified in subsections (b) or (c), HHSC and DSHS may not pay a rate that would result in expenditures that exceed, in any fiscal year, the amounts appropriated by this Act to a strategy for the services to which the rate applies without the prior written approval of the Legislative Budget Board and the Governor.</p> <p>To request authorization for such a rate, the Executive Commissioner of the HHSC shall submit a written request to the Legislative Budget Board and the Governor. At the same time, the agency shall provide a copy of the request to the Comptroller of Public Accounts. The request shall include the following information:</p> <p>(1) a list of each new rate and/or the existing rate and the proposed changed rate;</p> <p>(2) an estimate of the fiscal impacts of the new rate and/or rate change, by agency and by fiscal year; and</p> <p>(3) the amount of General Revenue Funds, TANF Federal Funds, and All Funds, by fiscal year, by which each rate would exceed appropriated funding for each fiscal year.</p> <p>The request shall be considered to be approved unless the Legislative Budget Board or the Governor issues a written disapproval within 15 business days of the date on which the staff of the Legislative Budget Board concludes its review</p>

		<p>of the request for authorization for the rate and forwards its review to the Chair of the House Appropriations Committee, Chair of the Senate Finance Committee, Speaker of the House, and Lieutenant Governor. Any requests for additional information made by the Legislative Budget Board shall interrupt the counting of the 15 business days.</p> <p>e. Additional information requested by the Legislative Budget Board or the Governor should be provided in a timely manner. Notifications, requests and information provided subsequently shall be prepared in a format specified by the Legislative Budget Board.</p> <p>f. The Office of the State Auditor may review the fiscal impact information provided under sections (a) through (d) along with supporting documentation, supporting records, and justification for the rate increase provided by HHSC and report back to the Legislative Budget Board and the Governor before the rate is implemented.</p> <p>g. The Comptroller of Public Accounts shall not allow the expenditure of funds for a new or increased rate if the Legislative Budget Board provides notification to the Comptroller of Public Accounts that the requirements of this provision have not been satisfied.</p>	
15	II-116	<p>Sec. 15. Locality Pay. Out of funds appropriated above, the health and human services agencies listed in Article II of this Act are authorized to pay a salary supplement, not to exceed \$1,200 per month, to agency-determined employees whose duty station is located in an area of the state in which the high cost of living is causing excessive employee turnover, as determined by the agency. This salary supplement shall be in addition to the maximum salary rate authorized for that position elsewhere in this Act. In the event that an employee so assigned works on a less than full-time basis, the maximum salary supplement shall be set on a basis proportionate to the number of hours paid.</p>

		<i>the projected revenue collections, of \$93,666,182 annually. In addition, a section is added to request additional revenue in the event that an additional test is added. The revenue would be used to cover the cost of the test.</i>	
17	II-118	<p>Sec. 17. Use of Trauma Fund Receipts. In an effort to maximize the availability of Federal Funds under Medicaid for the purposes of providing reimbursement for uncompensated trauma care at designated facilities and providing increases in Medicaid inpatient provider rates, the Department of State Health Services (DSHS) and the Health and Human Services Commission (HHSC) shall enter into an interagency contract to allow for the transfer of funds from General Revenue-Dedicated Designated Trauma Facility and EMS Account No. 5111, from DSHS to HHSC for this purpose. This interagency contract would allow for the transfer of the Account No. 5111 funds to the extent that the use of these funds in this manner would not reduce reimbursements that otherwise would have been provided for uncompensated trauma care to designated facilities.</p> <p>Appropriations include \$115,022,700 \$112,802,252 in fiscal year 2020 2022 and \$115,022,700 \$112,802,252 in fiscal year 2024 2023 out of the General Revenue-Dedicated Designated Trauma Facility and EMS Account No. 5111 to the Department of State Health Services, Strategy B.2.1, EMS and Trauma Care Systems. Of that amount, \$100,471,474 \$98,978,587 in each fiscal year is to be transferred through the interagency contract to HHSC to provide add-on payments for trauma care and safety-net hospitals in Medicaid.</p> <p>If funds are not available in the amount appropriated from General Revenue-Dedicated Designated Trauma Facility and EMS Account No. 5111 in this Act, the amounts identified for transfer through interagency contract to HHSC shall be reduced by the amount that funds are less than appropriations and an equal amount of General Revenue Funds is appropriated to HHSC.</p> <p><i>Updated years and amounts.</i></p>	
18	II-118	<p>Sec. 18. Performance Reporting for Texas Center for Infectious Disease and Rio Grande State Center. The Health and Human Services Commission and the Department of State Health Services shall submit to the Legislative Budget Board and the Governor not later than December 1 of each fiscal year the following information regarding performance of the Texas Center for Infectious Disease and the Rio Grande State Center: revenue collections at the hospital, by payor mix; direct and non-direct patient care expenditures; number of inpatient patients served on a monthly basis by type of service provided; and number of outpatient patients served on a monthly basis by type of service provided.</p>	
19	II-118	<p>Sec. 19. Prohibition on Use of Appropriations for the Private Operation of a State Hospital. No funds appropriated above shall be used to solicit bids for the private operation of a state hospital or for the private operation of a state hospital, without approval from the Legislative Budget Board.</p>

20	II-118	<p>Sec. 20. Charges to Employees and Guests. Collections for services rendered to employees and guests shall be made by a deduction from the recipient's salary or by cash payment in advance. Such deductions and other receipts for these services from employees and guests are appropriated to the facility. Refunds of excess collections shall be made from the appropriation to which the collection was deposited.</p> <p>As compensation for services rendered and notwithstanding any other provision in this Act, any facility under the jurisdiction of the Health and Human Services Commission or the Department of State Health Services may provide free meals for food service personnel and volunteer workers, and may furnish housing facilities, meals, and laundry service in exchange for services rendered by interns, chaplains in training, and student nurses.</p>					
21	II-119	<p>Sec. 21. New or Additional Facilities. No funds appropriated may be spent for constructing new or additional facilities or for the purchase of sites without specific authorization of the Legislature. All facilities shall be kept where they are located by the Legislature, and all new buildings to be constructed shall be on these sites unless otherwise specifically authorized by the Legislature. For the purpose of this subsection, specific authorization may be granted either by basic statute or special authorization in this Act.</p>					
22	II-119	<p>Sec. 22. Revolving Petty Cash Funds. Each facility under the jurisdiction of the Health and Human Services Commission or the Department of State Health Services may establish a petty cash fund to be maintained in cash or at a local bank. The petty cash fund, not to exceed \$25,000 shall be used only for making emergency payments and small purchases which will increase the efficiency of the operation; for payments to client workers on a regular payday basis; for use as change funds in specific locations where financial activities of the agency require a change fund; and for supplies and equipment purchases for on-campus work centers.</p>					
23	II-119	<p>Sec. 23. Surplus Property. Notwithstanding Article IX, Section 8.03 of this Act, in order to conserve funds appropriated, surplus personal property may be transferred from one state hospital or state supported living center to another with or without reimbursement. The Health and Human Services Commission or the Department of State Health Services may transfer surplus personal property from a state hospital or state supported living center to a community center, as defined in the Texas Health and Safety Code Sec. 534.001(b), with or without reimbursement. Surplus personal property belonging to any state hospital or state supported living center may be sold; provided, however, that such transfers or sales shall be made under the same procedure as provided by Government Code, Chapter 2175.</p>					
24	II-119	<p>Sec. 24. Patient or Client Assistance. Subject to the approval of rules and regulations of the Health and Human Services Commission or the Department of State Health Services, patients or clients in any state hospital or state supported living center who are assisting in the operation of the facility as part of their therapy, may receive compensation out of any funds available to the respective facilities.</p>

25	II-119	<p>Sec. 25. Barber and Cosmetology Services. The Health and Human Services Commission (HHSC) or the Department of State Health Services (DSHS) may be reimbursed for barber and cosmetology services in state hospitals and state supported living centers provided the reimbursement is consistent with an individual's ability to pay. These reimbursements are appropriated above to the agencies to offset the cost of providing barber and cosmetology services. The agencies may also use patient benefit funds to offset the cost of these services for indigent clients.</p>	
26	II-119	<p>Sec. 26. State-Owned Housing. The Superintendent, Medical Director, Assistant Superintendent for Programs, and Director of Plant Maintenance at each state hospital and the Director, Medical Director, Assistant Director for Programs, and Director of Plant Maintenance at each state supported living center are authorized to live in state-owned housing at a rate determined by the Health and Human Services Commission (HHSC) or the Department of State Health Services (DSHS). Other HHSC or DSHS employees may live in state-owned housing as set forth in Article IX, Section 11.02, Reporting Related to State Owned Housing, of this Act. Fees for employee housing are appropriated above to be used for maintaining employee housing.</p>	
27	II-119	<p>Sec. 27. Donations from Individuals, Community Groups and Volunteer Services Councils. It is expressly provided that the Department of State Health Services and the Health and Human Services Commission, in accordance with §533.001 of the Health and Safety Code and to the extent permitted by law, may accept donations for permanent improvements at the state hospitals and the state supported living centers from individuals, community groups and local Volunteer Services Councils. Such funds are not subject to limitations on capital budget expenditures as contained in Article IX or any other similar provisions in this Act. Permanent improvements are defined as an improvement to a state facility that involves construction, building system(s), and/or landscaping.</p>

32	II-120	<p>Sec. 32. Foster Care Rate Methodology.</p> <p>(a) Evaluation. Out of funds appropriated above to the Health and Human Services Commission (HHSC) in Strategy L.1.1, HHS System Supports, and in consultation with the Department of Family and Protective Services (DFPS), HHSC shall evaluate the methodology for establishing foster care rates to determine whether there is an alternative methodology that would increase provider capacity capable of delivering appropriate and evidence-based services, incentivize quality improvements and maximize the use of federal funds. HHSC shall also evaluate cost reporting requirements to identify opportunities to streamline reporting and ensure necessary information is included to support any alternative foster care rate methodology. HHSC may contract for the evaluation with a third party who has demonstrated capacity to develop residential child care rates and risk-based contracting in child welfare settings. HHSC and DFPS shall allow stakeholders the opportunity to provide input on the alternative rate methodology.</p> <p>If an alternative is identified, HHSC and DFPS may implement the revised methodology if doing so would not increase General Revenue expenditures for foster care payments in Strategy B.1.9, Foster Care Payments.</p> <p>(b) Rate Methodology. It is the intent of the legislature that HHSC consider the following in evaluating a new rate methodology as outlined in subsection (a):</p> <ul style="list-style-type: none"> (1) Accounting for differences in the individualized needs of children as determined by a best practice needs assessment tool capable of predicting foster care costs reliable enough to inform rate setting, such as the Child and Adolescent Needs and Strengths (CANS) Assessments; (2) Accounting for regional variation in costs, including differences in the individualized needs of children served in different regions and locally competitive wages to recruit and maintain qualified staff; (3) Incentivizing placing children in the least restrictive environment that can best meet their needs; (4) Maximizing the use of high-quality intensive home and community-based services; (5) Maximizing the efficient and effective use of federal funds to improve capacity and address gaps in care, including: <ul style="list-style-type: none"> (A) Increasing access to current Medicaid benefits such as mental health rehabilitation and targeted case management services; (B) Identifying Medicaid benefits offered in other states for foster youth that decrease hospitalization and lower costs; and (C) Improving reporting and tracking of data to maximize Title IV-E Reimbursements; (6) Incorporating a viable and sustainable methodology for Community-based Care (CBC) rates, based on best practices and the experiences of other states; (7) Providing opportunities, at least semi-annually, to adjust the rates based on demonstrated fluctuations across CBC regions and population needs; (8) Including risk mitigation strategies that balance the risk to the state with the need to attract and maintain viable Single Source Continuum Contractors for each CBC region, such as time limited risk corridors; and (9) Being consistent with actuarially sound rate development principles to the fullest extent possible. <p>(c) Cost Reports. It is the intent of the legislature that HHSC consider the following in evaluating the cost reports as outlined in subsection (a):</p> <ul style="list-style-type: none"> (1) Eliminating reporting requirements that are not required by state or federal law and are not currently being used by

SUB-STRATEGY DESCRIPTION JUSTIFICATION:

This sub-strategy ensures effective partnering between local health entities and public health regions to provide essential public health services to all communities within the State. These services include: preventing the spread of disease; monitoring and investigating health problems; informing and educating communities about prevention strategies on communicable and chronic diseases; partnering with community action groups to solve public health problems; developing policies and public health improvement plans to implement and enforce effective public health services; enforcement of regulations regarding food safety and other safety compliance issues; conducting data analysis for enhanced surveillance of emerging public health conditions or threats; providing referrals for health services; developing a competent public healthworkforce; and continually re-assessing local and regional public health resources and needs. Efforts to build local public health system capacity in counties not served by a local health entity are critical to the successful implementation of essential public health services. Public health regional operations fill the gap where local capacity is non-existent or inadequate.

SUB-STRATEGY EXTERNAL/INTERNAL FACTORS:

External factors impacting this sub-strategy would be the absence or closure of local health entities that serve as critical components of the statewide public health system. Absence or reduction in local health entities would add an additional burden on public health regional resources resulting in limited ability to respond to disease outbreaks or public health emergencies.

SUB-STRATEGY DESCRIPTION JUSTIFICATION:

Activities are focused on strengthening local public health entities, DSHS Health Service Regions, hospitals and supporting health care systems so that they can better respond to emergencies. DSHS works to upgrade and coordinate the efforts of federal, state, local governments, and the health care system to prepare for and respond to natural and manmade public health emergencies including pandemic influenza. Activities include: strengthening and maintaining laboratory capacity to ensure response capability, rapid and accurate diagnostic and reference testing of select biologic and chemical agents; strengthening relations with first responders and law enforcement; coordination between environmental, veterinary, and agricultural laboratories ensuring a coordinated response to any health threat; developing risk communications capacity for rapid dissemination

	of information; ensuring an adequately trained and responsive public health workforce; maintaining a secure and robust network for dissemination of critical health and response information to responders; and seamlessly share health data with all health partners such as, hospitals and laboratories to ensure the protection of sensitive health data.					

SUB-STRATEGY EXTERNAL/INTERNAL FACTORS:

At the local, regional and state level there is an increased focus on alignment and integration of preparedness activities among community partners to include public health, hospitals, other health care providers, and emergency management. Because of this increased focus, additional partners will come together to determine needs and priorities. Regarding pandemic flu planning, partners from education and business will be among those involved. The impact should be more integration for planning, exercising and training, thus improving the state's readiness to respond.

