What is Arthritis?

Arthritis is one of the most prevalent diseases in the United States and the leading cause of disability among adults. Common symptoms include pain, aching, stiffness, and swelling in or around the joints. Common forms of arthritis include Osteoarthritis, Rheumatoid Arthritis, Fibromyalgia and Juvenile Arthritis. However, arthritis can be seen in over 100 different conditions ranging from mild to life-threatening.

Tips For Managing Your Arthritis

- Get diagnosed for joint pain lasting more than two weeks.
- Consult with your doctor about medications not working well or causing undesirable side effects.
- Control your weight by eating a well-balanced diet consisting of at least five servings of fruits and vegetables daily and exercising regularly including taking a walk, riding a bike, going for a swim, or dancing.
- Relieve stress by scheduling a massage, taking a warm bath, reading a book, or listening to music.
- Stop smoking by calling the Quitline at 1-877-937-7848.
- Contact the Arthritis Foundation at 1-800-442-6653 about available local exercise programs and resources.
