

## Pediatric Urinary Tract Infection Admission Rate (Observed, Pediatric Population Under Age 18), 2016

Urinary tract infection (UTI) is usually caused when bacteria enter the bladder and cause inflammation and infection. It is a very common condition, with older adults at highest risk. Left untreated, an infection has the potential to cause more serious, even life-threatening difficulties and permanent damage to the urinary tract. In most cases, an uncomplicated UTI can be treated with proper antibiotics in outpatient settings.

Pediatric Urinary Tract Infection Admission Rate (Observed, Pediatric Population Under Age 18), 2016