SUB-STRATEGY DESCRIPTION JUSTIFICATION:

The statutory responsibilities of the Texas Department of State Health Services (DSHS) are outlined in Chapter 418 (Emergency Management) of the Government Code. One of the missions of DSHS is to plan, coordinate, and execute state-level response operations for major public health emergencies and disasters. Disaster response activities include coordinating response operations with cities, counties, other local governmental and non-governmental entities, state agencies, other states, federal agencies, volunteer groups, and industry. Texas is at risk from a wide range of natural and man-made, accidental or intentional, and technological hazards and homeland security threats. These threats require DSHS to be prepared to respond quickly to emergency situations and disasters. Response activities include monitoring emergency situations, including the monitoring of emerging situations; assessing emergency needs; activating, deploying, and demobilizing state, local, and private partner resources to assist local governments in affected areas or in other states; and coordinating response operations by and with multiple federal agencies, state agencies, local governments, and private partners.

SUB-STRATEGY EXTERNAL/INTERNAL FACTORS:

DSHS interfaces with various federal agencies; primarily the US Department of Homeland Security (DHS), Centers for Disease Control and Prevention (CDC), Health and Human Services (HHS) Office of the Assistant Secretary for Preparedness and Response (ASPR) and the Federal Emergency Management Agency (FEMA). DSHS works closely with the Public Health Regions and Local Health Entities. In addition, DSHS collaborates with state agencies and volunteer organizations that comprise the State Emergency Management Council, the state's councils of government, school districts, the Governor's Office, private businesses, volunteer groups and the cities and counties in Texas. Funding for DSHS response activities comes primarily from state general revenue. There is a potential for reimbursement from FEMA when a federal disaster is declared.

3.D. SUB-STRATEGY REQUEST

DATE: 10/9/2020

TIME: 11:00:36 AM

Agency code 537	Agency name: Department of State Health Services	Prepared By: Amanda Hudson	Statewide Goal Code: 3	Strategy Code: 01-01-03
---------------------------	--	--------------------------------------	----------------------------------	-----------------------------------

GOAL: 01 Preparedness and Prevention Services
 OBJECTIVE: 01 Improve Health Status through Preparedness and Information
 STRATEGY: 03 Health Registries
 SUB-STRATEGY: 01-01-03-01 Environmental Epidemiology & Toxicology

CODE	Sub-Strategy Detail	Exp 2019	Est 2020	Bud 2021	Req 2022	Req 2023
Full-Time Equivalents:		33.9	36.0	37.3	37.3	37.3
FTE: FULL TIME EQUIVALENTS						

SUB-STRATEGY DESCRIPTION JUSTIFICATION:

This sub-strategy is made up of three programs: health assessment and toxicology; environmental and occupational epidemiology; and fluoridation. The health assessment and toxicology program evaluates the potential and real adverse health effects that exposure to toxic substances or harmful agents may have on people (Texas Health and Safety Code, Title 6, Chapter 503.005: Health Risk Assessments and Toxicology Investigations and Title 2, Subtitle H, Chapter 161.0211, subchapter C: Epidemiology or Toxicology Investigations). The environmental and occupational epidemiology team monitors occupational illness and injury, including exposure to pesticides, silicosis and asbestosis, among the Texas workforce and recommends preventive interventions to improve worker health and safety (Health and Safety Code, Chapter 84, Reporting of Occupational Conditions). The program also conducts health surveillance and investigations of non-communicable disease clusters (such as cancer). The fluoridation program assists Texas public water systems with community water fluoridation.

SUB-STRATEGY EXTERNAL/INTERNAL FACTORS:

Positions that require expertise in toxicology, environmental sciences, and epidemiology, which are critical in addressing human health impact of environmental contaminants and of non-infectious disease clusters, are difficult to fill. Vacancies have a direct impact on environmental epidemiology surveillance and monitoring functions.

3.D. SUB-STRATEGY REQUEST

DATE: 10/9/2020

TIME: 11:00:36 AM

Agency code 537	Agency name: Department of State Health Services	Prepared By: Amanda Hudson	Statewide Goal Code: 3	Strategy Code: 01-01-03
---------------------------	--	--------------------------------------	----------------------------------	-----------------------------------

GOAL: 01 Preparedness and Prevention Services
 OBJECTIVE: 01 Improve Health Status through Preparedness and Information
 STRATEGY: 03 Health Registries
 SUB-STRATEGY: 01-01-03-02 Birth Defects Epidemiology & Surveillance

CODE	Sub-Strategy Detail	Exp 2019	Est 2020	Bud 2021	Req 2022	Req 2023
------	---------------------	----------	----------	----------	----------	----------

SUB-STRATEGY DESCRIPTION JUSTIFICATION:

This sub-strategy operates the Births Defects Registry of Texas in accordance with Health & Safety Code, Title 2, Subtitle D, Chapter 87. The statewide population-based registry serves as the foundation for measuring the burden of birth defects in Texas, conducts cluster investigations, responds to inquiries from stakeholders, and performs selected education and outreach activities with affected families. The registry collaborates with researchers in understanding the causes of birth defects and working towards identifying evidenced-based interventions that prevent birth defects.

SUB-STRATEGY EXTERNAL/INTERNAL FACTORS:

External and internal stakeholders use data from the Birth Defects Registry to conduct public health research that inform decisions regarding the health of Texans. Data quality and completeness are dependent on fully functioning and integrated data systems. The number of birth defects is increasing. Increases in data volume result in the need for costly upgrades and maintenance support that are dependent on the limited resources available from DSHS and the consolidated HHS Information Technology infrastructure.

 SUB-STRATEGY: 01-01-03-03 Cancer Epidemiology and Surveillance

CODE	Sub-Strategy Detail	Exp 2019	Est 2020	Bud 2021	Req 2022	Req 2023
------	---------------------	----------	----------	----------	----------	----------

SUB-STRATEGY DESCRIPTION JUSTIFICATION:

This sub-strategy operates the Texas Cancer Registry (TCR) in accordance with the Texas Health and Safety Code, Chapter 82, Texas Cancer Incidence Reporting Act, the CDC and Texas Cancer Prevention and Control Cooperative Agreement. The TCR is a statewide, population-based registry that serves as the foundation for measuring the cancer burden in Texas, comprehensive cancer control efforts, health disparities, progress in prevention, diagnosis, treatment, and survivorship, and also supports a wide variety of cancer-related research.

SUB-STRATEGY EXTERNAL/INTERNAL FACTORS:

External and internal stakeholders use data from the TCR to conduct public health activities and research, inform decisions, and improve the health of Texans. Data quality and completeness are dependent on a fully staffed and functioning registry, as well as current information technology and secure, integrated data systems. More attention and funding to address cancer in Texas has increased the need for ensuring the TCR maintains optimal staffing, information technology, national data quality and timelines standards, and customer needs in fulfilling data requests.

GOAL: 01 Preparedness and Prevention Services
 OBJECTIVE: 01 Improve Health Status through Preparedness and Information
 STRATEGY: 03 Health Registries
 SUB-STRATEGY: 01-01-03-04 Blood Lead Epidemiology and Surveillance

CODE	Sub-Strategy Detail	Exp 2019	Est 2020	Bud 2021	Req 2022	Req 2023
-------------	----------------------------	-----------------	-----------------	-----------------	-----------------	-----------------

SUB-STRATEGY DESCRIPTION JUSTIFICATION:

This sub-strategy operates the Texas Childhood Lead Poisoning Prevention Program (CLPPP) and Adult Blood Lead Elimination and Surveillance (ABLES) programs. The CLPPP maintains a surveillance system of blood lead results on children (less than 15 years of age) as mandated by Texas Health and Safety Code, Chapter 88. The ABLES maintains a surveillance system of blood lead test results on individuals 15 years and older as mandated by Texas Health and Safety Code, Chapter 84. The programs conduct follow-up for elevated results, which can include referrals to case management, referrals to the early childhood intervention program, and environmental lead investigations.

SUB-STRATEGY EXTERNAL/INTERNAL FACTORS:

The childhood lead poisoning prevention program has had challenges providing follow-up coordination to the increased number of children with elevated blood lead levels as the Centers for Disease Control and Prevention continues to lower the blood lead level that initiates follow up activities. Increased reporting as a result of Texas' population growth requires enhancements and updates to the Blood Lead Registry to accommodate the increasing volume of data. Changes in the technology require continual staff training to operate the registry system.

The EMS & Trauma Registries are multiple registries within a single system. The registries are legislatively mandated by Health and Safety Code, Chapter 92 (Injury Prevention and Control) and Chapter 773 (Emergency Medical Services). Data is collected on spinal cord injuries, traumatic brain injuries, submersions, and other significant traumatic injuries. In addition, all EMS provider runs are reported to the EMS & Trauma Registries. The hospital and EMS data reported to the EMS & Trauma Registries are based on national data standards and are submitted to the respective national organizations for benchmarking and comparison purposes.

SUB-STRATEGY EXTERNAL/INTERNAL FACTORS:

The EMS & Trauma Registries (Registries) are dependent on federal funding (via Texas Department of Transportation grants) for system enhancements and maintenance, the ability to adequately address stakeholder needs, the cooperation of hospitals and EMS providers reporting to the Registries, and increased capacity to collect reportable injuries other than major trauma. There has been a steady growth in the number of EMS and trauma cases reported to the Registries each year. The Registries process approximately 3.5 million records a year. The volume of records and stakeholder demand for technological advances, such as web-based reporting, have required significant and costly enhancements to the replacement EMS/Trauma registry database system that was implemented in 2012. The Registries system struggles to keep pace with technological advancements.

3.D. SUB-STRATEGY REQUEST

DATE: 10/9/2020

TIME: 11:00:36 AM

Agency code	Agency name:	Prepared By:	Statewide Goal Code:	Strategy Code:
537	Department of State Health Services	Amanda Hudson	3	01-02-01

GOAL: 01 Preparedness and Prevention Services
 OBJECTIVE: 02 Infectious Disease Control, Prevention and Treatment
 STRATEGY: 01 Immunize Children and Adults in Texas
 SUB-STRATEGY: 01-02-01-01 Immunize Adults in Texas

CODE	Sub-Strategy Detail	Exp 2019	Est 2020	Bud 2021	Req 2022	Req 2023
Full-Time Equivalents:		208.3	182.4	188.8	188.8	188.8
FTE: FULL TIME EQUIVALENTS						

SUB-STRATEGY DESCRIPTION JUSTIFICATION:

Immunization program activities are provided to prevent, control, reduce, and eliminate vaccine-preventable diseases in adults and as preparation for emergency response to natural disasters or disease outbreaks. Required components of the federal grant include: program planning and evaluation; management of the immunization information system, ImmTrac2; quality assurance for providers enrolled in the Adult Safety Net vaccine program; education, information, training, and partnership; epidemiology and surveillance; and preparedness activities. Vaccine services include accounting for vaccines purchased and distributed to clinics enrolled in the Adult Safety Net vaccine program; adult influenza vaccine purchases for the DSHS Public Health Region (PHR) offices, and emergency vaccines. Emergency vaccines include rabies vaccine, all immunoglobulins (IG), and vaccines that are purchased for emergency response efforts. Immunization program activities include educating providers with educational and promotional materials for adults, providers, and the general public. Additionally, the program works to ensure compliance with vaccine storage and handling policies by providing technical assistance to federally qualified health centers, rural health clinics, local health departments, and DSHS PHR clinics. Immunization program activities and education are coordinated across agency programs such as Title V, HIV/STD, Breast and Cervical Cancer Services, Health Emergency Preparedness and Response, and Emerging and Acute Infectious Disease.

SUB-STRATEGY EXTERNAL/INTERNAL FACTORS:

The program aims to increase adult vaccination coverage rates by providing public education, training, tools such as the immunization information system, and vaccines through the Adult Safety Net (ASN) program. The federal Centers for Disease Control and Prevention (CDC) provides guidance towards meeting all CDC recommendations related to the implementation of the adult immunization standards and vaccine storage and handling. The development of new vaccines results in increased costs of vaccines. Many adults use pharmacies as a source of vaccinations; many rely on public health clinics and workplace immunization events because they have no medical home. Immunizers lack education in the adult immunization recommendations and standards of practice. Many adults and their immunization providers are unaware of the consent requirements to participate in the immunization information system (ImmTrac2) and participant engagement remains low. Changes to federal health insurance requirements could lead to an increase in the number of uninsured adults seeking immunizations.

SUB-STRATEGY DESCRIPTION JUSTIFICATION:

HIV/STD Medication activities include the purchase and distribution of life-sustaining medications to treat HIV infection. HIV medications delay the onset of symptomatic disease, prevent life-threatening opportunistic infections, and extend the life span of persons living with HIV. Proper treatment regimens effectively control the level of virus in the body and reduce the infectiousness of that patient, lessening the risk of transmission to others. AIDS Drug Assistance Programs (ADAPs) are authorized under Part B of the Federal Ryan White Treatment Extension Act of 2009. The Texas ADAP, which is part of the Texas HIV Medication Program (THMP), provides medications for Texans with HIV who are uninsured or underinsured for prescription medications and have incomes of 200% or less of the current Federal Poverty Level. The Pharmacy Branch is the primary entity responsible for housing and distributing these medications and is integral to the operation of the THMP. In FY2019, the THMP assisted 20,732 Texans with HIV, providing more than 293,939 prescriptions. This sub-strategy also includes the activity of providing medications to prevent and treat sexually transmitted diseases (STD) including syphilis, gonorrhea, and chlamydia.

Early access to clinical care for persons with HIV disease is critical to prevent continued deterioration of the immune system function and increased susceptibility to life threatening infections. The number of persons living with HIV in Texas continues to increase by about 6% a year. This is primarily due to the increased survival after diagnosis that is the result of effective multi-drug HIV treatment. Participation in the THMP has allowed clients to achieve higher levels of viral suppression, effectively treating HIV and extending the longevity of participants. In 2018, 83% of THMP participants achieved viral suppression. These treatment-experienced clients are often on increasingly complex drug regimens that have increased associated costs; in 2004, 23% of ADAP clients were on regimens of four or more anti-retroviral medications, while in 2019, about 48% of the clients were on such regimens. DSHS has also implemented programs to increase availability of HIV testing in most urban areas Texas, increasing the number of diagnosed cases, and therefore demand for THMP services. Increased unemployment and the release of new HIV treatment guidelines recommending an earlier start to drug treatment for persons with HIV may also be playing a role in the increasing demand for services.

