Weekly Flu Surveillance Report

Public Health Region 9/10
Week 40- October 3rd-October 9th

Texas Department of State Health Services

Disclaimer

Most cases of influenza are not reportable in the state of Texas, thus the data in this report was collected from hospitals, clinics, and schools throughout the region who have agreed to voluntarily submit data.

Definitions

ILI: Influenza-Like Illness. This is an illness that resembles the flu, but has not been confirmed. **Rapid**: These tests are typically done in-house to quickly test for influenza. **PCR**: These tests are generally more precise than rapid tests and are performed at the DSHS state lab and many commercial labs to confirm a case of influenza.

Geographic Spread of Influenza in the Region

No Activity Sporadic	Local	Regional	Widespread
----------------------	-------	----------	------------

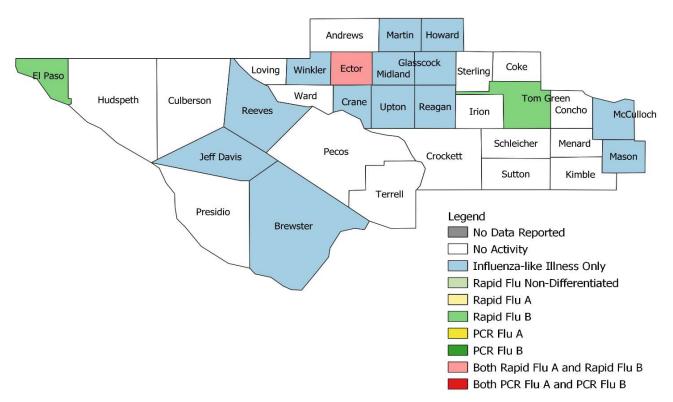

Geographic spread is determined using the CDC's guidelines for flu activity: http://www.cdc.gov/flu/weekly/overview.htm.

Summary Data

Condition	Week 40	Week 39	Week 38
Number of Counties Reporting (36 total)	1 36	0	0
Number of Counties Reporting ILI	1 8	0	0
Number of Counties Reporting High Levels of ILI*	1 8	0	0
Number of Counties Reporting Flu A	↑ 1	0	0
Number of Counties Reporting Flu B	1 4	0	0
Number of Counties Reporting Flu A & Flu B	↑ 1	0	0

The arrows represent changes from the previous week. A sideways arrow means there was no change in that condition.

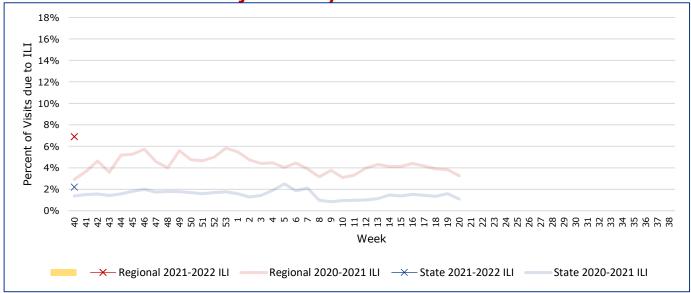

Map of Regional Flu Activity

The map above depicts the previous week's reports of flu or influenza-like illness activity in each county. The legend on the bottom right of the map describes the meaning of each color.

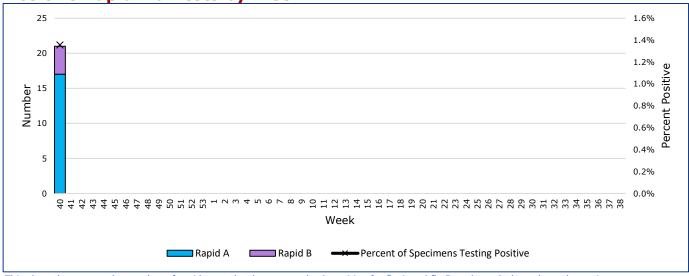

^{*}Counties with total percent of visits due to ILI above 4.0% for the week are considered to have high/abnormal levels.

This chart documents the percentage of patient visits that were due to ILI at hospitals and clinics around the region. It compares our region's data with the state's data and also compares to last flu season.

Positive Rapid Flu Tests by Week

This chart documents the number of rapid tests that have come back positive for flu A and flu B each week throughout the region.

Flu Data by County

	Week 40				Week 39			Week 38				
County	Patient Visits	% with ILI	Flu A	Flu B	Patient Visits	% with ILI	Flu A	Flu B	Patient Visits	% with ILI	Flu A	Flu B
Andrews	36	0%	0	0	0		0	0	0		0	0
