

Uncontrolled Diabetes Admission Rate (Observed, Adult Population Age 18 and older), 2016

Uncontrolled diabetes is a non-specific diagnosis, which indicates that the patient's blood sugar level is not kept within acceptable levels by his or her current treatment routine. In this report, this indicator only includes hospitalizations of patients whose principal diagnosis did not include a specified short-term complication of diabetes. It is unclear whether poor blood sugar control arises from poor quality medical care, noncompliance of patients, lack of education, or access to care problems.

Uncontrolled Diabetes Admission Rate (Observed, Adult Population Age 18 and older), 2016