SUB-STRATEGY DESCRIPTION JUSTIFICATION:

Chapters 81 & 85 of the HSC direct the program to provide leadership, guidance, funding and data about HIV/STD, with authority to administer HIV/STD services programs. HIV care and treatment activities supported by these funds not only extend the lives of persons living with HIV but also reduce the risk of transmission to others by controlling viral load; this includes prevention of HIV transmission during pregnancy to the unborn children of persons who are pregnant living with HIV. HIV services also help delay the onset of life-threatening illnesses. HIV/STD services include: outpatient medical care; case management; dental care; some assistance with HIV medications not provided through the Texas HIV Medication Program; mental health care; housing assistance; food bank; transportation; hospice care; insurance assistance; nutrition services; home health care; substance abuse treatment/counseling; and referrals. Those services are provided through contracts with local agencies. These services maintain clients in

community-based and outpatient treatment settings, thus reducing taxpayer-supported health care costs.

SUB-STRATEGY EXTERNAL/INTERNAL FACTORS:

Early and continual access to clinical care for persons with HIV extends productive life and reduces the infectiousness of people with HIV infection. However, about 1 in 5 persons with HIV infection in Texas receives a late diagnosis. Additionally, approximately 70% of all the Texans with a diagnosis participate in care consistently. Programs funded in this sub-strategy have been demonstrated to increase retention in care, with more than 90% of Ryan White program clients showing consistent care. The reasons for late diagnosis and inconsistent care include the asymptomatic nature of HIV infection, economic and cultural barriers, age, alcohol/drug abuse, homelessness, mental illness and denial of risk. These programs continue to serve an increasing number of clients because of their success in retaining clients. The continued growth in HIV prevalence and increasing medical service costs may potentially limit the number of clients that can be served.

FTE: FULL TIME EQUIVALENTS						

SUB-STRATEGY DESCRIPTION JUSTIFICATION:

Chapters 81 & 85 of the Health and Safety Code mandate DSHS to provide HIV/STD prevention and surveillance programs. HSC, Chapter 96, Bloodborne Pathogen Control, mandates prevention and control activities for viral hepatitis and HIV. In 2018, Texas ranked 2nd in the reported number of gonorrhea cases, and has ranked 2nd in the number of gonorrhea cases from 2014-2018. From 2014-2018, Texas has also ranked 2nd in the number of chlamydia cases. In 2018, Texas ranked 4th in the reported number of primary and secondary syphilis cases. Texas ranked 1st in 2018 for the number of Congenital Syphilis cases, reporting 367 cases. This sub-strategy provides support for focused testing, education, and risk reduction support for persons at very high risk of acquiring HIV, syphilis, gonorrhea and chlamydia testing to prevent infertility in women; partner services to inform partners of potential exposures; prevent perinatal transmission of HIV and syphilis to infants; and linkage to treatment for HIV and other STDs. This sub-strategy also provides limited treatment drugs for gonorrhea, chlamydia, and syphilis to local and regional health offices for uninsured and underinsured persons. Disease surveillance, data gathering, and epidemiological analysis support HIV/STD activities by providing the information on recent infections needed to direct disease intervention services at individual and community levels, and to assure appropriate allocation of prevention and care resources and to evaluate program effectiveness.

CODE	Sub-Strategy Detail	Exp 2019	Est 2020	Bud 2021	Req 2022	Req 2023
	Youth, persons of color, and sexual minorities show the highest rates of STD; the burden of HIV on persons of color and sexual minority communities is also high. Studies have demonstrated that HIV and STD are also associated with poverty and lack of health insurance. Shame, stigma, lack of access to consistent healthcare, cultural barriers, age, substance use, unstable housing, and denial of risk create obstacles in receiving timely prevention services. The groups most in need of testing, treatment, and risk reduction services are difficult to reach and require highly focused and tailored services as well as community-based outreach, which consider the significant barriers to care. There are successful, science-based programs shown to reduce risk, but such programs require highly skilled staff and coordination with other community resources. Many living with HIV/STD wait until the disease has progressed before seeking treatment. Prevention activities can identify these individuals prior to or earlier on in their infection and provide linkages into care resulting in a reduction in the transmission of disease to others and burden of disease on the community.

SUB-STRATEGY DESCRIPTION JUSTIFICATION:

Texas Health and Safety Code Chapter 81 provides authority to establish and administer a tuberculosis (TB) program to protect communities across Texas from the spread of TB by providing leadership, policy development to assure provision of coordinated care to persons with active TB disease, their close contacts and other persons at high risk for TB infection, and by assuring a system of care is in place to manage clients diagnosed with TB disease or infection. Texas Administrative Code Rule 97.3 cites Hansen’s disease as a notifiable condition. TB and Hansen’s disease surveillance, epidemiology, screening, diagnosis, treatment, case management and education are essential public health services critical to the safety of communities and reducing the impact of multi-drug and extensively drug resistant TB as well as Hansen’s disease in Texas.

SUB-STRATEGY EXTERNAL/INTERNAL FACTORS:

TB is an airborne disease and the number of undiagnosed persons with TB infection and TB disease challenge prevention and control efforts. Providers are not always aware of the signs and symptoms of TB disease resulting in delayed diagnosis. When this occurs, countless individuals are unknowingly exposed to TB. Additionally, the increasing rates of persons with TB and diabetes and other co-morbid conditions add layered complications to treatment. The rising costs of testing methodologies and medications coupled with the number of persons requiring care are an ongoing challenge. Early access to clinical care for persons with TB disease is critical to prevent continued transmission and/or further deterioration of health. Hansen’s disease, also known as leprosy, is often misdiagnosed as a dermatologic condition, delaying diagnosis and contributing to the development of extensive disease. It is a disease affecting the skin and peripheral nerves. It is thought to be transmitted by nasal secretions from persons with untreated disease. Although the number of persons diagnosed with Hansen’s disease is relatively low, more than 60% of persons diagnosed require treatment for two years given the development of extensive disease.

Full-Time Equivalents:		9.3	5.2	5.4	5.4	5.4
FTE: FULL TIME EQUIVALENTS						

SUB-STRATEGY DESCRIPTION JUSTIFICATION:

Texas Health and Safety Code, Chapters 81 and 89, require specific information regarding notifiable conditions be provided to the Texas Department of State Health Services. The rules and regulations for reporting tuberculosis have been adopted in the Texas Administrative Code, Chapter 97. TB surveillance monitors and analyzes data on TB disease and infection. Disease surveillance, data gathering, and epidemiological analysis support TB activities by providing the information on recent infections, cases, and contacts needed to direct disease intervention at an individual level, and to assure appropriate allocation of prevention and care resources and to evaluate program effectiveness. Data collected include, but are not limited to, demographic, diagnostic, and geographic information. Surveillance also involves TB genotyping, which assists in identifying unknown transmission relationships, establishing outbreaks, detecting false positives and laboratory cross-contamination events and distinguishing recent disease from activation of old disease.

SUB-STRATEGY EXTERNAL/INTERNAL FACTORS:

Early detection of disease is paramount to control the spread of TB. Timely reporting of both disease and infection are critical to successful disease control and prevention efforts. TB surveillance enhances clinicians' and DSHS's ability to control the spread of disease, develop prevention strategies and policies, and respond to events involving potential exposure to TB disease.

CODE	Sub-Strategy Detail	Exp 2019	Est 2020	Bud 2021	Req 2022	Req 2023
FTE:	FULL TIME EQUIVALENTS					

SUB-STRATEGY DESCRIPTION JUSTIFICATION:

The sub-strategy supports the DSHS regional staff that provide case management, personal care services, and provider relations support to the Texas Health Steps Children’s Medicaid program administered by HHSC. The program is supported through an Interagency contract with HHSC and matching federal Medicaid administration funds.

SUB-STRATEGY EXTERNAL/INTERNAL FACTORS:

Regional staff monitors changes in CHIP and Medicaid services coverage, particularly as it relates to regional case management services and information necessary for provider relations activities. Patient participation is affected by the supply of providers, patient access to these providers, and by patient experiences with preventive and primary care. Provider participation is often dictated by economic factors, such as the amount of reimbursement for services. The program is also affected by changes in community delivery systems, such as managed care, as well as the impact of any changes in Medicaid eligibility and enrollment.

GOAL: 02 Community Health Services
 OBJECTIVE: 01 Promote Maternal and Child Health
 STRATEGY: 01 Women and Children's Health Services
 SUB-STRATEGY: 02-01-01-02 Population Based Services

CODE	Sub-Strategy Detail	Exp 2019	Est 2020	Bud 2021	Req 2022	Req 2023
------	---------------------	----------	----------	----------	----------	----------

SUB-STRATEGY DESCRIPTION JUSTIFICATION:

The Maternal and Child Health program develops, disseminates, and implements state-wide systems of care for expectant mothers, infants, children, and adolescents via data-driven, evidence-based initiatives that focus on: reducing maternal mortality and morbidity; reducing infant mortality; child fatality review and injury prevention; newborn screening care coordination; newborn hearing screens; vision and spinal screening; oral health surveillance; improving adolescent health; school-based health centers; and, water fluoridation monitoring. Through the state-wide needs assessment process, this program establishes state and federal performance goals and addresses systemic improvement in public health outcomes. The sub-strategy serves as a pass-through for federal rape prevention education funding to the state Attorney General’s Office.

SUB-STRATEGY EXTERNAL/INTERNAL FACTORS:

Title V of the Social Security Act directs and provides funds to support an array of safety net services and public health initiatives to women who are pregnant or wish to become pregnant, infants, children and adolescents (age 0-21) through the Maternal and Child Health Block Grant and matching state maintenance of effort (MOE). The state is required to spend no less than 30% of the block grant on children and adolescents. General revenue appropriated to this strategy counts toward the required \$40.2M annual MOE expenditure. The block grant requires a state-wide comprehensive needs assessment every five years with interim assessments annually.

Full-Time Equivalents:		34.4	35.5	36.8	35.1	35.1
	FTE: FULL TIME EQUIVALENTS					

SUB-STRATEGY DESCRIPTION JUSTIFICATION:

Chapter 773 of the Health and Safety Code directs DSHS to develop a statewide emergency medical services (EMS) and trauma care system which is fully coordinated with all EMS providers and hospitals, including pediatric emergency services. The purpose of this program is to decrease morbidity and mortality due to emergency health care situations, particularly injuries. The program includes oversight and system integration of EMS personnel and providers; designation of four levels of trauma facilities, three levels of stroke facility designation; regional EMS/trauma system planning, development, and designation; and the assurance of coordination and cooperation between contiguous states. Additionally, it provides funding for EMS providers, first responder organizations, trauma systems Regional Advisory Councils, and hospitals; and EMS/trauma education, public information, and prevention activities statewide. Chapter 773 of the Health and Safety Code also requires DSHS to construct an emergency treatment system to quickly identify and transport stroke victims to appropriate stroke treatment facilities. The stroke program also includes regional EMS/stroke system planning and development. This strategy contributes to the statewide goal of promoting the health and safety of the people of Texas by improving the quality of emergency health care services.

SUB-STRATEGY EXTERNAL/INTERNAL FACTORS:

DSHS has worked to develop regionalized systems of emergency health care that coordinate public and private resources to promote optimal outcomes for trauma and stroke patients. These systems are still under development in many areas. Pre-hospital EMS is not considered an essential service; therefore, no governmental entity is required to assure its availability. Texas has an under-funded “patchwork” system of EMS providers (i.e. volunteer, county, private, etc.). Due to aging EMS personnel, difficulty in recruitment and retention, and decreasing EMS volunteerism, many rural communities have little or no pre-hospital services. In addition, hospitals continue to face budget constraints and must compete for funded patients, resulting in the closure of many hospitals. Hospitals must also confront the challenge of obtaining and maintaining required physician services in specialties such as neurosurgery, to seek or maintain designation as a trauma and/or stroke facility. Both programs have demonstrated the ability to

GOAL: 02 Community Health Services
 OBJECTIVE: 02 Strength Health Care Infrastructure
 STRATEGY: 01 EMS and Trauma Care Systems
 SUB-STRATEGY: 02-02-01-02 Provider Regulations

CODE	Sub-Strategy Detail	Exp 2019	Est 2020	Bud 2021	Req 2022	Req 2023
------	---------------------	----------	----------	----------	----------	----------

SUB-STRATEGY DESCRIPTION JUSTIFICATION:

The EMS and Trauma Care Systems program conducts licensing activities, quality assurance, and does the designation of Maternal and/or Neonatal Level of Care for hospitals. The program licenses over 68,000 EMS personnel, over 800 ambulance EMS providers, and over 500 first responder organizations. Additionally, the program helps build systems in communities and serve as subject matter experts in communities on their needs. The EMS and Trauma Care Systems program conducts quality assurance of the care that is being provided the licensees. The program receives the applications and surveys, and designates hospitals with the Maternal and/or Neonatal Level of Care. The Maternal Level of Care Designation and/or Neonatal Level of Care Designation is an eligibility requirement for hospital Medicaid reimbursement for neonatal and maternal care. Hospitals offer services, facilities and beds for use for more than 24 hours for two or more unrelated individuals requiring diagnosis, treatment or care for illness, injury, deformity, abnormality or pregnancy; and regularly maintain, at a minimum, clinical laboratory services, diagnostic x-ray services, treatment facilities including surgery or obstetrical care or both, and other definitive medical or surgical treatment of similar extent.

SUB-STRATEGY EXTERNAL/INTERNAL FACTORS:

Due to aging EMS personnel, difficulty in recruitment and retention and decreasing EMS volunteerism, many rural communities have little or no pre-hospital services. EMS licensees may reduce over time due to this trend. House Bill 3433, Eighty-fourth Legislature, Regular Session, created the level of care designations for hospitals that provide neonatal and maternal level of care. The neonatal level of care designation is an eligibility requirement for Medicaid reimbursement beginning on September 1, 2019. The designation of maternal level of care is an eligibility requirement for Medicaid reimbursement beginning on September 1, 2021.

DESCRIPTION / JUSTIFICATION:

This exceptional item would provide \$32.6 Million(\$30.5 Million General Revenue funds) over the 2022-2023 biennium for the following items:

- Maintain Infectious Disease Infrastructure (Coronavirus Response): \$21.7 Million in General Revenue funds and 88 FTEs over the biennium (15 FTEs in FY2022 and 88 FTEs in FY2023) to support critical infrastructure needed to maintain public health testing – including reagents and staff, infectious disease surveillance, and local health department support that aligns with the core public health functions that existed at DSHS prior to the COVID-19 pandemic.

