INITIAL LABORATORY TESTS, AS CLINICALLY INDICATED BY LICENSED PROVIDER

1. HIV Antibody: if not documented previously
   - Action Item: Archive

2. Quantitative Plasma HIV RNA (HIV Viral Load): Percentage of patients with documented HIV RNA viral load
   - Action Item: Archive

3. Drug Resistance Testing (genotype, phenotype) - recommended at time of initial care: Percentage of new patients with documented drug resistance testing, as applicable
   - Action Item: Maintain

4. HLA-B*5701 testing (only before initiating abacavir-containing regimen per guidelines)
   - Action Item: Archive

5. Comprehensive HIV related History
   - Action Item: Archive

6. Comprehensive HIV related History
   - Action Item: Archive

7. Comprehensive HIV related History
   - Action Item: Archive

8. Comprehensive HIV related History
   - Action Item: Archive

9. Comprehensive HIV related History
   - Action Item: Archive

10. Comprehensive HIV related History

INITIAL MEDICAL EVALUATION/ASSESSMENT

1. Linkage to Care
   - Action Item: Archive

2. Comprehensive HIV related History
   - Action Item: Archive

3. Physical Exam: Percentage of new patients with a documented annual physical examination including complete review of systems
   - Action Item: Archive

4. Initial Oral Cavity Exam documented
   - Action Item: Archive

5. Oral Health Examination
   - Action Item: Archive

6. CD4 Count and/or CD4 Percentage: Percentage of patients with documented CD4 during the measurement year
   - Action Item: Maintain

7. Quantitative Plasma HIV RNA (HIV Viral Load): Percentage of patients with documented HIV RNA viral load
   - Action Item: Maintain

8. Hepatitis B: Percentage of new patients for whom a Hepatitis B Total Antibody screening was performed at least once during the measurement year (based on self report or other documentation)
   - Action Item: Maintain

9. Hepatitis C: Percentage of new patients for whom Hepatitis C (HCV) screening was performed at least once since the diagnosis of HIV/AIDS or for whom there is documented infection or immunity
   - Action Item: Maintain

10. Hepatitis C: Percentage of patients with documented HCV RNA viral load at least once since the measurement year
    - Action Item: Maintain

11. Hepatitis A: Percentage of patients for whom a Hepatitis A Total Antibody screening was performed at least once since the diagnosis of HIV or for whom there is documented infection or immunity
    - Action Item: Maintain

12. Hepatitis B: Percentage of new patients, regardless of age, for whom Hepatitis B screening (Hepatitis B surface antigen and surface antibody) was performed at least once since the diagnosis of HIV/AIDS and for whom there is documented infection or immunity
    - Action Item: Maintain

13. Hepatitis C: Percentage of new patients for whom Hepatitis C (HCV) screening was performed at least once since the diagnosis of HIV
    - Action Item: Maintain

14. Hepatitis C: Percentage of patients with documented HIV-RNA viral load
    - Action Item: Maintain

15. Hepatitis A: Percentage of patients for whom a Hepatitis A Total Antibody screening was performed at least once since the diagnosis of HIV or for whom there is documented infection or immunity
    - Action Item: Maintain

16. Hepatitis B: Percentage of new patients, regardless of age, for whom Hepatitis B screening (Hepatitis B surface antigen and surface antibody) was performed at least once since the diagnosis of HIV/AIDS and for whom there is documented infection or immunity
    - Action Item: Maintain

17. Hepatitis C: Percentage of new patients for whom Hepatitis C (HCV) screening was performed at least once since the diagnosis of HIV
    - Action Item: Maintain

18. Hepatitis A: Percentage of patients for whom a Hepatitis A Total Antibody screening was performed at least once since the diagnosis of HIV or for whom there is documented infection or immunity
    - Action Item: Maintain

19. Hepatitis B: Percentage of new patients, regardless of age, for whom Hepatitis B screening (Hepatitis B surface antigen and surface antibody) was performed at least once since the diagnosis of HIV/AIDS and for whom there is documented infection or immunity
    - Action Item: Maintain

20. Hepatitis C: Percentage of new patients for whom Hepatitis C (HCV) screening was performed at least once since the diagnosis of HIV
    - Action Item: Maintain

21. Hepatitis A: Percentage of patients for whom a Hepatitis A Total Antibody screening was performed at least once since the diagnosis of HIV or for whom there is documented infection or immunity
    - Action Item: Maintain

22. Hepatitis B: Percentage of new patients, regardless of age, for whom Hepatitis B screening (Hepatitis B surface antigen and surface antibody) was performed at least once since the diagnosis of HIV/AIDS and for whom there is documented infection or immunity
    - Action Item: Maintain

- If suspected abuse is indicated; proper authorities contacted and documented in patient's file.

Referral to Disease Intervention Specialist
- Documented referral to case management or DIS if patient is not attending appointments.

Other Specialty Services
- Documented referral to specialty services as appropriate
  - AIDS Drug Assistance Program (ADAP)
  - Medication Assistance Programs
  - Medical care coordination
  - Medical specialties
  - Psychiatric and mental health services
  - Treatment education services
  - Substance use services
  - Partner counseling and referral
  - Medical Nutrition Therapy
  - HIV resource and support opportunities

Follow-up on Referrals
- Each referral has a progress note in the patients chart regarding attendance and outcomes.

| Documented signed clinician entries: Percentage of patients with documented signed clinician entries on each medical visit during the measurement year. | Maintain | 71 |
| Documented problem list present and updated: Percentage of patients with a documented problem list that is updated on each medical visit during the measurement year. | Archive | 72 |
| Documented medication list present and updated: Percentage of patients with a documented medication list that is present and up to date on each medical visit during the measurement year. | Maintain | 73 |

* all indicators will be re-worded for consistency “percentage of patients with”

** indicators will be re-arranged so that the lab and screening sections of both the newly diagnosed and continuing in care sections mirror each other
