# **GUIDELINES FOR ISSUING CERTIFICATES OF REGISTRATION DUE TO A CHANGE IN NAME AND/OR OWNERSHIP**

## **I. Introduction**

This guide describes general conditions that would require issuance of a new certificate of registration due to a change in name and/or ownership of a registrant using medical, dental, veterinary, or industrial x-ray machines, lasers, accelerators, or minimal threat machines, and radiation services. It also describes conditions involving a change in name and/or ownership that may require an amendment to an existing certificate of registration rather than issuing a new certificate of registration. Any change in name and/or ownership will be evaluated on a case-by-case basis by the Department of State Health Services, Radiation Safety Licensing Branch (Agency).

Title 25 Texas Administrative Code (TAC), chapter 289 prohibits the transfer of certificates of registration to other persons unless the Agency provides its consent in writing. The Agency should be notified in writing within 30 days of a change in name and/or ownership of an existing certificate of registration. If an application for a new certificate of registration is required, please visit our web site at [www.dshs.state.tx.us/radiation](http://www.dshs.state.tx.us/radiation) and access "Application Forms" or contact the agency at 512-834-6688 ext 2225.

For purposes of this guide, an "ownership change" refers to a change of the legal entity to which the certificate of registration is issued, whether through sale, merger, reorganization, or transfer of certain operations or assets of a corporation, partnership, or sole proprietorship. An ownership change does not necessarily result in a name change. Likewise, a name change does not necessarily result in an ownership change.