Agency code: 537

Agency name: State Health Services, Department of

CODE	DESCRIPTION	Excp 2022	Excp 2023
------	-------------	-----------	-----------

- Fully Implement Newborn Screening for Spinal Muscular Atrophy(SMA): \$4.2 Million in All Funds (\$2.1 Million GR) & 14 FTEs will support the full implementation of testing Texas newborns for SMA. It is anticipated the revenue generated by adding SMA will pay for the cost of the test in future years. SMA is a genetic disorder that is currently incurable, but timely treatment can halt the progression of SMA disease & allow children to live longer, more healthy lives. Disease progression often involves muscle weakness to the point of difficulty breathing and fatal outcomes.

- Texas Center for Infectious Disease (TCID) Shortfall: \$6.7 Million over the biennium to support the operation of TCID following the depletion of CMS Delivery System Reform Incentive Payment (DSRIP) revenue and other one-time funds. TCID has historically absorbed some of its expenses through funds received by participating in the CMS DSRIP program. However, DSRIP is coming to an end and so this funding source is not sustainable. Once the revenue is depleted, TCID will face an annual shortfall. This item also includes funding for medical inflation and capital needs. Without funds to continue the support of this facility, TCID would have to shutter bed capacity in order to maintain solvency, thus reducing the ability of Texas to contain the spread of this highly contagious and deadly disease.

EXTERNAL/INTERNAL FACTORS:

Maintain Infectious Disease Infrastructure: The coronavirus pandemic has highlighted the need for robust public health infrastructure. Throughout the pandemic, DSHS and local public health partners have worked tirelessly to build this robustness amid historic levels of infection and hospitalizations. To do this, DSHS has relied on federal funds to support COVID-19 testing, vaccine preparations, and infectious disease surveillance. DSHS has used these funds to stand up high volume COVID-19 testing; develop IT infrastructure to handle massive amounts of data that could not be supported by older IT solutions; better track the spread of COVID-19 through disease investigations; and to support local health departments that have remained overwhelmed throughout the pandemic.

The demands prompted by COVID-19 will continue until the population becomes vaccinated or immune; however, federal funds supporting the COVID-19 response are expiring in FY21-22. Without ongoing funding, Texas’s ability to manage the presence of COVID-19 and other emerging diseases will reduce sharply and leave Texas more vulnerable to the impact of this virus.

Spinal Muscular Atrophy (SMA): The DSHS Lab is a unique and essential foundation for much of DSHS’s public health work. One of these essential functions is newborn screening, which allows for timely identification of treatable conditions through two screenings of every newborn in Texas.

The 86th Legislature provided DSHS authority to access funds to add new screens with LBB and Governor’s Office approval. In July 2020, DSHS received approval to expend funds in FY21 to prepare for SMA screening. However, funds in FY22-23 will be needed to fully implement SMA screening.

TCID Shortfall: TCID treats patients from across Texas with acute and complex cases of tuberculosis (TB). TB can be highly infectious, posing a risk to the community if not properly treated, and can result in catastrophic and/or costly outcomes.

PCLS TRACKING KEY:

NA

DESCRIPTION OF IT COMPONENT INCLUDED IN EXCEPTIONAL ITEM:

Infectious Disease:

The COVID-19 pandemic has strained Texas resources in unprecedented ways. The increased demand to have timely and consistent data across all data sets and systems related to COVID-19 has resulted in ongoing software and maintenance costs for data visualization, analytics, reporting, and communication with the public. The software

Agency code: 537

Agency name: State Health Services, Department of

CODE	DESCRIPTION	Excp 2022	Excp 2023
------	-------------	-----------	-----------

and maintenance costs are needed to maintain the levels for improved accuracy, completeness, and quality of the health data collected and reported by DSHS in response to COVID-19.

Spinal Muscular Atrophy:

Modifications to the laboratory information management system (LIMS) application will be covered by current maintenance contract with the application vendor with minimal interaction by IT Lab Apps Dev staff to promote the modifications to the Production server. Out year costs are for application maintenance related to these modifications, at a cost of \$36,390 annually.

IS THIS IT COMPONENT RELATED TO A NEW OR CURRENT PROJECT?

CURRENT

STATUS:

Infectious Disease:

New request for consideration by the 87th Legislature.

Spinal Muscular Atrophy:

Contract for LIMS application modifications and maintenance already exists.

OUTCOMES:

Infectious Disease:

- Data received from external sources such as external labs are complete, accurate and timely.
- Improving the efficiency and accuracy of data movement between systems.
- External decision makers are provided with accurate metrics regarding the spread of COVID-19 in the state, in support of the state's response including the Road to Recovery.

Spinal Muscular Atrophy:

LIMS application modifications and maintenance will allow for testing to occur; without these activities testing cannot be performed.

OUTPUTS:

Infectious Disease

- Standardized infectious disease analytics with initial focus on COVID-19
- Reduce the time required to import daily records and eliminate the risk of performance issues caused by importing lab report records during normal production hours.
- Provide and maintain improved efficiency in the coordinated statewide approach to the COVID-19 disease response by automating slow processes.

Spinal Muscular Atrophy:

The successful completion of the LIMS application modifications prior to the implementation of testing and on-going maintenance of the LIMS application will ensure test results are reported in a timely manner to assist with patient diagnosis and treatment.

TYPE OF PROJECT

Other Administrative Functions

Agency code: 537 Agency name: State Health Services, Department of

CODE	DESCRIPTION	Excp 2022	Excp 2023
------	-------------	-----------	-----------

ALTERNATIVE ANALYSIS

Infectious Disease:

DSHS received federal funds to modernize technology for infectious disease analytics and reporting. Continued funding is also needed for the ongoing software and hardware costs in support of the National Electronic Disease Surveillance System, Texas Health Trace, data integration of infectious disease data sources, public health lab electronic ordering and reporting, and the Texas Health Safety Network.

Spinal Muscular Atrophy:

The Legislature has provided funding to implement testing for SMA; however, funding will be needed to perform the testing starting 11/01/2021. If the total amount of funding is not provided, then the testing cannot occur and will have a negative impact on the lives of Texans who will develop SMA. SMA causes an increasing debilitating disease that ultimately results in death. Several treatment options for SMA are available, but once the disease progression begins, the damage cannot be repaired.

ESTIMATED IT COST

2020	2021	2022	2023	2024	2025	2026	Total Over Life of Project
\$0	\$0	\$0	\$3,872,289	\$7,411,252	\$7,411,252	\$7,411,252	\$05,269,956

0.0	0.0	0.0	21.0	19.0	19.0	19.0

DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :

Infectious Disease:

The ongoing costs are for maintaining technology changes implemented for the public health infectious disease response. This includes software, hardware, and staff augmentation in support of infectious disease analysis and reporting.

Spinal Muscular Atrophy:

Revenue from the SMA newborn screening will cover the ongoing costs. The ongoing costs are testing supplies and staff to perform the test.

DESCRIPTION / JUSTIFICATION:

This exceptional item would provide \$18.7 Million in General Revenue over the 2022-2023 biennium to ensure rural and frontier communities have greater access to essential public health services and to improve patient care with an electronic health records system.

- Rural and Frontier Clinic Services: \$13.3 Million in GR and 36 FTEs over the biennium to provide a mix of leased office space and mobile clinics to provide essential public health services to underserved rural and frontier communities.

- o Fifteen additional rural and frontier satellite field offices, serving approximately 600,000 Texans. The addition of essential public health services in rural and frontier communities would provide much-needed services related to core public health functions including surveillance, treatment, and prevention of infectious diseases.

- o Three Mobile Clinic vehicles and support staff to serve harder-to-reach areas. This pilot program is being pursued to evaluate if the mobile solution will use less overhead to operate, offer greater flexibility in service delivery, and have the added benefit of being deployable assets in emergencies and disasters.

- Electronic Health Records (EHR) for Regional Offices: \$5.4 Million and 3 FTEs over the biennium to establish and maintain an electronic health record system to enhance care

Agency code: 537

Agency name:
State Health Services, Department of

CODE	DESCRIPTION	Excp 2022	Excp 2023
------	-------------	-----------	-----------

for 60,000 patients served annually by DSHS public health regional offices. Establishment of EHR technology will improve the regional offices' ability to bill for services; increase patient data confidentiality and security; and better streamline clinical workflows.

EXTERNAL/INTERNAL FACTORS:

85 percent of the state's geography is covered by DSHS regional offices as the primary public health provider. Annually, Texans visit DSHS regional offices nearly 60,000 times at 90 locations served by 160 clinical staff. DSHS staff provide critical public health and clinical services such as providing vaccinations, tuberculosis surveillance, and sexually transmittable disease screening. They also are a primary provider of community health education and engagement in many rural and frontier counties.

Instances like the COVID-19 pandemic have highlighted the necessity for core public health services in rural and frontier areas of the state. Limited capacity means that DSHS regional offices often struggle to adequately respond to requests from local leadership for public health services in support of disease reduction, healthy living and economic stability and population growth.

Despite this need and demand, the network and operations of DSHS regional offices has remained relatively stagnant over the years. Frontier and rural areas need more consistent access points to public health, and yet DSHS regional offices are unable to provide that consistency. Lack of technology leaves sensitive patient records vulnerable to security issues and can be a risk to patient safety and effective care delivery. By creating a more comprehensive rural and frontier public health network with access to secure technologies, Texas can better assure essential public health services across Texas with a focus on rural and frontier communities.

PCLS TRACKING KEY:

NA

DESCRIPTION OF IT COMPONENT INCLUDED IN EXCEPTIONAL ITEM:

Rural and Frontier Clinic Services:

Network installation at 15 new DSHS Public Health Clinic physical locations. Costs for 15 physical clinic locations include Cisco 4421 Router/9300 Switch bundle; Uninterruptable Power Supply; Router, Switch, and UPS Installation; cable installs; and contingency costs. Twelve sites will have a 2Mbps Ethernet Circuit Monthly Reoccurring Cost.

Proposed Hardware:

Cisco 4421 Router/9300 Switch bundle; Uninterruptable Power Supply

Electronic Health Records

Data center services, software licensing, implementation services to create a new electronic health record, staff augmentation for implementation, and full time equivalents for sustainable support of the new electronic health record.

Proposed Software

Acquire an enterprise electronic health record system

Proposed Hardware

Data center services

Agency code: 537

STATUS:

N/A

OUTCOMES:

Rural and Frontier Clinic Services:
15 rural clinics

Electronic Health Records

This EHR system will accomplish the following objectives:

- Improved health care quality, efficiency and patient outcomes;
- Improved convenience for patients;
- Improved capacity to obtain and analyze community health data to implement public health interventions;
- Improved capacity to impact the health of groups of patients;
- Improved Public Health Region (PHR) clinic population data to inform public health planning and identify resource needs;
- Increased security and confidentiality of patient health information;
- Improved capacity for complete documentation of clinical services provided that facilitates accurate coding and potentially billing for services;
- Quick access to patient records from inpatient and remote locations for more coordinated, efficient care;
- Enhanced decision support, clinical alerts, reminders, and medical information;
- Performance-improving tools, statistical analysis, real-time quality reporting;
- Legible, complete documentation that facilitates accurate coding and billing and increases revenue;
- Interfaces with labs, registries, and other EHRs;
- Ability to upload and convert hardcopy documents from 3rd party providers into the EHR;
- Improved communications and data exchange between PHRs and state and federal reporting entities.

OUTPUTS:

Electronic Health Records

Performance measures will be established and monitored to enable continuous improvement of patient care delivery. Data from the EHR will be aggregated and analyzed to support performance measure tracking.

TYPE OF PROJECT

Acquisition and Refresh of Hardware and Software

ALTERNATIVE ANALYSIS

Rural and Frontier Clinic Services

If scaled down, resource allocation decisions would be based on public health needs, threats and options.

Electronic Health Records

CODE	DESCRIPTION	Excp 2022	Excp 2023
-------------	--------------------	------------------	------------------

Without an EHR, the reliance on paper documentation and manual processes will continue. Exchange of health information with local health entities and other community partners would continue to occur manually through fax, which is neither time-efficient nor 100% secure. This introduces massive time delays when sharing information with health providers, referring patients for additional services, or participating in peer reviews.

DESCRIPTION / JUSTIFICATION:

This exceptional item would provide \$7.7 Million in General Revenue and General Revenue Dedicated funds over the 2022-2023 biennium to enhance product safety through the use of technically trained staff for food and consumable hemp product safety.

- Food Safety FTEs: \$5.9 Million in GR and GR-D to increase the number of meat safety inspectors operating in DSHS regions in response to SAO audit findings and provided

Agency code: 537

Agency name:
State Health Services, Department of

CODE	DESCRIPTION	Excp 2022	Excp 2023
------	-------------	-----------	-----------

targeted equity adjustments to prevent costly turnovers.

- o To better address deficiencies identified by SAO, 25 FTEs are needed to provide an adequate level of licensure, inspection, and enforcement activities to ensure adequate consumer protection. Sanitarians are the primary staff need (22.5), followed by licensing, permitting, and other specialists (2.5).

- o DSHS also identified targeted equity adjustments to reduce turnover in 130 critical public health sanitarian positions.

- Consumable Hemp Program: \$0.6 Million in GR and 3.4 FTEs to further align the size of the program based on anticipated license and registrations, as well as product testing and enforcement activities required by statute. The revenue generated by the license and registration fees are expected to cover the cost of the additional FTEs.

- Customer Service Efficiency: \$1.2 Million in GR and GRD and 1 FTE to increase the functionality of the existing online licensure and registration system. Improving the online system will streamline licensure and renewal processes for customers, increase security of sensitive information, and improve inspection processes for inspectors working in the field.

EXTERNAL/INTERNAL FACTORS:

DSHS currently licenses nearly 44,000 food manufacturers, food warehouses, & food wholesale & salvage establishments. DSHS licensure protects consumers by reducing incidence of foodborne disease outbreaks & exposure to adulterated & misbranded products. Following an SAO audit in 2019, DSHS identified several improvements to ensure adequate inspections according to standardized risk ratings. It is only possible to implement these improvements with increased inspection & licensing/permitting staff.

DSHS depends on specialized public health sanitarians to accomplish food safety legislative charges & its agency mission, including implementation of actions to address audit findings. These public health sanitarians are also essential to delivering other core public health services, including operating the milk and dairy, drug & medical devices, general sanitation, youth camps, & school cafeteria programs managed by DSHS. For these types of employees, it can take up to two years to train new hires to be fully effective & independent in their job functions. Staff turnover is especially costly for staff in these areas.

