Measles Cases and Incidence Rates ${ }^{\text {a }}$ in Texas by Age Group ${ }^{\text {b }}$, 2018-2019

| Age Group (Yrs) | 2018 | IR | 2019 | IR |
| :--- | :--- | :--- | :--- | :--- |
|  | Cases | - | Cases | 0.0 |
| $<1$ | 1 | - | 0 | - |
| $1-4$ | 1 | 0.0 | 0 | 0.0 |
| $5-9$ | 0 | 0.0 | 1 | - |
| $10-14$ | 0 | - | 0 | 0.0 |
| $15-19$ | 2 | - | 5 | - |
| $20-29$ | 4 | 0.0 | 4 | - |
| $30-39$ | 0 | 0.0 | 4 | - |
| $40-49$ | 0 | - | 0 | 0.0 |
| $50-59$ | 1 | 0.0 | 0 | 0.0 |
| 60 and Up | 0 | - | 0 | - |
| Unknown | 0 |  | 0 |  |

${ }^{\text {a }}$ Incidence rates (IR) are calculated per 100,000 population. Population data are projected population from Texas Demographic Center's Texas Populations Projections Program; 2019 population projections were updated July 18, 2019, and 2018 population projections were from the prior version.
${ }^{\mathrm{b}}$ Age is calculated based on date of birth and event date, which is onset date if known.
Note: Per the Emerging and Acute Infectious Disease Unit Data Suppression Policy, case counts are not published when underlying populations are less than 2,000, when $n<10$ for populations 2,000 to 20,000, or when $n<5$ for populations 20,000 to 400,000. Rates are not provided when underlying populations are less than 2,000 or the Relative Standard Error exceeds 25\% ( $\mathrm{n}<16$ ).