This year, DSHS established the consumable hemp program following passage of HB 1325. Licensure, registration, inspection, & enforcement activities are currently allocated among 4.2 FTEs. The volume of registration & random product testing will exceed the capacity of these FTEs. Licensing and registration revenues could cover funding for additional staff, who are needed to ensure products are regularly tested & that consumers are not exposed to products that violate with the statute's safety standards.

Finally, DSHS & its licensees use an online system to track some licensure & registration activities. The current system uses older technologies with inadequate security features, lacks online self-services and is not business friendly. The system issues delay processing times for inspecting, licensing, and relicensing Texas businesses.

PCLS TRACKING KEY:

APPROXIMATE PERCENTAGE OF EXCEPTIONAL ITEM : 15.00%

CONTRACT DESCRIPTION :

Customer Service Efficiency
 Description of Goods or Services to be procured by contract: The funds will be used to Acquire/implement/maintain a document management system, integrate the Regulatory Automated System with the new Document Management System, purchase scanners to upload existing files into the system and secure funding for a project manager. DSHS/HHSC does not have the resources in house to perform the above functions. The products are propriety, so any enhancement / update / integration will require coordination with the software company.
 Type of Contract: Professional
 Duration: 9/1/2021 - 8/31/2023
 Procurement Method: Sole Source/Proprietary Justification for the Regulatory Automated System upgrade and request for proposal (RFP) for document management system.
 Agency Considerations: The project will be a benefit to the department and also all licensed individuals and business entities licensed by DSHS (~200,000). It is anticipated that most, if not all regular mail correspondence will be eliminated. This will not only decrease processing times, but also cost for the department. It is also anticipated that providing electronic submission of documents will reduce errors and that deficiencies will be cleared in a more efficient manner, resulting in faster processing times for licenses.

FULL-TIME EQUIVALENT POSITIONS (FTE):

26.00	26.00
-------	-------

DESCRIPTION / JUSTIFICATION:

This exceptional item would provide \$29.7 Million in General Revenue over the 2022-2023 biennium to support seat management, data center services costs, and the long-term viability of certain public health registries required to continue agency operations.

- Fiscal Management: \$7.6M in GR over the biennium to support additional Fiscal and Contract Management FTEs (25). DSHS will also identify targeted equity adjustment increases to bring critical positions to market level to reduce turnover. Supporting fiscal management staffing needs is critical to addressing deficiencies that could affect the agency's ability to ensure compliance with applicable state, federal, and agency rules, laws, and regulations.

- Data Center Services: \$16.8 Million in GR over the biennium to cover increasing DCS costs. If DSHS does not receive funds for this purpose, DSHS would also be out of

Agency code: 537

Agency name:
State Health Services, Department of

CODE	DESCRIPTION	Excp 2022	Excp 2023
------	-------------	-----------	-----------

compliance with statute and related agreements with DIR.

- Registry System Viability Assessment: \$5.4 Million in GR and 1 FTE to obtain a third-party vendor to conduct an assessment of long-term IT needs of several critical public health registries. The goal of the viability assessment is to inform future requests to transition the EMS/Trauma, Birth Defects, Blood Lead, and THISIS registries to a solution that will ensure appropriate information security infrastructure and the continued ability to scale.

EXTERNAL/INTERNAL FACTORS:

DSHS agency operations rely on a robust business and IT infrastructure to maintain compliance with federal & state statute, security standards, & fiscal management principles.

- Fiscal Management: In response to audit findings and a review of state statute & federal grant requirements, DSHS identified critical needs to ensure sufficient contract management and fiscal monitoring of awarded and appropriated funds. Insufficient fiscal management staffing levels led to deficiencies relating to TCID, maternal & child health grants, & HRSA funds. Supporting fiscal management staffing needs will ensure consistent application of fiscal responsibility measures, including timely billing, payment & cost recoupment.

- DCS: DSHS uses DCS provided by DIR to support needed infrastructure for its information technology (IT) infrastructure.
 - DIR requires agencies to maintain IT applications to ensure security for all DCS participating agencies. Following significant upgrades to infectious disease surveillance systems essential to responding to COVID-19, DSHS must also maintain greater levels of cloud-based DCS support.

- Registry System Viability Assessment: Several mission-critical public health data registries are built on an IT platform that is over a decade old: Texas Birth Defects Registry, Blood Lead Registry, Tuberculosis/Human Immunodeficiency Virus/Sexually Transmitted Diseases Integrated System (THISIS), and the Emergency Medical Services and Trauma Registry (EMSTR). The registries house sensitive data & must comply with federal security standards and must reliably collect, secure, & transmit data related to infectious diseases & other health conditions. However, as the registries continue to grow & their data become increasingly utilized for public health surveillance and interventions, DSHS requires an independent, professional, & unbiased assessment of all registries to determine the best path forward to maintain these confidential data elements.

PCLS TRACKING KEY:

NA

DESCRIPTION OF IT COMPONENT INCLUDED IN EXCEPTIONAL ITEM:

DCS: The Data Center Consolidation project, through the Department of Information Resources, provides data center services such as disaster recovery, private and public cloud server and data storage management, and data center bulk print/mail on behalf of state agencies for the State of Texas. This exceptional item is for continued services within data center services that exceed the current data center capital budget.

Health Registries: Hiring a vendor to assess the four registries and make recommendations for long term strategy. Draft a solicitation for future needs.

Proposed Software: There will be no software procured for this project.

IS THIS IT COMPONENT RELATED TO A NEW OR CURRENT PROJECT?

NEW

4.A. Exceptional Item Request Schedule
87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

DATE: 10/9/2020
TIME: 10:41:55AM

Agency code: 537

Agency name:
State Health Services, Department of

CODE	DESCRIPTION	Excp 2022	Excp 2023
------	-------------	-----------	-----------

STATUS:

DCS: DCS is a standard request from the agency.

Health Registries: New request for consideration by the 87th Legislature.

OUTCOMES:

DCS: The Texas Department of Information Resources currently has two Outcome Measures associated with the Data Center Services program. Both are key performance measures:

- Percent of monthly minimum service level targets achieved for data center services
- Percentage of customers satisfied with data center services contract management

Health Registries: The agency will have the requirements needed for the future of the health registries. Solicitation documents will be produced and can be used for posting if a future implementation project is approved.

OUTPUTS:

DCS: The Texas Department of Information Resources does not currently have enterprise level Output Measures incorporated into the Agency Strategic Plan for the data center services program. However, the data center services contracts include 201 SLAs (104 critical service levels and 97 key service levels), shared among a multivendor model under the coordination of a single service integrator. These service levels are tracked and reported monthly and form the basis for the key Outcome Measure noted above.

Health Registries: Requirements documents for all registries plus solicitation documents to be used for posting if a future implementation project is approved.

TYPE OF PROJECT

Data Center Consolidation

ALTERNATIVE ANALYSIS

DCS: The alternative analysis Gartner conducted in 2005 for the first DCS contract with IBM continues to provide relevant alternative analysis for the Data Center Services program.

The "Expenditure and Facilities Assessment, Validation and Analysis" report analyzed various consolidation processes including in-sourcing (state agency consolidation maintained by state staff) and various outsourcing options (use of state facilities, use of vendor facilities, awarding to multiple service providers, etc.). The review considered technical requirements, timing, risk, savings, and applicable state procurement laws. Based on these and other parameters, Gartner, Inc., recommended an outsourced solution utilizing 2-3 state facilities.

Health Registries: Alternative would be to remain on current systems; however, this is not a long-term solution due to the limitations with the current system.

 TIME: 10:41:59AM

Agency Code:	537	Agency name:	State Health Services, Department of
Category Number:	9000	Category Name:	Cybersecurity
Project number:	3	Project Name:	Cybersecurity

PROJECT DESCRIPTION

General Information

Cybersecurity will focus on protecting computers, networks, programs, and data from unintended or unauthorized access, change, or destruction. Repeated security intrusion attempts into critical systems and infrastructure demonstrates the need for improved security. The security threat to confidential information continues to grow and represents one of the most serious challenges that the Department of State Health Services (DSHS) must confront.

Explanation: DSHS is at continual risk of evolving cybersecurity attacks making the agency's confidential info. vulnerable to unauthorized access. To comply with federal and state mandates, the Info. Security Office must be able to 1) evaluate and improve IT systems controls; 2) sufficiently authenticate users who access or use confidential data; and 3) monitor the complex and critical IT infrastructure. To do so, they need the appropriate tools, knowledge and skills requested in Cybersecurity Advancement.

Category Number:	5007	Category Name:	ACQUISITN CAP EQUIP ITEMS
Project number:	6	Project Name:	DSHS Misc Equipment

PROJECT DESCRIPTION

General Information

Public Health Regional (PHR) offices have refrigerators and freezers onsite to maintain specific temperatures while storing vaccines, other pharmaceuticals, and patient specimens for transport and testing at state & local laboratories to diagnose diseases. The current inventory of refrigerators and freezers in the PHRs needs to be replaced at regular intervals as these units fail, and as program requirements become more restrictive (e.g., cold chain requirements for vaccines). PHRs may also serve as backups for vaccine storage for other PHR sub offices and for local health entities and local providers for the Texas Vaccines for Children Program and the Adult Safety Net Program.

Project number:	8	Project Name:	EMS Trauma Registry

PROJECT DESCRIPTION

General Information

The Office of Injury Prevention oversees the daily operations and strategic planning of the Emergency Medical Services (EMS) and Trauma Registries (Registries system), which is supported by the Maven application. The purpose of the Registries is to collect, maintain, and disseminate complete and accurate injury data. DSHS is requesting an exceptional item to obtain a third-party vendor to conduct an assessment of long-term IT needs of several critical public health registries.

Category Number:	5005	Category Name:	ACQUISITN INFO RES TECH.
Project number:	11	Project Name:	HRAR Implementation

PROJECT DESCRIPTION

General Information

DSHS is developing an integrated information system to better serve Texans requiring HIV services. Currently, three separate systems are used in this area: HIV2000, ARIES, and prevention Microsoft Access Databases. The new system is an acronym formed from the name of the three current systems and is known as HRAR. This system will replace and integrate the functions of the three current systems used by the agency, contractor staff, and clients to apply for and administer HIV Medication, Prevention, and Care Programs.

Project number:	15	Project Name:	ITEAMS Replacement

PROJECT DESCRIPTION

General Information

The project is to acquire and implement an automated and integrated system which combines a warehouse and inventory system, a pharmacy system with access to other entities, and an integrated shipping system with distribution functionality to replace the ITEAMS application. The ITEAMS Application has become Food and Drug Administration (FDA) non-compliant and no longer meets the business needs of the Pharmacy Branch. ITEAMS requires a functional solution to better meet the program areas business needs. ITEAMS will need to be upgraded or a growing risk to mission critical medication deliveries will continue. This effort is required to: meet the FDA standards; meet the existing Pharmacy needs; and c. resolve system bugs, issues and errors.

Agency Code:	537	Agency name:	State Health Services, Department of
Category Number:	5003	Category Name:	REPAIR OR REHABILITATION
Project number:	16	Project Name:	Laboratory Repair and Renovation

PROJECT DESCRIPTION

General Information

The DSHS Laboratory provides test results used for the treatment of infectious diseases, metabolic and genetic disorders, and some chronic diseases. In addition, the laboratories provide testing to support food safety and ensure drinking water is safe to consume. Further, the DSHS laboratory have traditionally provided testing to support public health surveillance programs such as tuberculosis, food safety, and vector borne diseases. The ability to quickly provide accurate and reliable test results depends on properly functioning building infrastructure. As existing DSHS laboratory buildings age, the system infrastructure requires more maintenance or in some cases complete replacement of system components. In addition, renovations to existing laboratory space are needed to efficiently and effectively utilize space as technologies and testing methods change.

Project number:	30	Project Name:	Data Integration

PROJECT DESCRIPTION

General Information

The COVID-19 data integration project will provide an analytics platform for DSHS Data Analysts to research and analyze answers to COVID-19 related questions from various stakeholders including DSHS executives, Governor’s office and the State Legislature. There is need for DSHS epidemiologists and analysts to have access to all the COVID-19 Case, Laboratory, Demographic and other relevant information for research and analysis. Currently this is in different systems and spreadsheets, stored in different locations with no provision to use analytical tools to generate insights and findings.

Explanation: This project will integrate Texas Health Trace, NEDSS for COVID-19 Case Investigation & COVID-19 surveillance data, as well as other data sources for hospitalization, fatalities, & syndromic surveillance. This will allow DSHS to analyze all aspects of COVID-19 data across all 259 counties. This integration will allow an improved Texas COVID-19 response by providing government & health officials the information & data needed to create robust health policy & guidance.

Project Location: Central Office

Beneficiaries: DSHS clients, Texas citizens, local health departments, DSHS employees.

Frequency of Use and External Factors Affecting Use:

Agency Code:	537	Agency name:	State Health Services, Department of
Category Number:	5005	Category Name:	ACQUISITN INFO RES TECH.
Project number:	32	Project Name:	Texas Health Safety Network (TxHSN)

PROJECT DESCRIPTION

General Information

The Texas Healthcare Safety Network (TxHSN) was established in in response to Chapter 98 of the Texas Health and Safety Code and 25 Texas Administrative Code, Chapter 200 to develop an online database that allows DSHS staff to manage and display healthcare facility-specific reports of health care-associated infections (HAIs) and preventable adverse events (PAEs) data. TxHSN compiles the reported healthcare safety data from general hospitals and ambulatory surgery centers into facility-specific data reports that are then posted on the DSHS public website. Facility users can log in to the online database to update contact information, review data reports, and provide comments that will be displayed on the publicly posted reports.

The project will use data modeling to define and analyze data requirements needed to support the business process changes and use data mapping to create a map between the TXHSN registry and National Healthcare Safety Network (NHSN) data models to align with data transmitted to and received from the Centers for Disease Control and Prevention (CDC).

Due to continuing quality issues with the current application, DSHS will procure a solution that will provide a better-quality application to meet the business needs of the program. The replacement system will allow DSHS to improve reporting and tracking of HAIs, including those for COVID19. The new system will also be augmented to track infection control assessment and response (ICAR) activities in response to the COVID19 pandemic.

87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

DATE: 10/9/2020
TIME: 10:41:59AM

Explanation: This project is the result of a legislative mandate requiring the DSHS TXHSN registry to align w/the CMS. Healthcare facilities will report each HAI occurrence to the DSHS regardless of whether the facility participates in Medicare. Replacement of the system will allow the agency to develop&implement a system that would continue to meet the business needs of the program to conduct&track the results of interventions taken in response to infections, including those related to the COVID19 pandemic.

Project Location: Central Office

Beneficiaries: DSHS Clients/Texas Citizens

Explanation: Covid-19 Surveillance is becoming a core method for the State of Texas to track outbreaks of infectious diseases such as Covid-19. Covid-19 Surveillance relies on accurate reports with sufficient drill down to best target efforts to contain an epidemic. Reporting and additional metrics will be needed. In addition, user provisioning can have increased automation to allow for fewer manual processes and streamline operations.

Category Number:	5005	Category Name:	ACQUISITN INFO RES TECH.
Project number:	36	Project Name:	Laboratory EOR

PROJECT DESCRIPTION

General Information

This project is for the implementation of electronic data entry and reporting to reduce data entry and reporting errors and reduce the turn-around-time for results to parties that have submitted samples.

While the Laboratory Services Section (LSS) has some limited capabilities for receiving and reporting electronic data, a comprehensive system must be developed for robust data automation. The LSS proposes an Electronic Ordering and Reporting (EOR) Initiative for the development of an electronic data entry and result reporting system. This EOR initiative will consist of a secured system that would meet the needs of the Department of State Health Services (DSHS), its partners, and health care providers. Ideally, the system would receive electronic sample ordering data and report electronic sample result data for all existing and future Laboratory Information Management System (LIMS), as well as receive electronic supply orders. Implementation of electronic data entry and reporting improves data entry and reporting error rates. In addition, this system shortens turn-around-time which allows the laboratory to provide quicker, more reliable results to physicians and healthcare providers, public health programs, epidemiologists, and environmental organizations that depend on it. Such a system would also increase the Laboratory's ability to bill for all billable services.

Project number:	39	Project Name:	Network Infrastructure

PROJECT DESCRIPTION

General Information

This project will upgrade the DSHS network infrastructure. Continual upgrades, expansions and refreshes of network infrastructure are required to consistently provide secure, scalable, reliable, efficient, affordable and technologically advanced network services to all DSHS programs and the constituencies they serve. Updating network equipment, WAN infrastructure and secure access for remote workers is critical for continuing to provide a secure reliable network to meet agency business needs in delivering critical services to citizens of Texas. A secure network is essential in ensuring confidential citizen data is protected from unauthorized access. The primary focus is on strategic directions to improve service delivery, security, availability, scalability and integration of the DSHS network. These project initiatives further support DSHS business objectives to expand capabilities for teleworking, mobility, and an alternative office workforce.

Category Number:	5007	Category Name:	ACQUISITN CAPEQUIP ITEMS
Project number:	40	Project Name:	Pharmacy Equipment

PROJECT DESCRIPTION

General Information

The DSHS Pharmacy is in need of a new repackaging machine used for the repacking of Tuberculosis and Sexually Transmitted Disease medications that are provided to regional and local health departments for patient use. The current repackaging machine is obsolete and because of this, software updates have been discontinued by the manufacture, Prata, and will no longer be supported. If the repackaging machine were to malfunction, DSHS runs the risk of no longer being able to repackage medications in bulk to support programs.

The DSHS Pharmacy Branch sends a large number of HIV medications to clients that may have difficulty accessing transportation and getting to their pharmacy. This can be a barrier to remaining adherent to medication and remaining virally suppressed. If a person discontinues HIV medication, the amount of virus will increase to a detectable level and increases the chance of transmitting the disease.

Explanation: The DSHS Pharmacy is licensed by the Food & Drug Admin (FDA) as a repackager/relabeler of drugs. If licensed as a mail order pharmacy, DSHS could provide medications directly to client's home without using a commercial pharmacy. The repackaging machine is used to repackage meds for TB Direct Observed Therapy, to treat active TB, and for STD meds. The current machine is obsolete.

Project number:	41	Project Name:	Pharmacy Software

PROJECT DESCRIPTION

General Information

Pharmacy software is the system of record for pharmacy functions and automates key activities including inventory management, regulatory compliance, and dispensing prescriptions efficiently. The software must have the capacity to handle non-sterile compounding of pediatric tuberculosis drugs. The software must have the following capabilities:

- Process prescriptions end-to-end to satisfy Federal track and trace;
- Allow for drug utilization reviews;
- Store patient medical and prescription history in a secure fashion;
- Process compounded prescriptions;
- Provide for the appropriate and approved Texas State Board of Pharmacy (TSBP) labeling guidelines;
- Provide for forms management;
- Manage inventory;
- Provide for automated/online refills;
- Provide a pill database.

Explanation: There are approximately 75 pediatric TB patients, 50 of whom are two years old or younger, in the state each year who have difficulty accessing their required medications. The pediatric TB medication must be made by non-sterile compounding. The software will enable the Pharmacy to become a registered Class A pharmacy to compound these lifesaving TB drugs and deliver them to patients. Pharmacy software is required by the Texas State Board of Pharmacy (TSBP) to issue a Class A pharmacy license.

PROJECT DESCRIPTION

General Information

The design and functionality of the DSHS public and intranet websites have not been fundamentally updated since 2010 and need a comprehensive redesign. Since a majority of DSHS communications occur via the web, it's critical to conduct due diligence to understand the needs of customers and employees and provide them with a superior user-experience, while also aligning with DSHS's strategic public health goals.

COMPARISON TO STATEWIDE HUB PROCUREMENT GOALS

A. Fiscal Year - HUB Expenditure Information

Statewide HUB Goals	Procurement Category	% Goal	HUB Expenditures FY 2018			Total Expenditures FY 2018		HUB Expenditures FY 2019			Total Expenditures FY 2019	
			% Actual	Diff	Actual \$	% Goal	% Actual	Diff	Actual \$	FY 2019		
11.2%	Heavy Construction	11.2 %	0.0%	-11.2%	\$0	\$0	11.2 %	0.0%	-11.2%	\$0	\$31,955	
21.1%	Building Construction	21.1 %	0.4%	-20.7%	\$15	\$3,734	21.1 %	4.2%	-16.9%	\$357	\$8,587	
32.9%	Special Trade	32.9 %	50.3%	17.4%	\$428,976	\$853,015	32.9 %	-7.1%	-40.0%	\$-22,404	\$314,560	
23.7%	Professional Services	23.7 %	14.2%	-9.5%	\$33,723	\$238,225	23.7 %	0.1%	-23.6%	\$397	\$434,070	
26.0%	Other Services	26.0 %	28.4%	2.4%	\$20,657,566	\$72,787,385	26.0 %	26.7%	0.7%	\$14,188,065	\$53,205,351	
21.1%	Commodities	21.1 %	2.7%	-18.4%	\$4,747,722	\$175,737,892	21.1 %	2.2%	-18.9%	\$3,299,478	\$146,759,619	
	Total Expenditures		10.4%		\$25,868,002	\$249,620,251		8.7%		\$17,465,893	\$200,754,142	

B. Assessment of Fiscal Year - Efforts to Meet HUB Procurement Goals

Attainment:

1. The agency attained or exceeded two (2) of the four (4) applicable procurement category agency HUB goals in Fiscal Year 2018.
2. The agency attained or exceeded one (1) of the four (4) applicable procurement category agency HUB goals in Fiscal Year 2019.
3. During the fiscal year 2018 and 2019 the Department of State Health Services (DSHS) spent \$25,868,002 (or 10.36%) and \$17,465,893 (or 8.70%) of its total expenditures, respectively with HUBs.

Applicability:

The "Heavy Construction" and "Building Construction" categories are not applicable to the agency operations for either FY2018 or FY2019. Expenditures made under these categories are incidental or miscoded.

Factors Affecting Attainment:

Due to competitive bidding requirements and the types of goods and services procured in the respective categories, the agency attained the overall goals in two (2) of the four (4) applicable categories in FY 2018 and only attained one (1) of the four (4) applicable categories in FY 2019. Some of the factors attributing to the HUB goal non-attainment is the direct contracting with non-profit organizations for medical and medical related services in the "Professional and Other Services" categories. The low number of certified HUBs that provide these type of services is also a contributing factor.

In addition, the agency's spend for pharmaceuticals, which are purchased directly from the manufacturers also greatly impacts the agency's HUB utilization percentages. For both FY 2018 and FY 2019 pharmaceuticals spend was approximately 90% of all expenditures in the "Commodities" category, and 65% of the total expenditures for all four (4) applicable categories.

6.A. Historically Underutilized Business Supporting Schedule
87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

Date: **10/9/2020**
Time: **10:42:07AM**

Agency Code: **537** Agency: **State Health Services, Department of**

However, the agency achieved success in FY 2018 and FY 2019 in meeting or exceeding the HUB goals in certain sub categories.

"Good-Faith" Efforts:

In addition to adopting and administering the Texas Comptroller's of Public Accounts Texas Administrative Code Rules, HHS developed a HUB Reform Plan as well as a Business Plan that outlines strategies for increasing HUB utilization. The plan addresses reinforcing HUB Subcontracting Plan (HSP) compliance and reporting, implementing an aggressive training program to both staff and vendors, as well as developing target marketing strategies for promoting awareness of procurement opportunities available to HUB businesses in a direct and indirect capacity.

0599	Other Funds				
	Total, Method of Financing	\$2,465,181	\$3,422,918	\$0	\$0

Description of Item for 2020-21

Alleviate technical debt, the accrued impact of delayed investment in updating, upgrading, or replacing automated systems, through the replacement of old and outdated equipment and software, and a need to improve workflow processes through acquisition of automated equipment. The DSHS laboratory cannot ensure that it meets testing deadlines and provides the most robust and reliable results if the equipment is unreliable and the processes too slow to meet workload demands. Upgrade Laboratory Information Management Software (LIMNS) applications including LabWorks and LabWare.

**6.B. Current Biennium One-time Expenditure Schedule
Part 1 - Strategy Allocation 2022-23 Biennium**

Agency Code: 537	Agency Name: Department of State Health Services	Prepared By: Amanda Hudson	Date

0599	Other Funds	\$12,000,000			
	Total, Method of Financing	\$21,886,200	\$1,034,000	\$0	\$0

Description of Item for 2020-21

System infrastructure maintenance and possible complete replacement of system components. Renovations to existing lab space for new technologies and testing methods. Repair to both the Austin and South Texas Lab. Work needed for the Austin lab include exterior water proofing, roof repairs, boiler/chiller replacement, new countertops with lip and storage cabinets. Along with renovations at the Austin lab the purchase, installation, and testing of an emergency generator is included in this funding. Work needed for the South Texas lab include expansion of current space, roof replacement, HVAC and ductwork replacement, mold remediation of non-testing area, bringing building into compliance with latest building codes, and relocation of clinical testing area.

TRACKING NOTES

Will not be including fund 758 (PPHF funding) in with the federal award amounts, fund 758 has a different CFDA #. Ended in 2017
Fund 504 is considered non PPHF funding. 2017 extended supplemental period fund 758 became fund 504 as non PPHF
there was no 2018 funding, 2017 was extended due to supplemental funding. This budget period was a 27 month budget period
CDC was moving the budget period each year, in the end the project period would start a new budget period month.
FY 2019, included two new components BB1 - fund 541 & CC1 - fund 542 that are under same CFDA# and are included in FY 2019 reported figures .

BB1 = DC:186,304. IDC=33,721. G. Total = 220,025. CC1 = 731,286. IDC=95,798. G. Total = 827,084. Core 504= 18,362,583.
IDC = 2,480,123. G. Total = 20,852,70, plus COVID one time funding, fund 924 in FY 2019, DC = 9,402,550.00 IDC=691,304.00 G. Total = 10,093,854.00

FY 2020 Core budget = \$22,494,250. new project AA1 (new fund #) = \$488,419., and new project CC2 (new fund #) = \$341,815., G. Total = 23,324,484.00.

TRACKING NOTES

Program did not apply for 0Y304 funding, no funding for fund 304
 FYI, program did apply for fund 304 funding in 1Y304 - 10/01/20 - 09/30/21 application request was \$6.6M, however, has not yet been awarded, and is not reflected in the above reported figures.
 FY 21 one time COVID funding is reflected in the amount of \$1,500,000.00
 2019 award is low because program did not apply for ADAP supplemental funding in 9Y594

87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

Date: 10/9/2020
Time: 10:42:19AM

Agency Code: **537** Agency: **State Health Services, Department of**

Description and Justification for Continuation/Consequences of Abolishing

The purpose of the committee is to provide advice to the Department of State Health Services (DSHS) regarding activities supported with Preventive Health and Health Services Block Grant (PHHSBG) funds, the conduct of needs assessments, the allocation of payments, and the collection of data. The committee approves the annual block grant work plan as outlined in the Preventive Health & Health Services Block Grant federal legislation. Without approval from this committee, Texas would not be in compliance which would result in a loss of funding.

If abolished, DSHS would be out of compliance with the Preventive Health & Health Services Block Grant federal legislation which would result in a potential loss of funding.

Automated Budget and Evaluation System of Texas (ABEST)

Date: 10/9/2020
Time: 10:42:19AM

Agency Code: **537** Agency: **State Health Services, Department of**

Description and Justification for Continuation/Consequences of Abolishing

The Texas Radiation Advisory Board (TRAB) aids the Department of State Health Services (DSHS) by providing valuable experience and technical expertise to assist in rule making and in formulating regulatory and consumer policies such as statements on food irradiation, emergency precautions for radiation accidents, and other medical issues. The quarterly TRAB meetings benefit the State and DSHS by assuring that the latest best practices in radiation safety are used to maintain radiation exposure 'as low as reasonably achievable' (ALARA) for radiation applications in medicine, industry, academia, and research and development.

Abolishment of TRAB would diminish access to the current Board's expertise. Over time, the timely access and focus on the application of the best radiation safety practices and ALARA concepts could be diminished in radiation applications throughout Texas. This could lead to an increase in higher radiation exposures with commensurate potential health risks.

6.F.a. Advisory Committee Supporting Schedule ~ Part A

87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

Date: 10/9/2020
Time: 10:42:19AM

Agency Code: 537 Agency: State Health Services, Department of

Description and Justification for Continuation/Consequences of Abolishing

The purpose of the Preparedness Coordinating Council (PCC) is to advise and assist the Department of State Health Services (DSHS) as a multidisciplinary strategic review forum concerning topics related to preparedness, response, recovery, and mitigation activities in Texas at the state level as they pertain to Emergency Support Function (ESF) - 8 (Public Health and Medical). The committee provides a forum for external stakeholders to solicit input from and provide input to DSHS; allows DSHS to bring topics to members and obtain advice; and a provides way to share information with stakeholder/member organizations.

If the committee were abolished, DSHS would lose the ability to routinely obtain input from multidisciplinary members and make informed decisions to develop effective plans, processes and procedures prior to implementation. If abolished, DSHS would lose federal funds as the PCC is a federal grant requirement. The forum has resulted in building relationships and developing trust with committee members and the organizations they represent.

Automated Budget and Evaluation System of Texas (ABEST)

Date: 10/9/2020
Time: 10:42:19AM

Agency Code: 537 Agency: State Health Services, Department of

Description and Justification for Continuation/Consequences of Abolishing

The Texas HIV Medication Advisory committee (MAC) makes recommendations to the Department of State Health Services Commissioner for the addition or deletion of medications to the Texas HIV Medication Program (THMP) formulary. The science and practice associated with the effective use of HIV treatment medications changes frequently. It is critical that the THMP maintain appropriate formularies, and program policies and procedures to ensure uninterrupted access to maximize effective therapies to program clients. Therefore, an advisory committee that contains the perspectives and expertise of physicians (particularly those with experience treating patients living with HIV), administrators, pharmacists, and affected community members is necessary. The members serve as educational resources and promoters of the program for their communities regarding the THMP.

If the MAC is abolished, the THMP would be severely impacted by the lack of its guidance and expertise on the HIV medication formulary. This committee carefully considers the merits of formulary additions and provides invaluable advice on prior authorizations and other procedural requirements. It also provides the THMP with guidance on how to balance the need for increased access to a variety of treatments with the need to manage limited resources.

Description and Justification for Continuation/Consequences of Abolishing

The Council advises DSHS and recommends needed action for the benefit of persons with Alzheimer's disease and related disorders and for their caregivers; coordinates public and private family support networking systems for primary family caregivers; facilitates coordination of state agency services and activities related to persons with Alzheimer's disease; and disseminates information on services and related activities for persons with Alzheimer's disease and related disorders. The council submits a biennial report which includes recommendations highlighting priority issues for Alzheimer's and suggestions for addressing them statewide. The report includes updates on Texas Alzheimer's Research and Care Consortium (TARCC) research. As mandated, the council offers recommendations for state appropriated funds to TARCC. TARCC advances research efforts in Texas that lead to better diagnosis, treatment and prevention of Alzheimer's.

The Council serves a vital role in advising DSHS on key issues related to Alzheimer's disease by advocating for those living with Alzheimer's or other dementias and their caregivers.

87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

Date: 10/9/2020
Time: 10:42:19AM

Agency Code: **537** Agency: **State Health Services, Department of**

Description and Justification for Continuation/Consequences of Abolishing

The Council members recommended a list of heart attack and stroke data elements to be included in the Heart Attack and Stroke Data Collection Initiative. The Texas Heart Attack and Stroke Data Collection initiative has increased awareness of secondary prevention of heart disease and stroke. The collection and analysis of the data has identified areas of needed improvement of the heart attack and stroke system of care across the state. Department of State Health Services (DSHS) has also used the data to identify comorbidities of heart attack and stroke and to inform activities of several other program areas, including diabetes, obesity and tobacco prevention. DSHS developed the Texas Plan to Reduce Cardiovascular Disease and Stroke (Plan) in collaboration with the Council and other partners. The Plan provides a set of goals and strategies for addressing heart disease and stroke in Texas through a coordinated multi -sectoral approach. DSHS and the State benefit from collaborating with partners across the state to address heart disease and stroke through efficient leveraging of resources . The Council has been integral to increasing the awareness of heart disease and stroke, and they have helped secure increases in funding and personnel needed to expand and carry out heart disease and stroke prevention activities, collect data, and better ensure timely treatment of heart attack and strokes in Texas.

If abolished, the impact would be a loss of expertise and advocates for heart disease and stroke prevention and treatment in Texas. In the long-term, this could hinder progress in improving health outcomes for heart disease and stroke.

Description and Justification for Continuation/Consequences of Abolishing

The Newborn Screening Advisory Committee (committee) includes important and relevant external stakeholders that participate in the many aspects of newborn screening throughout the state. Membership includes: physicians specializing in neonatal-perinatal medicine; persons with or parents of children affected by conditions screened for by the program; hospital representatives; and medical providers involved in the delivery of newborn screening services, follow-up, or treatment. The committee's recommendations to the department have been invaluable and very supportive of the Newborn Screening program. The recommendation for permanent funding for the program was instrumental in the 86th Legislature's creation of the newborn screening preservation account and implementation of screening for X-ALD in 2019.

The department is diligent in soliciting membership from all geographic locations in the state in an effort to include representation from historically underserved areas. Funding for travel to attend a minimum of one in-person committee meeting for all members will support the department's efforts for statewide representation. The Committee specifically requested that if no funding can be supported then at a minimum, allow travel reimbursement for public/ parent representatives.

If abolished, the diverse representation of the newborn screening community would not be readily available to consider, evaluate and make recommendations to the program processes aiming to reduce the impact of genetic conditions on the lives of newborns and their families.

Stakeholder groups, including Texas Medical Association, Texas Pediatric Society, Texas Hearing Association and the March of Dimes have been supportive of the Committee and attend Committee meetings. Parents advocating for new conditions not currently screened use the Committee as a forum to raise awareness of NBS in Texas.

Description and Justification for Continuation/Consequences of Abolishing

This committee is tasked with examining public health issues in Texas and providing recommendations on how to improve public health outcomes. This includes examination and evaluation of funding for programs, projects, and jurisdictions. Specific duties of the committee are:

- Define the core public health services a local health entity (LHE) should provide in a county or municipality;
- Evaluate public health in this state and identify initiatives for areas that need core public health functions;
- Identify all funding sources available for use by LHEs to perform core public health functions;
- Establish public health policy priorities for this state; and
- At least annually, make formal recommendations to the Department of State Health Services (DSHS).

This committee represents public health in Texas, and they provide input and recommendations to DSHS to improve the public health system in Texas.

If abolished there would be no formal process for local public health to make recommendations to improve the public health system.

Agency Code: 537 Agency: State Health Services, Department of

Description and Justification for Continuation/Consequences of Abolishing

The Texas Diabetes Council (TDC) coordinates state efforts to promote diabetes awareness and, prevention, and advise on public policy. In 1989, upon consultation with TDC, the Legislature appropriated funding to support development of a state plan for diabetes treatment, education, and training. TDC State Plan priorities and work concentrate on advancing diabetes-related policy, evaluating the impact of diabetes, promoting diabetes prevention programs, increasing diabetes awareness and education, and improving diabetes care and prevention of complications. By employing these strategies, the economic burden diabetes and its potential complications place on the State can be reduced.

In conjunction with developing each state plan described in Section 103.013, Health and Safety Code, the Council shall conduct a statewide assessment of existing programs for the prevention of diabetes and treatment of individuals with diabetes that are administered by the commission or a health and human services agency, as defined by Section 531.001, Government Code. Chapter 1358 of the Texas Insurance Code requires that the Commissioner, in consultation with the TDC, by rule shall adopt minimum standards for coverage provided to an enrollee with diabetes. Providing coverage to insurance enrollees with diabetes increases access to services, preventing costly complications.

Abolishment of the TDC would diminish access to subject matter experts to develop diabetes treatment guidelines and protocols.

Description and Justification for Continuation/Consequences of Abolishing

Governor's Emergency Medical Services and Trauma Advisory Council (GETAC) purpose is to advise the Department of State Health Services (DSHS) on rules regarding EMS and trauma systems in Texas, providing professional stakeholder input to DSHS on EMS regulation and overall strategies for improving trauma systems and emergency services across the state. DSHS benefits from the suggestions/recommendations of the currently practicing professionals within the respective fields of EMS and trauma care, and the public who are currently serving and participating in a robust GETAC process.

Discontinuance of GETAC would leave the state without an important professional body to review and recommend changes to rules and assess the need of EMS and trauma services in rural and frontier areas. It would also deprive Texans of a critical stakeholder body responsible for the development of strategic plans refining the educational requirements for certification and maintaining certification as EMS personnel and developing EMS and trauma services. This could result in an overall less effective emergency health care system.

The Statewide Health Coordinating Council (SHCC) provides the Department of State Health Services (DSHS) with the valuable experience and technical expertise necessary to identify major statewide health concerns and assess the state's health resources, including the health workforce, for different areas and populations. The SHCC collaborates with DSHS, the Health and Human Services Commission and other stakeholders on the state health plan. The state health plan is produced every six years and is revised and updated every two years. This plan proposes strategies for improving health care delivery, incorporating information technology into the delivery system, and engaging Texas' colleges and universities in the provision of health services. The SHCC also provides guidance to the Health Professions Resource Center, the Texas Center for Nursing Workforce Studies, and the Nursing Advisory Committee. Through the state health plan, the SHCC provides the Legislature with information and policy recommendations for addressing Texas health issues, as described in its mandate. All expenses for the SHCC are paid by DSHS; no funds are appropriated or provided by other agencies.

Description and Justification for Continuation/Consequences of Abolishing

The Maternal Mortality and Morbidity Review Committee (MMMRC), is charged to:

- Study and review cases of pregnancy-related deaths, and trends in severe maternal morbidity;
- Determine the feasibility of the review committee studying cases of severe maternal morbidity; and
- Make recommendations to help reduce the incidence of pregnancy-related deaths and severe maternal morbidity in this state

The MMMRC analyzes aggregate data of severe maternal morbidity and mortality to identify trends. The MMMRC uses findings from statewide trend analyses and case reviews to ascertain the cause(s) of maternal deaths, review the systemic factors associated with them, and develop and promote targeted strategies for prevention, risk reduction, and system improvement. The MMMRC is required to submit a biennial report to the Texas Legislature with the MMMRC's findings and recommendations to prevent maternal mortality and severe maternal morbidity in Texas.

During the 85th Legislative Session, legislation passed that extended MMMRC until 2023, and directed MMMRC & DSHS to implement maternal safety initiatives and submit a report detailing the status of the implementation and additional resource needs to the Executive Commissioner of the Health and Human Services Commission.

If abolished, the MMMRC could not continue studying maternal morbidity and mortality causes and make recommendations. These findings and recommendations are the basis for many of the maternal health and safety programming and initiatives throughout the state.

Automated Budget and Evaluation System of Texas (ABEST)

Date: 10/9/2020
Time: 10:42:19AM

Agency Code: **537** Agency: **State Health Services, Department of**

Description and Justification for Continuation/Consequences of Abolishing

State Child Fatality Review Team (SCFRT) provides a better understanding of child deaths through multidisciplinary review on the local level. Data is collected and analyzed to best understand risks to children. The SCFRT members are subject matter experts from law enforcement, the medical community, Child Protective Services, child advocacy organizations, the court system, the behavioral health community, and more. These subject matter experts provide knowledge and proficiency outside of the public health realm and complement the Department of State Health Services' expertise on the team.

If abolished, the review team would not be able to review cases of child fatality to develop an understanding of the causes and incidence of child deaths in Texas or identify procedures to reduce the number of preventable child deaths. This could result in an increase in child deaths throughout the state of Texas.

Automated Budget and Evaluation System of Texas (ABEST)

Date: 10/9/2020
Time: 10:42:19AM

Agency Code: **537** Agency: **State Health Services, Department of**

Description and Justification for Continuation/Consequences of Abolishing

The Healthcare Safety Advisory Committee serves a critical role to obtain stakeholder feedback about emerging issues related to healthcare-associated infections, preventable adverse events, multidrug-resistant organisms, antibiotic susceptibility, and healthcare worker and patient safety in hospitals, ambulatory surgical centers, and long-term care facilities. Its members represent a vast array of healthcare professionals, including infection prevention and control professionals, healthcare safety professionals, board-certified physicians, healthcare facility administrators, a licensed pharmacist, and a department employee representing the licensing of hospitals or ambulatory surgical centers.

DSHS plans to proceed with the abolishment date of September 1, 2020. The Healthcare Safety Advisory Committee will be reinvented as a working group to allow for more flexibility for members and stakeholders after September 2020.

Date: 10/9/2020
Time: 10:42:19AM

Agency Code: **537** Agency: **State Health Services, Department of**

Description and Justification for Continuation/Consequences of Abolishing

The Medical Advisory Board assists the Department of Public Safety in making certain determinations regarding (1) an applicant for a driver's license or a license holder; or (2) an applicant for a holder of a private security commission or a license to carry a concealed handgun.

Abolishing this program would remove the Department of Public Safety's ability to assess and determine an applicant's ability to safely operate a motor vehicle or exercise sound judgement with respect to the proper use and storage of a handgun. The result could be an increase in the number of licenses issued to drivers or hand gun owners who would otherwise not have received driver licenses or hand gun licenses.

Description and Justification for Continuation/Consequences of Abolishing

This committee provides guidance and direction to the Texas Center for Nursing Workforce Studies by reviewing policy matters on the collection of data and reports that relate to the nursing workforce, help develop priorities and an operations plan, and by reviewing reports and information before dissemination. This committee provides the agency with subject matter expertise and the perspective of state nursing leaders, which keeps the agency's work relevant and timely.

If this committee were abolished, DSHS would lack guidance and support from stakeholders and the nursing community would suffer the consequences of not having sufficient, quality data to make sound policy decisions.

Date: 10/9/2020
Time: 10:42:19AM

Agency Code: 537 Agency: State Health Services, Department of

Description and Justification for Continuation/Consequences of Abolishing

This committee advises the Department of State Health Services (DSHS) and the Health and Humans Services Commission (HHSC) on issues related to the review of applicants as sponsoring institutions, training instructors, or as promotors(a) or community health workers (CHW). Input from the Committee provides DSHS with a better understanding of factors impacting CHWs achieving certification and maintaining their certification, as well as meaningful employment opportunities as a result of their certification. The Committee provides recommendations to DSHS and HHSC on the implementation of standards, guidelines, and requirements adopted under the Health and Safety Code, Chapter 48, Subchapter C, relating to the training and regulation of persons working as CHWs as well as matters related to the employment and funding of CHWs. Through these recommendations, DSHS is better able to adjust program procedures and rules, resulting in better service to and retention of CHW clients and better health outcomes for Texans seeking and receiving services through CHWs. The certification process undertaken by Texas is ground breaking and serves as an example for other states.

If this Council is abolished, key multi-sector stakeholder input and perspectives on issues affecting the CHW workforce in Texas would be lost. This could result in less effective procedures for certifying CHWs, diminished opportunities to employ CHWs, and less effective response to address chronic disease, Zika, and other population-based diseases and conditions for which awareness, education and outreach to diverse populations is critical.

Description and Justification for Continuation/Consequences of Abolishing

The Texas School Health Advisory Committee (TSHAC) assists local school health advisory committees by developing tools, templates, and resources that are otherwise not available. The TSHAC is legislatively mandated to make recommendations on coordinated school health based on the state mandated physical fitness assessment. TSHAC assesses the effectiveness of coordinated health programs provided by school districts.

If TSHAC is abolished, key subject matter expertise on school health and safety issues could be significantly reduced. Local school health advisory councils would need to develop their own tools and resources. With local School Health Advisory Committees being made up of community stakeholders, they would not have access to the subject matter expertise that is currently provided through the TSHAC members.

Description and Justification for Continuation/Consequences of Abolishing

The purpose of the stock epinephrine advisory committee (SEAC) is to examine and review the administration of epinephrine auto-injectors to a person experiencing an anaphylactic reaction on a K-12 campuses and higher education campuses. The majority of members must be physicians with experience in treating anaphylaxis. The SEAC provides recommendations and input on training of school personnel. DSHS benefits by having experts available to assist in the development of tools and resources for school districts to utilize in planning for anaphylactic emergencies. The SEAC provides expertise on the latest science and evidence-based practices in treating life-threatening allergies. Committee members bring extensive knowledge and experience to DSHS in the prevention and treatment of anaphylaxis. This expertise is valuable to DSHS in the development of rules, resources, and tools for use by schools at every level.

If SEAC is abolished, key stakeholder input and perspectives on this student health and safety issue could be significantly reduced. DSHS would have to hire consultants with expertise in anaphylaxis treatment to assist in developing the rules and materials for school districts.

Date: 10/9/2020
Time: 10:42:19AM

Agency Code: **537** Agency: **State Health Services, Department of**

Description and Justification for Continuation/Consequences of Abolishing

Texas Health and Safety Code Section 120 establishes the Task Force of Border Health Officials (Task Force) to advise the Department of State Health Services (DSHS) related to health problems, conditions, challenges, and needs of the population in the border region. The Task Force was established as an advisory body to address public health issues that affect residents living in the Texas-Mexico border region. The Task Force is specifically charged with advising DSHS on major border health priorities, including access to health care services, public health infrastructure, disease surveillance, disease control and prevention, and collaboration with local, regional and state officials on both sides of the border. The Texas border is considered one of the busiest international boundaries in the world, with a current population of approximately 2.8 million on the Texas side. Most border residents are Latino/Hispanic (87.3 percent), compared to only 34.7 percent of

Texas non-border residents. The Texas border region is characterized by high rates of poverty; 25.3 percent of the Texas border population is in poverty and low levels of health insurance coverage; 35.1 percent of border adults ages 18-64 have no health insurance coverage. The Texas border is disproportionately affected by obesity, diabetes mellitus, certain contagious diseases including tuberculosis, and additional public health concerns. The Texas border faces multiple challenges including limited access to primary, preventative, and specialty care.

The abolishment of the Task Force would diminish collaboration between border health officials and reduce access to subject matter expertise which informs the department on major border health priorities.

Description and Justification for Continuation/Consequences of Abolishing

The Task Force on Infectious Disease Preparedness and Response is a statutorily required advisory panel to the Governor . It provides expert, evidence-based assessments, protocols, and recommendations related to state responses to infectious diseases, including Ebola, and serves as a reliable and transparent source of information and education for Texas leadership and citizens. Through the Task Force, the Department of State Health Services gains expertise from the medical community, researchers, academia, local health authorities, emergency medical services, county judges, relevant state agencies, and other subject matter experts. The Task Force may make written reports on its findings and recommendations, including legislative recommendations, to the Governor and legislature.

If abolished, feedback from the vast array of entities involved in the Task Force would not be as readily attainable, and members would not be able to learn from each other's experiences and determine how to best protect the public during times of infectious disease outbreak.

The Food Allergy Ad Hoc Committee (FAAC) was legislatively mandated in SB 869 (86th Legislature) to consult with the commissioner on updating the current food allergy guidelines to incorporate and specifically reference any new food allergy management best practices and treatments, including new methods to reduce the risk of allergic reactions. The FAAC will help in providing suggestions to assist schools in preventing and managing food allergies in the school setting. The FAAC is required to meet once every three years. If abolished, the food allergy guidelines would be updated utilizing the expertise of the Stock Epinephrine Advisory Committee and the Texas School Health Advisory Committee. These two committees would review and assist in updating the guidelines. In addition, DSHS would post drafts of the guidelines for public comments before the final guidelines were approved.

6.F.a. Advisory Committee Supporting Schedule ~ Part A

87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

Date: 10/9/2020
Time: 10:42:19AM

Agency Code: 537 Agency: State Health Services, Department of

Description and Justification for Continuation/Consequences of Abolishing

Following the final report published by the Sickle Cell Advisory Committee and the committee's subsequent dissolution in 2018, House Bill 3405, 86th Legislature, Regular Session, 2019, created the sickle cell task force. The task force is charged with raising awareness of Sickle Cell Disease (SCD), and carrying out recommendations made in the sickle cell advisory committee's final report as directed by the executive commissioner of the Health and Human Services Commission. The administrative duties to support the task force were delegated to the Department of State Health Services. If abolished, the task force would be unable to carry out the remaining recommendations.

The department is diligent in soliciting membership from all geographic locations in the state in an effort to include representation from historically underserved areas. Funding for travel to attend a minimum of one in-person committee meeting for all members will support the department's efforts for statewide representation.

6.F.b. Advisory Committee Supporting Schedule ~ Part B

Date: **10/9/2020**

Time: **10:42:21AM**

87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

Agency Code: **537** Agency: **State Health Services, Department of**

ADVISORY COMMITTEES THAT SHOULD BE ABOLISHED/CONSOLIDATED

INTERAGENCY OBESITY COUNCIL

Reasons for Abolishing

The Inter-agency Obesity Council (IOC) was abolished during the 86th Legislative Session when Health and Safety Code, Chapter 114 was repealed

6.F.b. Advisory Committee Supporting Schedule ~ Part B

Date: **10/9/2020**
Time: **10:42:21AM**

87th Regular Session, Agency Submission, Version 1
Automated Budget and Evaluation System of Texas (ABEST)

Agency Code: **537** Agency: **State Health Services, Department of**

ADVISORY COMMITTEES THAT SHOULD BE ABOLISHED/CONSOLIDATED

HEALTHCARE SAFETY ADVISORY COMMITTEE

Reasons for Abolishing

The Healthcare Safety Advisory Committee serves a critical role to obtain stakeholder feedback about emerging issues related to healthcare-associated infections, preventable adverse events, multidrug-resistant organisms, antibiotic susceptibility, and healthcare worker and patient safety in hospitals, ambulatory surgical centers, and long-term care facilities. Its members represent a vast array of healthcare professionals, including infection prevention and control professionals, healthcare safety professionals, board-certified physicians, healthcare facility administrators, a licensed pharmacist, and a department employee representing the licensing of hospitals or ambulatory surgical centers.

DSHS plans to proceed with the abolishment date of September 1, 2020. The Healthcare Safety Advisory Committee will be reinvented as a working group to allow for more flexibility for members and stakeholders after September 2020.

USE OF HOMELAND SECURITY FUNDS

The initial focus of these grant funds, which began in 2002, was a response to a terrorist threat. However, by 2005, the CDC was taking an All-Hazards approach and the focus of the grants included preparation for natural disasters as well. DSHS contracts with local health departments to strengthen response capabilities and with hospitals to provide capacity.

USE OF HOMELAND SECURITY FUNDS

All Homeland Security expenditures in Part B are devoted to client assistance and related costs as a result of natural or man-made disasters. The activities include providing crisis counseling and other health related services to persons impacted by natural or man-made disasters, coordinating and leading the development of DSHS strategic disaster preparedness and business continuity plans, including supporting agency program and support staff in development of policies, procedures, and best practices to ensure DSHS responds to and recovers from disasters in an appropriate and timely manner. DSHS strives to ensure that the organization can recover in a timely manner from disasters and other events that may cause an interruption in delivering services to consumers.

------	-------------	----------	----------	----------	---------	---------

USE OF HOMELAND SECURITY FUNDS

All Homeland Security expenditures in Part C are devoted to COVID-19 response activities. Activities include:

- Activation of the State Medical Operating Center (SMOC), Regional State Operating Centers (RSMOC) & staffing the State Operating Center (SOC), which requires staff overtime & temp hires.
- Patient care for repatriated individuals who arrived at Lackland AFB. Costs included medical personnel, ambulances, patient transport & stays at Texas Center for Infectious Disease (TCID). Total patients served at TCID are 24, other patients were transported to other hospitals.
- Statewide surveillance of COVID-19 in communities including monitoring specific persons with exposure & other community risk. Costs include increasing temp staff for epidemiologist & nurses & support for local area staffing with funds.
- Enabling the DSHS state laboratory to test for COVID-19 by reconfiguring space to accommodate additional tests, hiring temp technical staff, & purchasing equipment. COVID-19 testing began on March 5, 2020.
- Deploy medical surge capacity staffing to hospitals statewide.
- Purchasing medical supplies for hospitals.
- Establishing a state-wide public awareness campaign to provide disease education.
- Conducting state-wide conference calls to provide technical guidance & established a medical hot-line. Calls have recently changed in frequency to once a week.
- Activating the DSHS Continuity of Operations Plan (COOP) for staff & allowed telework for staff
- Implementing Statewide COVID-19 Surveillance to help slow down the infection rate for individuals that had contact with COVID-19 positive individuals.

Other non-COVID-19 Pandemic response activities included crisis counseling & other health related services to persons impacted by natural or man-made disasters, coordinating & leading the development of DSHS strategic disaster preparedness & business continuity plans, including supporting agency program & support staff in development of policies.

1	HIV Care Services, Ryan White Part B HIV Grant Program	Mental Health Services - Outpatient	Mental Health Services are the provision of outpatient psychological and psychiatric screening, assessment, diagnosis, treatment, and counseling services offered to clients living with HIV. Services are based on a treatment plan, conducted in an outpatient group or individual session, and provided by a mental health professional licensed or authorized with the state to render such services. Such professionals typically include psychiatrists, psychologists, and licensed clinical social workers. Goals are to retain clients in care so they remain, or attain, viral suppression, and to improve health outcomes.	GR	704,282	1,083,642	379,360	53.9%	1,083,642	-

Expanded or New Initiative: 3.Relating to the regulation of freestanding emergency medical care					
Legal Authority for Item:					
86th Legislature, Regular Session, H.B. 1, Art. IX, Sec. 18.19					
Health and Safety Code, Chapter 254					
Description/Key Assumptions (including start up/implementation costs and ongoing costs):					
HB 2041 amended the Health and Safety Code to add freestanding emergency medical care facilities licensed under Chapter 254 to the list of health care facilities the DSHS must capture and report administrative claims data. The reporting also includes freestanding emergency care facilities that are exempt under Health and Safety Code Chapter 254. Implementation began on June 1, 2020; however, any collection of claims data from freestanding emergency medical care facilities could not commence until October 1, 2020, in accordance with the fourth quarter data collection and processing schedule established in rule. The costs include startup up costs to modify the collection system. Ongoing cost include increased cost for the contractor collecting the data and an additional FTE for management and reporting of the data.

Total, All Strategies	\$23,854	\$23,854
Total Estimated Paper Volume Reduced	2,710,594	2,710,594

Description:
<p>1. Programs across the agency have noted reductions in paper usage since the March 2020 adoption of COVID-19 response measures. These response measures were not implemented with the goal of saving paper, and they are only temporary. Measuring paper usage before COVID-19 and after "normal" operations are restored would be a more accurate reflection of paper savings realized through adoption of new business practices such as increased telework and remote learning.</p>
<p>2. Since 2018, the default setting for Xerox printers systemwide has been "no cover sheet" and "duplex printing". Although eliminating cover sheets and requiring duplex printing has a positive impact on reducing paper usage, it is impossible to determine actual savings as a result of these measures.</p>

<p>3. Over 300 unique forms are available on the HHSC Intranet, supporting 14 business categories throughout the agency. Files were downloaded from the forms library over 200,000 times from Sept. 1, 2019 through June 21, 2020. Numerous other forms are available through individual programs. Although converting paper documents to electronic forms has a positive impact on paper usage, it is not feasible to determine actual paper savings from these measures.</p>
<p>4. User requests regarding IT applications are processed through the HHS Enterprise Portal automated system, and averages 1,379 requests monthly, with average two sheets per request. Total monthly savings = 2,758 sheets, for yearly estimate of 33,096 sheets saved.</p>
<p>5. Regional Administrative Services and SSS Facility and Warehouse Services use an automated form for Security Incident Tracking (SIT) requests, which previously were submitted on a three-page form. An estimated 56 requests will be received in FY22 and FY23, for a total of 112 requests and a total estimated savings of 336 sheets.</p>
<p>6. Asset Management uses an electronic radio frequency identification system that processes an average of 132 two-page forms per month, saving 3,168 sheets per year. In addition, the digitization of virtual asset tracker form AM01 saves an additional 307 sheets yearly, for a total savings of 3,475 sheets in FY2020.</p>
<p>8. The HHSC RightFax Platform eliminates the need to print incoming and outgoing fax documents. Over 150 users and 50 programs currently use the system, with new users and programs added continuously. In FY19 this initiative saved the agency approximately 2.6 million sheets (2.2M inbound + 350K outbound). Savings for FY20 are estimated at 2.6 million sheets (2.2M + 360K).</p>
<p>8. The acceptable use agreement is required annually. An electronic version of the eight-page form was launched on April 20, 2017. An average of 212 forms are processed per month, for a yearly savings average of 20,352 sheets of paper.</p>
<p>9. The HHSC Records Management office eliminated a paper-based system to request records destruction, saving a minimum estimate of 7 sheets each month.</p>
<p>10. The Advisory Committee Coordination Office supports the HHSC Executive Council in part by collecting quarterly meeting materials into a binder for each member's reference. The majority of members are now provided an electronic binder, saving approximately 1,768 printed pages each year.</p>
<p>11. HHSC's Purchasing and Contract Services (PCS) transitioned to an electronic procurement file system in October 2019. The system saves approximately 4,385 sheets each month.</p>
<p>12. Approximately 80% of HHS employees have consented to receive their W-2s electronically each tax season, saving approximately 3,239 sheets per year.</p>
<p>Methodology to determine cost per single sheet of paper: Price for 5000-sheet case of printer paper = $\\$44.21/5000 = \\0.0088 per single sheet.</p>
